WEBBS' VEGETABLE SEEDS FOR 1907.

WEBBS' MARKET FAVOURITE ASPARAGUS.
1s. per packet. 1s. 6d. per ounce. See above.

WEBB & SONS are the largest *bona fide* Seed Growers in the Kingdom, and not merely vendors. All the Seeds they send out are grown under their own supervision, in the most suitable districts. As Seed Growers Webb & Sons annually employ nearly 20,000 acres, including the Kinver Seed Farms, where their scientific experiments have resulted in the introduction of Vegetables, Flowers, and Potatoes that are unequalled, as is proved by their great success at Shows.

ASPARAGUS.

(*Asparagus officinalis*.)

FRENCH, *Asperge*.

(For Asparagus Plants, see page 62.)

THE seeds of this delicious and wholesome vegetable should be sown in the month of March, in drill-rows from one and a half to two feet apart, about an inch in depth, and covered with fine soil. When the young plants are about an inch and a half or two inches in height, thin them out to a distance of twelve or fifteen inches apart in the rows. The most suitable soil for the Asparagus is a rich sandy loam, rather inclining to be light than heavy, consequently this point must be kept in view when the ground is being worked; and if it should already be light and open, the manure must be good and well-rotted, while, on the contrary, if heavy in its nature, add sand or road-scrappings. The most economical width for an Asparagus bed is five feet, which will take three rows, one down the centre, and one on each side, about a foot from the edge. Prepare the new bed during the winter, and in the month of March the roots may be carefully planted in rows fifteen inches apart, and four inches deep. The after-cultivation consists in keeping the ground clean, in frequently applying liquid manure during dry weather, and in dressing the beds with manure and salt in spring.

Webbs' Market Favourite.—

This fine new variety is considerably in advance of the ordinary sorts, being **NOVELTY.**  earlier, larger, and more prolific. Its pea-green heads are of delicate flavour, and valuable alike for market garden work or private use. (See *Illustration annexed*.)

1s. per packet; 1s. 6d. per ounce.

Connover's Colossal.—This variety is of enormous size, and deep green colour; compact crown. May be cut in two years after sowing.

4s. per pound; 4d. per ounce.

True Giant.—An excellent and well-known productive variety; the best for general cultivation.

6s. per pound; 6d. per ounce.

'I have very great pleasure in testifying to the high quality of Webbs' Vegetable and Flower Seeds, having been a customer for many years. I have taken, in strong competitions, at Flower Shows, 5 Silver Medals, 4 Bronze Medals, and over 300 other Prizes.'—Mr. E. APPLESTONE, Atherstone.

ARTICHOKE.

(*Cynara Scolymus*.)

FRENCH, *Artichaut*.

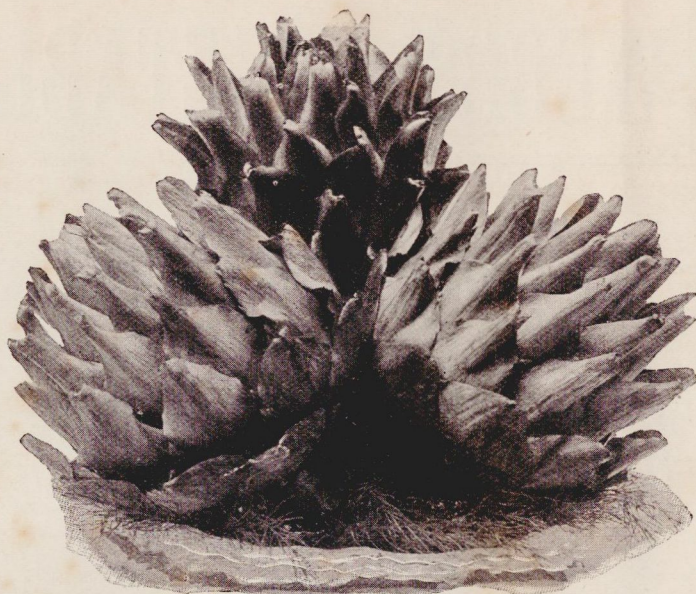

(For Artichoke Plants and Roots, see page 62.)

ARTICHOKEs require a good, deep, somewhat moist, sandy soil. Sow the seed in rows about a foot apart in February, or March, and transplant the seedlings, as soon as they are large enough, to their permanent quarters. The ground in which they are planted should have been trench-dug, with a good dressing of manure. Water after planting, and during dry weather, until new roots are made; keep the ground around them well hoed in the summer and autumn months, and on the approach of frost pack some dry protecting material closely around their stems.

Green Globe.—Large globular heads, of good flavour; the best for ordinary purposes 1 0

Large Purple.—The favourite variety in France 1 0

Jerusalem.—Not produced from seed; for roots, see page 62.

GLOBE ARTICHOKE.

'I have grown your Seeds for the past 8 years and have always found them satisfactory; I have won a large number of prizes.'—Mr. B. WOOD, *Gardener to G. HALL, Esq., Hammerwich Hall.*

'I have taken 23 Prizes at 3 Shows, viz.: Easeneye, Roydon, and Ware, during the last season with the produce of your Seeds, which speaks very highly for their quality.'—Mr. R. V. YOUNGMAN, *Hanstead Abbots.*

BORECOLE, or KALE.

(*Brassica oleracea acephala*.)

FRENCH, *Chou vert*.

IF the supply required is not large, one sowing will be sufficient about the first week in April; but should the contrary be the case, three sowings will be necessary—the first, if possible, about the middle of March, the second early in April, and the third about a fortnight later. For most varieties the rows should be two feet asunder, and the plants from eighteen inches to two feet apart.

Webbs' New Polar.

A remarkable hardy new variety, standing through the severest weather and producing beautifully curled leaves of bright green colour. It is quite distinct in character, very ornamental, and of tender and mild flavour. 6d. and 1s. per packet; 1s. 6d. per ounce.

Webbs' Drumhead Kale.

This is quite a distinct variety, the heart being similar in shape to a cabbage, but with broad, curled outer leaves. Of delicious flavour when cooked. (See *Illustration annexed*.)

1s. per packet; 1s. 6d. per ounce.

Webbs' Perpetual Dwarf Green.

A very superior variety, of compact habit of growth, having exquisitely curled leaves, which are of unequalled quality; it is exceedingly ornamental, and very hardy.

6d. and 1s. per packet; 1s. 6d. per ounce.

Webbs' Extra Fine Curled Scotch.—Beautifully curled, and of delicious flavour. The plants are of dwarf habit.

6d. per packet; 1s. per ounce.

Webbs' Perpetual Dwarf Purple Curled.—Very ornamental and of the finest flavour.

6d. and 1s. per packet; 1s. 6d. per ounce.

Webbs' Moss Curled.—Exceedingly productive, and very ornamental 6d. per packet 1 0

Buckman's Hardy Winter.—Will stand the frost of the severest winter, and may be used late in the spring 8

Variegated.—Ornamental 6d. per packet 1 0

Imperial Hearting.—Very fine 1 0

Asparagus.—Tender and delicious when cooked like Asparagus; hardy 10

WEBBS' DRUMHEAD KALE.

1s. per packet; 1s. 6d. per ounce. See above.

Hardy Sprouting Kale.—Very hardy, produces an abundance of side shoots of excellent flavour 1s. per packet.

Cottager's.—Produces an abundant supply of sprouts 8

Jerusalem.—Late; purple, with thick sprouts 6

Dwarf Green Curled 6

Tall Green Curled.—Very hardy 6

Thousand Headed 4

Chou de Milan.—An excellent winter sort 6

Ragged Jack.—The hardiest of all 6

BRUSSELS SPROUTS.

(*Brassica oleracea bullata minor.*)

FRENCH, *Chou de Bruzelles.*

THE main sowing of Brussels Sprouts is generally made about the middle of March. Sow moderately thick, and thin early. A plantation from this bed should be made early in May on a good rich soil, in rows two feet apart and eighteen inches between the rows. The young plants raised from the March sowing should be pricked out into rows about four inches apart on a nicely prepared border, where they will make a good stocky growth, preparatory to being planted out permanently later on. The April sowing, intended for the latest crop, should be treated in the same way. Hoe frequently, and keep clean from weeds.

WEBBS' PRIZETAKER BRUSSELS SPROUTS.

6d. and 1s. per packet. 1s. 6d. per ounce. See above.

Webbs' New Pride of the Market.

This new variety is an extraordinary fine type of Sprouts. It is of medium height, sturdy in growth—producing stems thickly clustered with large buttons—and is a grand sort for market.

1s. per packet; 1s. 9d. per ounce.

Webbs' Prizetaker.

For exhibition purposes or ordinary use, this new variety is unexcelled. The stem is covered with large firm sprouts, of the very finest quality.—(See *Illustration annexed.*)

6d. and 1s. per packet; 1s. 6d. per ounce.

Webbs' Matchless.

It is very early, of robust growth, and covered the entire length of the stem with compact sprouts of superior flavour, which are very tender when cooked. A favourite variety for general use and exhibition purposes.

6d. and 1s. per packet; 1s. 6d. per ounce.

Per ounce. s. d.

Dalmeny.—This hybrid produces an abundance of small cabbage-like sprouts of mild flavour . . . 10

Albert Sprouts.—A cross between Brussels Sprouts and Savoy, of rapid growth . . . 6d. per packet, . 10

The Wroxton.—Sprouts large, and of fine flavour . . . 1s. per packet.

Aigburth.—Strongly recommended . . . 1 0

Scrymger's Giant.—Produces an abundance of excellent medium-sized sprouts . . . 10

Imported 6

Rosebery 10

'Your Sprouts have done well again this year, especially Prizetaker; it is the best variety I can grow. I am giving you order for more; it is well worth its cost.'—Mr. F. SENDELL, *Gardener*, Old Vicarage.

'I am most pleased to say the Brussels Sprouts, Turnips, and Prize Winner Carrot are the best I have ever grown.'—Mr. R. A. KADWELL, *Gardener* to W. F. PRENTISS, Esq., Borden.

'Webbs' Matchless Brussels Sprouts is a fine dwarf variety. It is very productive, and closes well.'—*The Head Gardener to the Right Hon. the EARL BEAUCHAMP.*

BEANS—BROAD.

(*Faba vulgaris*.)

FRENCH, *Fève de marais*.

SOW in rows three feet asunder, except the dwarf-growing varieties, which do not require so much space, say six inches less. The Beans should be planted three or four inches apart in the rows.

Webbs' Kinver Mammoth Longpod.

The earliest, largest-podded, and most prolific Broad Bean. This splendid Bean, which grows about 3½ feet high, has produced immense pods, measuring over 20 inches in length, with 12 fine beans in each; it is exceedingly early, an enormous cropper, of excellent flavour, and invaluable for both table use and exhibition purposes. Awarded First Prizes at nearly every show in the Kingdom.—(See Illustration annexed.) 2s. 6d. per quart.

'I secured First Prize at our local show this week with your Kinver Mammoth Broad Beans in a class of eleven.'—B. BRANDETH, Esq., Esperange, Formby.

'We had an extraordinary crop of Mammoth Longpod Beans,—splendid pods.'—Mr. JOS. KERSLEY, Gardener to S. DARLING, Esq., Beckhampton House.

'I have much pleasure in sending you a sample of Kinver Mammoth Longpod Beans, Seed of which I had from you. They were sown the first week in November by the side of Early Mazagan, both being sown at the same time. Your Kinver Mammoth was fit to gather on June 24th, the Early Mazagan on the 29th, so I shall strongly recommend your Mammoth Longpod for getting an early crop. I think it an *AI* Bean.'—Mr. A. BROWN, The Gardens, The Limes.

Webbs' New Gigantic Green Windsor.

A perfectly distinct and valuable variety. The pods which are produced abundantly, are long, very broad, and usually contain 4 extra large Beans of a beautiful deep green colour and delicious flavour. 2s. per quart.

'Broad Beans were most interesting. Some had grown well and clean, while a neighbouring kind had been nearly a failure in growth, and quite unprofitable. It can hardly be imagined that Broad Beans are so varied in constitution, yet seen here it would appear that some are subject to the fly and others not. The most healthy and productive were the Gigantic Green Longpod, Mammoth Longpod, and Improved Windsor.'—THE JOURNAL OF HORTICULTURE.

Webbs' New Gigantic Green Longpod.

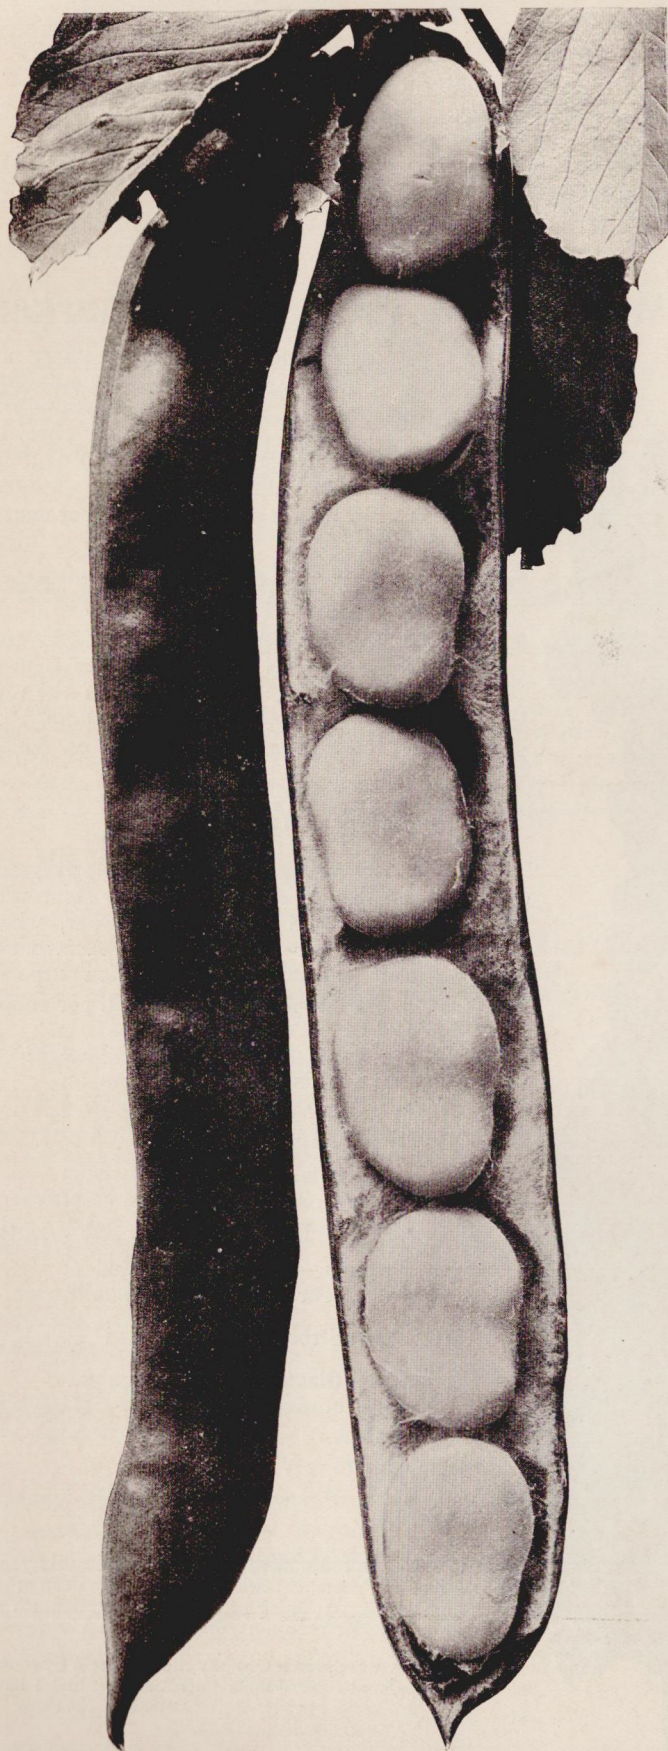

An exceedingly fine variety, and far superior in quality to the other white or green seeded sorts. The pods are long and of fine shape, containing 5 to 7 large Beans. It is very early and a prolific cropper. 2s. per quart.

'The Seeds I had from you in the spring have done splendidly. The Longpod Beans were especially good. It is marvellous what a continued supply of Vegetables we have had from your seeds.'—Mr. L. E. PICKERSGILL, Fernhurst.

Webbs' Improved Windsor.

The best Broad Bean for the main crop. It is of first-class flavour, very productive, and greatly appreciated for the length of time it remains fit for use; 3 feet high. 1s. 6d. per quart.

'Some five years ago a gardening friend assured me that I could obtain from you seeds of first-rate quality without having to pay a fancy price for them. On that recommendation I advised my employer to get them from you. I have been perfectly satisfied with the result, and am firmly convinced I could not have been better served anywhere.'—Mr. GEO. ILLSON, Gardener to J. S. DICKINSON, Esq., Kibworth House.

WEBBS' KINVER MAMMOTH LONGPOD BEAN.

2s. 6d. per quart. See above.

BEANS—BROAD—*continued.*

WEBBS' COLLECTIONS OF BROAD BEANS.

The following Collections include choice varieties to produce a succession during the season.

6 fine sorts, for succession (<i>our selection</i>) 1 quart of each	s. d. 7 6
6 fine sorts, for succession (<i>our selection</i>) 1 pint of each	4 0

BEANS—Wax-pod, or Butter.

SOW during March and April in pots and boxes under cover, and transplant into open ground when all danger of frost is past, or sow out of doors from May to the end of July.

Webbs' New Stringless Dwarf.

Too much cannot be said in favour of this new introduction, **NOVELTY.** which is a medium early variety, and produces a profusion of beans of splendid quality and quite free from string. **3s. 6d. per quart.**

Webbs' New Stringless Runner.

A valuable new Butter Bean, which is perfectly stringless; **NOVELTY.** it is a good cropper, of delicate flavour when cooked, and we have every confidence that it will become a general favourite. **3s. 6d. per quart.**

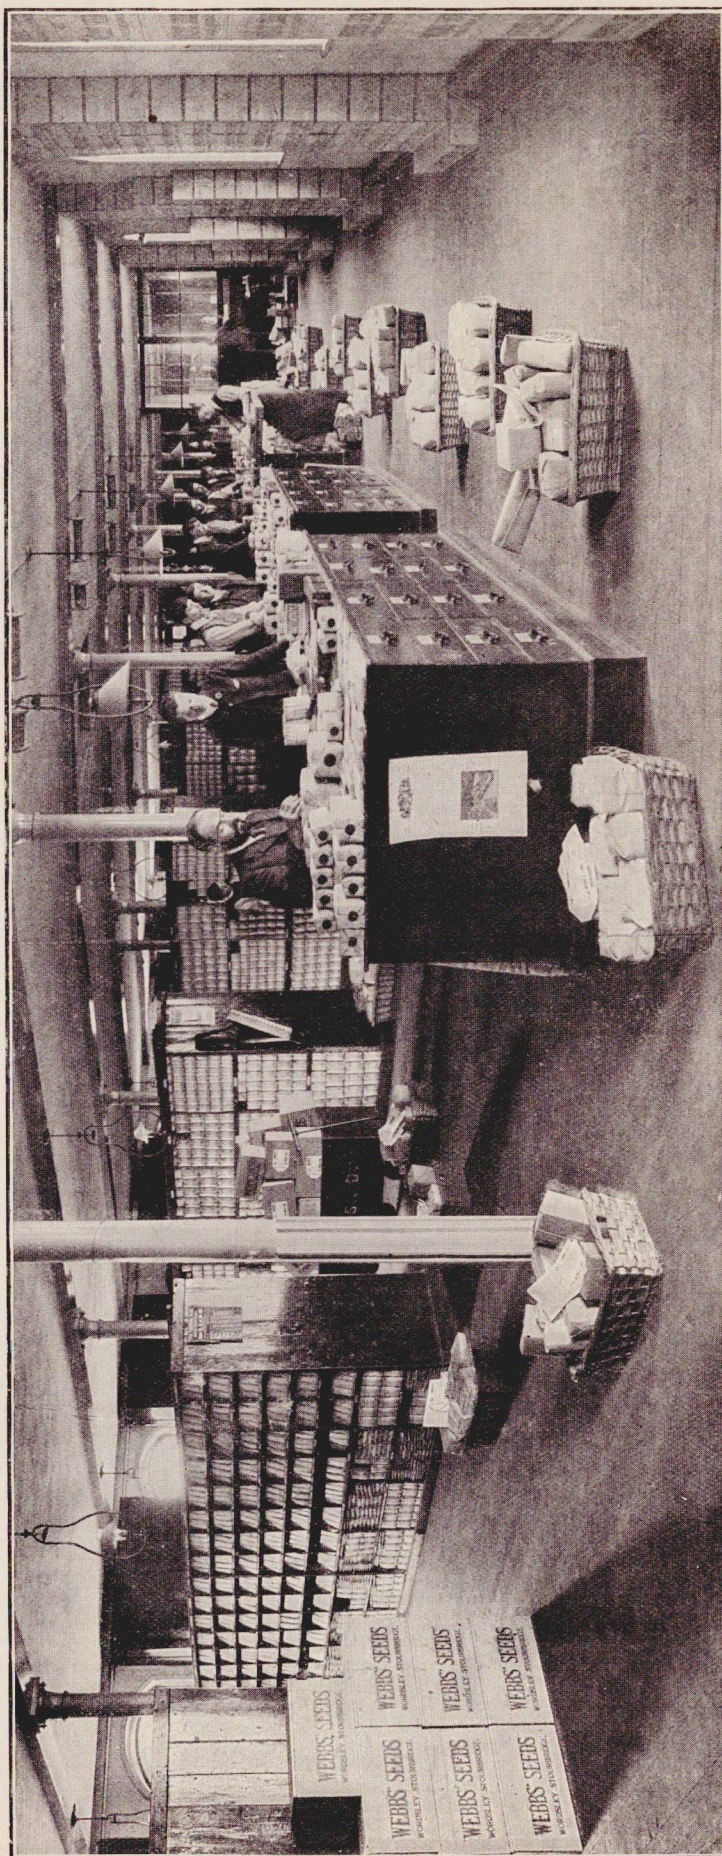

Webbs' Golden King (runner).—A very free-cropping runner bean with long golden-coloured pods, which are very tender and of delicious flavour. **2s. 6d. per quart.**

Webbs' Golden Queen (dwarf)—The golden-yellow pods of this distinct and handsome dwarf variety are of the finest quality; very productive. **2s. 6d. per quart.**

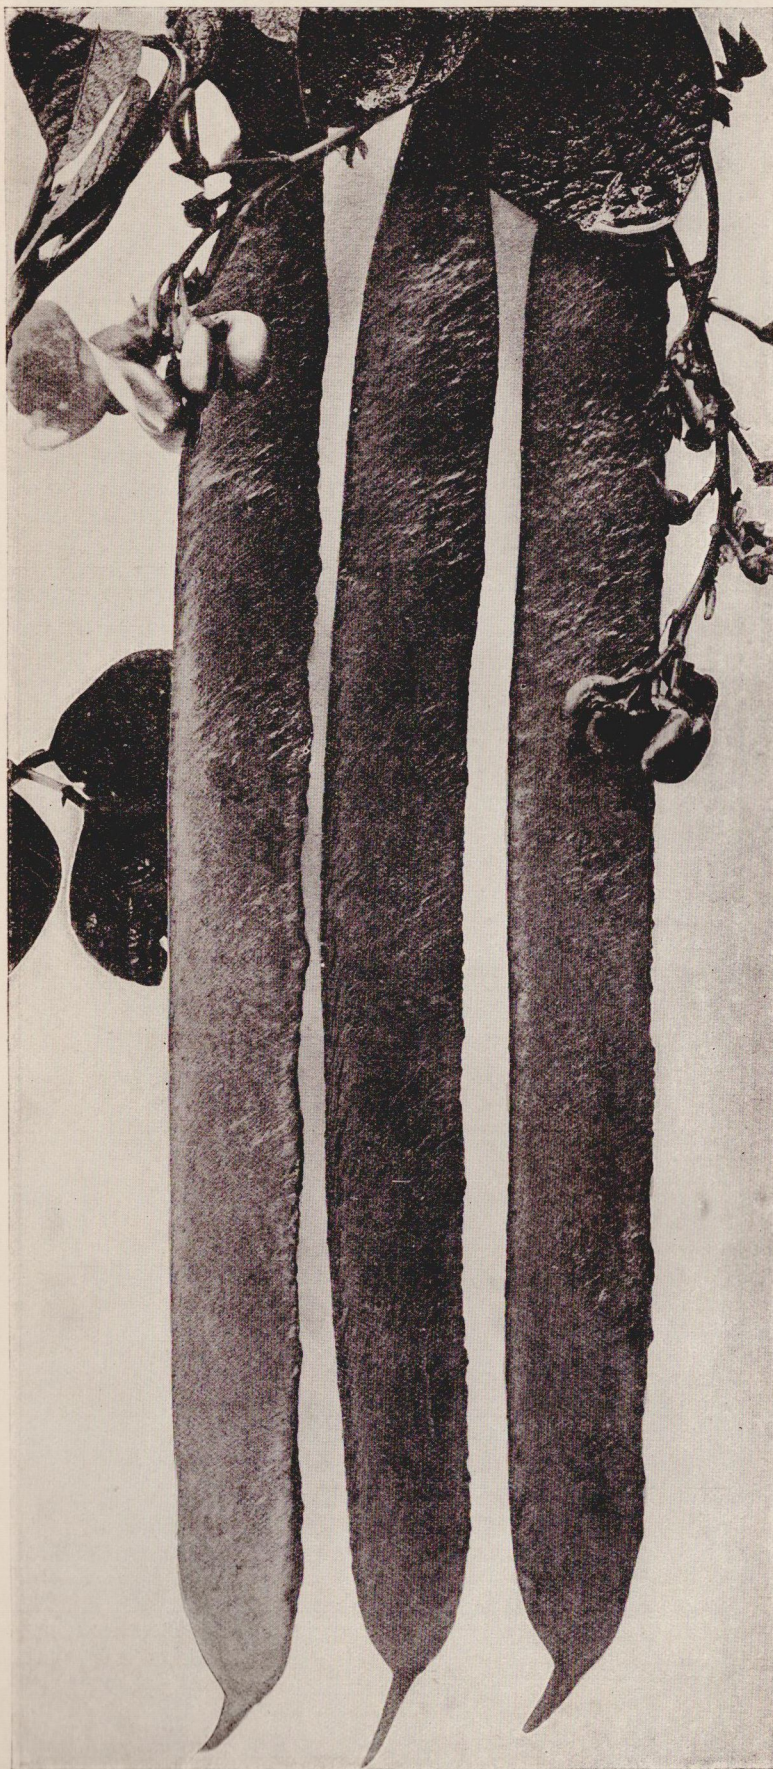

Mont d'Or (runner).—Very early; grows about 6 feet high. **2s. per pint.**

Early German Wax (dwarf).—Being free from stringiness, they may be cooked whole. **2s. per quart.**

Centenary. Yellow-podded, excellent flavour. **1s. 6d. per pint.**

A section of the Vegetable Seed Department at the Royal Seed Establishment, Wordsley.

WEBBS' NEW EXHIBITION RUNNER BEAN.
2s. per pint. 3s. 6d. per quart. See above.

Webbs' New Exhibition.

This is doubtless the finest of the Runner Beans, being of wonderfully strong growth, and a most prolific cropper. Its handsome long straight pods are of the finest quality, whilst for exhibition purposes they are unrivalled.—(See *Illustration annexed.*) 2s. per pint; 3s. 6d. per quart.

'The Exhibition Collection of Seeds I had from you last year turned out splendidly. I should think every seed must have germinated, they came up so thickly, and I had a grand lot of vegetables from them. I never saw a Bean crop like your Exhibition Runner. I had 23 pods on one stem, and still setting freely up to the top, retaining their freshness for a remarkable time on the vine.'—Mr. PHILIP W. WILLIAMS, Leominster.

'Webbs' Runner Bean is the best I have ever grown; it is a very heavy cropper and of splendid flavour. I have grown several 12 inches long.—Mr. D. GUNTER, Gardener to Captain E. M. BIRCH, Salthorpe House.

Webbs' Eclipse.

This valuable variety was under a course of selection for a number of years and is a decided improvement upon our Selected Scarlet Runner Bean. The pods are very large, fleshy, and exceedingly tender when cooked. They are produced in great abundance throughout the season.

2s. 6d. per quart.

'I think your Runner Bean excellent in every respect; it is of delicious flavour, good colour, and a splendid cropper. I find that it will retain its crispness for a considerable time on the vine, and is beautifully fresh and green when the old-fashioned bean would be useless for the table.'—Mr. A. ABBOT, Bridport.

'I can speak in the highest terms of your Eclipse Runner Bean; it is an immense cropper of excellent flavour, and unequalled for exhibition,—the pods measuring from 12 to 14 inches in length. It took First Prize at our Show out of about 20 dishes.'—Mr. J. EVANS, Norton Priory Gardens.

'Webbs' Eclipse is the best Runner Bean I ever grew; many of them being 11 inches long.'—Mr. JOHN MOYLE, Yew Tree Cottage.

Webbs' Giant White.

An exceedingly prolific kind, with pods of great length, and possessing excellent cooking qualities, being particularly tender and fleshy.

2s. 6d. per quart.

'The seeds you supplied to Archdeacon Bree have again given the greatest satisfaction, particularly Peas, Beans, Cucumbers, Tomatoes, etc.'—Mr. H. KETTLE, Gardener to The Venerable ARCHDEACON BREE, Allesley Rectory.

Webbs' Selected Scarlet Runner.—A very superior kind, which is grown extensively. It is a remarkably heavy cropper, of excellent quality, and has extra large pods. . . . 2 3

Purple-podded.—Highly ornamental when in bloom, with an abundance of rich purple pods. When boiled they are of a beautiful green colour, and superior flavour. . . . 2 3

White Czar.—One of the best white varieties. . . . 2 6

Ne Plus Ultra.—A splendid scarlet variety. . . . 1 9

Best of All.—A large-podded variety. . . . 3 0

Girtford Giant.—A large-podded variety; valuable for exhibition. . . . 2 6

Painted Lady.—Very distinct and productive. . . . 1 3

Champion.—A large variety of the Scarlet Runner. . . . 1 6

White Dutch.—Long-podded. . . . 10

Scarlet Runner.—Ordinary variety. . . . 1 0

Sow thinly from May until July, in rows about three feet apart.

Webbs' New Dwarf French Bean for 1907—"Supreme."

The pods of this new variety of Dwarf Bean are long and handsome in shape and of good colour. **NOVELTY.** They are borne in great profusion, are very fleshy and of the finest quality when cooked. For exhibition there is no better Bean in cultivation.

2s. per pint.

'I am glad to say I found your Seed all I could wish for during the past season.'—Mr. E. BECKETT, *Head Gardener* to The Rt. Hon. LORD ALDENHAM, The Gardens, Aldenham House.

Webbs' New Cluster.

This is a very early prolific dwarf bean of fine quality, with dark green fleshy pods, of good length and excellent flavour.—(See *Illustration*, page 10.)

2s. per pint.

'I have much pleasure in stating your Seeds have given satisfaction without exception. Your stocks of Peas are very true and heavy cropping, and in no case have I had a failure in germinating. I hope to increase our order another year.'—Mr. W. H. SHAW, The Gardens, Horsley Hall.

Webbs' Hundredfold.

This new variety is specially adapted for forcing purposes, being very early, of dwarf growth, and remarkably prolific, whilst the pods are of the finest flavour.—(See *Illustration* below.)

2s. per quart.

'I took 14 Prizes out of 15 entries at our Show at Brackley, viz. 6 First, 4 Second, 4 Third, including First for a Collection.'—Mr. J. HADYMAN, Everley.

Webbs' Selected Canadian Wonder.

This excellent Bean, which has been specially selected, is remarkably prolific, and of dwarf, compact habit; the pods are of beautiful shape, great length, and superior flavour.

2s. per quart.

'All the Seeds have turned out well. The Peas are splendid, and I have not had a failure.'—Mr. J. PRATT, *Gardener* to G. H. ARMSTRONG, Esq., Castle View.

'I beg leave to tell you that I have been 13 years gardener to J. Herbert Blacklock, Esq., and have used your Seeds each year, and have given my employer the greatest satisfaction with the produce from the same, and which I feel certain will bear good testimony as to the excellent quality of your seeds in general.'—Mr. THOMAS IZZARD, The Lodge, Overthorpe House.

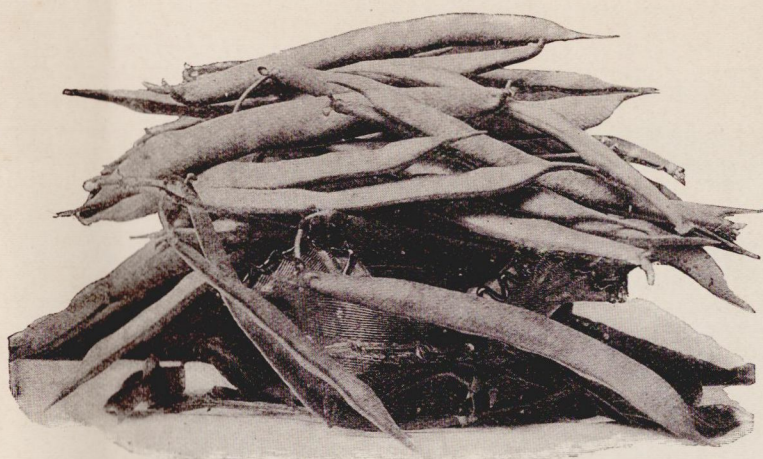

Webbs' New Harbinger.

An exceedingly early and prolific variety, unsurpassed for forcing purposes, and of equal value for outside cultivation. The pods are long, of handsome appearance, and remarkably tender in all stages of growth.—(See *Illustration* above.)

3s. per quart.

'Messrs. Webbs' Trial Grounds.—Webbs' New Dwarf French Bean called Harbinger is very prolific, and yields lengthy pods of high quality, and the New Runner Bean Eclipse appears to be a great improvement on most of its kind.'—*THE GARDENING WORLD*.

'The Seeds supplied last year produced magnificent results, exceeding any I have ever had from other firms.'—A. G. WESTERN, Esq., Canby House.

WEBBS' NEW HARBINGER DWARF FRENCH BEAN.
3s. per quart. See below.

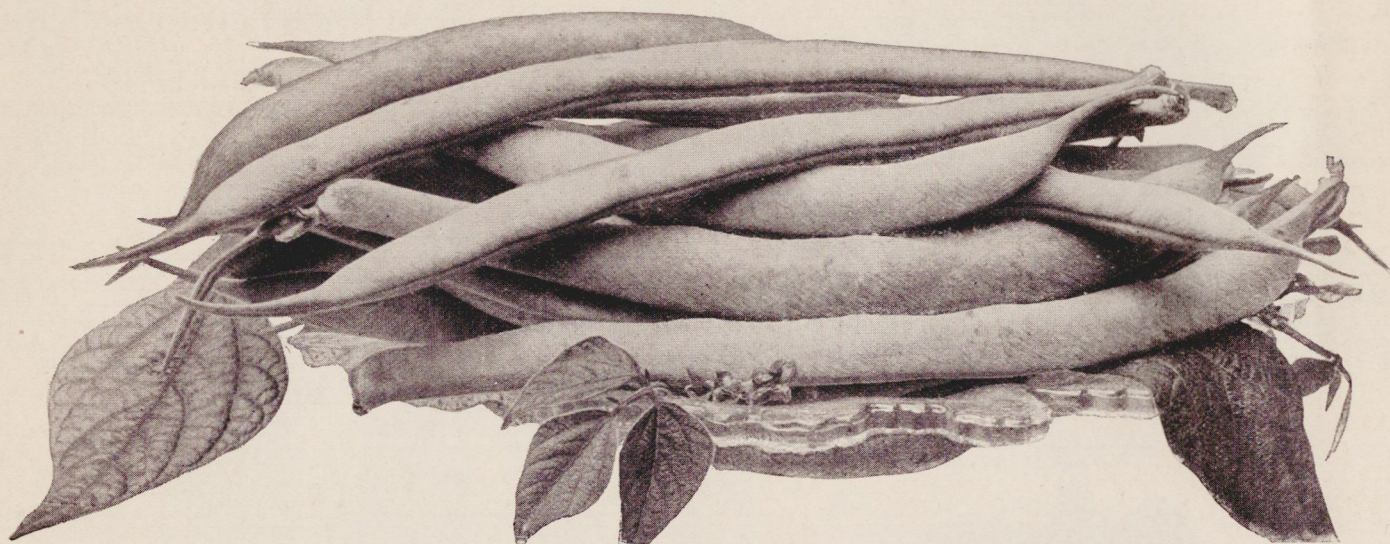

WEBBS' NEW ABUNDANCE DWARF FRENCH BEAN.
3s. 6d. per quart. See page 10.

WEBBS' HUNDREDFOLD DWARF FRENCH BEAN. 2s. per quart. See above.

BEANS—FRENCH or DWARF—*continued.*

WEBBS' NEW CLUSTER DWARF FRENCH BEAN. 2s. per pint. See page 9

Webbs' New Abundance.

This handsome new variety has a distinct and unique appearance whilst growing; it is remarkably early and prolific, and suited for either forcing purposes or outdoor culture. The pods are bright green in colour, long, thin, and exceedingly tender and delicate in flavour.—(See *Illustration*, page 9.)

3s. 6d. per quart.

Webbs' Prolific Negro Longpodded.—A great cropper, of excellent quality; valuable for the early crop 1 9

Ne Plus Ultra.—An excellent early variety; dwarf in habit of growth, and very prolific 1 6

Fulmer's Early Forcing.—Early and prolific 1 6

Sion House.—Very early; forces well 1 0

Webbs' Victoria.

This splendid variety is a great favourite. It is very symmetrical in shape, and unsurpassed for the length of its pods, which are delicate in flavour, and produced in abundance.

'I have taken about 55 Prizes at our 3 Local Shows with the produce of your Seeds. At the last one I won 23 Prizes out of 25 entries—13 First and 10 Second.'—MR. WM. STEVENS, Sandhill.

'I can speak in the highest terms of your Bean; it is an immense cropper of excellent flavour, and unequalled for exhibition,—the pods measuring from 12 to 14 inches in length. It took First Prize at our Show out of about 20 dishes.'—MR. J. EVANS, Norton Priory Gardens.

'Out of 7 exhibits at our Show I took 6 Prizes for specimens grown from your Seeds. The Excelsior Climbing Bean was a grand sight; I never saw such a cropper, and the flavour was excellent.'—MR. J. RAYNER, *Gardener to C. E. HAMMOND, Esq., Exning Road.*

'I was very successful with the produce of your Seeds at the Membury Show, being awarded 6 First Prizes, one of which was for a Collection of Vegetables, eight varieties, open to all comers.'—MR. W. G. TOLMAN, Membury.

'Your Victoria Dwarf Bean was 4 days in advance of Canadian Wonder sown on same ground and having same treatment.'—MR. F. R. CASTLE, *Gardener to G. A. HAGGIE, Esq., Bruncombe.*

BROCCOLI.

(*Brassica oleracea botrytis asparagoides*.)

FRENCH, *Chou Brocoli*.

THE earliest sowings of Broccoli are generally made during March. The variety selected for these sowings should be one like Webbs' Autumn White, that will come into use in September and last into December. In April and May the later sorts should be sown, in small batches, at intervals of a fortnight or so. Some varieties require to be planted, in their permanent quarters, farther apart than others, but the medium will be found between thirty inches and three feet apart each way. Draw the soil about the stems as they advance in growth, and apply liquid manure frequently.

(For cutting in December and January.)

WEBBS' VANGUARD BROCCOLI.
2s. per ounce. See below.

(For cutting from September to December.)

Webbs' Vanguard.

A splendid and useful variety, coming into use between the early and late Cauliflowers, and producing solid pure white heads of the finest quality.—(See Illustration above.)

2s. per ounce.

Webbs' Autumn White.

A desirable variety, of dwarf and robust habit. The heads are large, exceedingly white, very compact, and of the choicest quality. As a succession to the Cauliflower for autumn use it is unequalled.

6d. and 1s. per packet; 2s. 6d. per ounce.

Purple Cape.—Large and compact. If sown at the end of March, nice heads may be obtained by the first of September

1s. 6d. per packet.

Grange's White Cape.—A fine variety, having large, close, pure white heads

6d. and 1s. per packet, 1 6

Veitch's Self-Protecting.—An excellent variety; large firm heads

6d. and 1s. per packet, 1 9

Walcheren.—A very valuable kind for general autumn use

6d. and 1s. per packet, 1 6

Webbs' Winter White.

A splendid variety, and the best for winter use, producing very large, solid, pure white heads, which are of exceedingly fine flavour; it is compact in habit of growth, and very hardy.

6d. and 1s. per packet; 2s. 6d. per ounce.

Backhouse's Winter White.—A compact variety; self-protecting and hardy

Per ounce. s. d.
1s. per packet, 2 6

Osborn's Winter White.—A valuable dwarf Broccoli; pure white heads

6d. and 1s. per packet, 1 6

Snows' Superb Winter White.—A superior winter Broccoli; heads large and very solid

1s. per packet, 2 6

Penzance Early White.—A well-known variety

1 3

(For cutting from January to April.)

Webbs' Perfection.

This magnificent variety produces under ordinary treatment handsome heads of the purest white, immense in size, and excellent in flavour. It is of compact habit, and exceedingly hardy, being well protected with foliage.—(See Illustration below.)

6d. and 1s. per packet; 1s. 9d. per ounce.

WEBBS' PERFECTION BROCCOLI.

6d. and 1s. per packet; 1s. 9d. per ounce. See above.

BROCCOLI—continued.

WEBBS' NEW SNOWDON BROCCOLI. 1s. per packet ; 2s. 6d. per ounce. See below.

(For cutting from January to April—continued.)

Webbs' New Snowdon.

We have confidence in recommending this valuable main crop variety, which is very hardy and produces enormous heads of good quality and very close.—(See Illustration above.)

1s. per packet; 2s. 6d. per ounce.

'Please forward me a packet of Broccoli. I consider it a first-class variety. I am cutting some superb heads of splendid quality and fine flavour.'—Mr. W. J. HUMPHREYS, The Gardens, Buckden Towers.

'I have grown your Seeds for the last 5 years and have much pleasure in informing you that they have always done well and given every satisfaction.'—Mr. H. KYNASTON, Gardener to Captain W. BEST, Ystrad.

Webbs' Avalanche.

A splendid new variety, suitable for early spring use, very hardy and robust in habit of growth; the heads which remain a long time fit for use, are snowy white, close, and well protected by the foliage. This is one of the best varieties ever introduced to the public for early spring use.

6d. and 1s. per packet; 2s. 6d. per ounce.

'I have much pleasure in stating that the Seeds I had from you gave every satisfaction, and I shall be pleased to place an order with you next spring.'—Mr. J. WHISTON, Lutterworth.

'I am very pleased to say that your Seeds have turned out very satisfactorily, being true to name and germinating well.'—Mr. J. READ, Head Gardener to The EARL OF CARNARVON, Breby Park Gardens.

Webbs' New Mont Blanc.

Of short, compact habit of growth; the heads, which are thoroughly protected, are somewhat conical in shape, snowy white, close and of fine texture, whilst their flavour is everything that can be desired.—(See Illustration, page 13.)

6d. and 1s. per packet; 2s. per ounce.

Webbs' Spring White.

A very valuable kind, coming into use early in the spring; the heads, which are well protected, are of good size, very close and firm; of fine colour and splendid flavour. Much appreciated for the table on account of its splendid quality.

6d. and 1s. per packet; 2s. per ounce.

(For cutting from April to July.)

Webbs' New Safeguard.

We are pleased to be able to offer this splendid new variety which, after being under trial for several seasons with other late kinds, we find to be the best for quality and **NOVELTY.** for late cutting. It has an extremely hardy constitution, and produces solid white heads of large size.

1s. 6d. and 2s. 6d. per packet.

Webbs' May Queen.

This handsome Broccoli is one of the finest late varieties. It is of dwarf and distinct habit of growth, the heads are thoroughly protected, beautifully white and compact, and unsurpassed for size and quality.

1s. per packet ; 2s. 6d. per ounce.

'Your May Queen Broccoli is the finest ever grown in this district. I cut one to-night 16 inches across.'—Mr. JOHN TONGUE, Majors Barn.

Webbs' Snowdrift.

For the main crop this variety is most valuable. Its firm white heads are of good size and quality, and well protected by the foliage.

6d. and 1s. per packet ; 2s. per ounce.

Webbs' Champion.

This popular variety is of great value for late use. It is very distinct, and perfectly hardy.

6d. and 1s. per packet ; 1s. 9d. per ounce.

	Per ounce.	s.	d.
Williams' Alexandra. —A fine late variety, remarkably hardy	6d. and 1s. per packet,	1	6

BEET.

(*Beta vulgaris*.)

FRENCH, *Betterave*.

BEET, like all other conical-rooted plants, comes to the greatest perfection in a light sandy soil, and requires a fair share of manure, which must not be put in the ground too near the surface, or forked roots will be the result. The best time for the first sowing is early in April, and a second sowing should be made about the end of May. Sow the seed in drills fifteen inches wide, and thin out the plants to nine inches apart. The roots may be stored in sand, where the frost cannot reach them.

WEBBS' NEW VOLUNTEER BEET. 6d. and 1s. per packet; 1s. 6d. per ounce. See below.

Webbs' New Volunteer.

The root of this new variety is long and handsome in shape, deep blood-red in colour, and of excellent quality. The foliage is green in colour and vigorous in growth.—(See Illustration above.)

6d. and 1s. per packet; 1s. 6d. per ounce.

Webbs' Improved Dark Red.

This is an excellent kind for the table, being uniform in size, of clean growth, splendid colour, very tender, and of delicious flavour.

6d. and 1s. per packet; 1s. 6d. per ounce.

'I must say that both Vegetable and Flower Seeds turned out very satisfactorily for the last six years.'—Mr. WM. M'DONALD, *Gardener to* T. B. BURNHAM, Esq., Plaw-Hatch.

'Both Vegetable and Flower Seeds have given every satisfaction; I had a good lot of Onions, Carrots, Beet, Peas, Beans, etc.'—Mr. J. MURBY, *The Gardens, Forest Grove*.

'Your Seeds have given great satisfaction and especially the Kitchen Garden Seeds; we have had none better.'—Mr. WM. PERKIN, *Gardener to* Mrs. BOURNE, Hilderstone Hall.

'I must say that both the Garden and Farm Seeds have turned out well. I have had excellent results from them with entire satisfaction to myself and my employer.'—Mr. THOMAS CULVER, *Gardener to* H. COBBETT, Esq., Ongar Hill House.

Webbs' Satisfaction.

The root of this handsome new variety is of medium size, long and tapering in shape, of deep blood-red colour, fine grain, and sweet and delicate in flavour. It is short in habit of growth, with beautiful dark red foliage.

6d. and 1s. per packet; 1s. 6d. per ounce.

Webbs' Bedding.

6d. per packet, . 9

Blood Red

. 6

CAPSICUM AND CHILI.

Capsicum annum; *Capsicum frutescens*. FRENCH, *Piment*.

SEEDS of any varieties of Capsicum or Chili may be sown in March, in pans of light rich soil, which should be plunged in a hot-bed. As soon as the seedlings have grown into the rough leaf, prick them out singly into small sixty pots, and grow them on in heat, shifting them as required until they get into six- or eight-inch pots, in which they may be allowed to fruit. Keep them as close as possible to the glass in a warm house. In favoured situations they will ripen their fruit out of doors; and for this purpose the plants should be hardened off towards the end of May, and be planted out in June on a south border about twelve or eighteen inches apart each way. They must be well watered at the time of planting, and regularly during dry weather.

Webbs' Golden Drop Capsicum.—A handsome and highly decorative variety, producing large golden yellow pods, which are not only very ornamental whilst growing, but are of great value for pickling and other purposes.

1s. per packet.

Webbs' Monstrous Capsicum.—This extraordinary variety bears pods of deep red colour, which are as much as five to six inches in diameter.

6d. and 1s. per packet.

Prince of Wales Capsicum.—The seed-pods are of brilliant yellow colour.

Mixed Chili 6

CABBAGE.

(*Brassica oleracea capitata*.)

FRENCH, *Chou Pomme*.

A FEW of the earlier kinds may be sown from February to April, and planted out as required, for use during the autumn and winter months. The main sowings should be made in July and August, and transplanted into their permanent quarters in September and October; these will be ready for cutting during the following spring and summer. A heavy, moist, and fresh loamy soil is most suitable for this crop, and to ensure good full-sized Cabbages, it is necessary that the ground be deeply dug and heavily manured.

WEBBS' FIRST OF ALL CABBAGE. 6d. and 1s. per packet; 1s. 6d. per ounce. See below.

Webbs' New Leader.

This new introduction is undoubtedly the earliest Cabbage ever offered for spring sowing, and will be found a valuable variety for both large and small gardens. The heads are conical in shape with few outer leaves, very crisp and of excellent colour.

6d. and 1s. per packet; 1s. 6d. per ounce.

'Webbs' Cabbage has given great satisfaction; our allotment-holders acknowledge it to be the best early cabbage grown. It has beaten all the autumn-sown varieties.'—Mr. T. BREWSTER, Grassmoor.

'I am pleased with your Cabbage Seed. I was able to make £50 for one acre of them.'—Mr. F. A. LAWRENCE, Datchworth.

Webbs' Favourite.

The demand for medium-sized Cabbages being on the increase, this handsome new variety will be found to meet all requirements. It is early in coming to maturity, and the heads are of good shape, solid, and of superior quality.—(See Illustration, page 18.)

6d. per packet; 1s. per ounce.

'I showed last year at our local Show and was successful, taking 13 Prizes—8 Firsts and 5 Seconds.'—Mr. J. TAYLOR, Warstock Farm.

'I may say that the Emperor did better than any I saw in this district. I sowed mine in July and planted out 700; not one of them went to seed, and every one turned into a solid heart.'—Mr. T. H. PECK, Literary Institute, Egham.

'I cut a head of your Avalanche Broccoli, April 5th, measuring 13 inches across; a beautiful white variety and perfectly hardy.'—Mr. ROBERT COWLES, Stretton.

'This year I have gained 10 First and 2 Second Prizes at Horticultural Shows with the produce of your Seeds, including 2 Prizes for Collections in the open classes.'—Mr. JOSHUA JEANS, Stalbridge.

Webbs' First of All.

A small and very early variety, specially adapted for amateurs, or where space is limited. For sowing in spring for early summer use it is most valuable, and it has given the greatest satisfaction wherever grown.—(See Illustration above.)

6d. and 1s. per packet; 1s. 6d. per ounce.

'The Seeds I had from you last year did well. I think every one ought to grow your "First of All Cabbage." I took First Prize with your Stocks at two Shows.'—Mr. W. J. BUSSEY, *Gardener to the Rev. A. W. WORKMAN*, Grasby Vicarage.

'All the Seeds I had from you have turned out well. Last year I took over 30 Prizes with the produce of same.'—Mr. W. BROWN, *Gardener to the Rev. A. INGILBY*, Austwick.

'I gained 25 First and 4 Second Prizes with the produce of Webbs' Seeds.'—Mr. J. DALE, Bow Wood.

Webbs' Imperial.

Large, early, compact, and of superior flavour.

6d. per packet; 1s. per ounce.

'The finest bed of Cabbage I (or I think I can safely say anyone else) ever saw, was grown this season by Mr. Henry Woodford, Gardener to W. Selby Lowndes, Esq., of Whaddon Hall, from your Emperor Seed, which he obtained from me last year.'—Mr. M. MISSENDEN, Whaddon.

'I must say that Webbs' Emperor is the best Cabbage I ever saw grown about here; not one ran to seed again this year.'—Mr. HENRY TURNER, Ruscombe.

'Your Emperor Cabbage Seed was all that could be desired again this year. We were able to cut beautiful Cabbage the first week in April; they were quite equal in appearance to the photograph in your Catalogue of this year.'—Mr. F. MILLER, West End.

CABBAGE—*continued.*

WEBBS' EMPEROR CABBAGE. 6d. and 1s. per packet; 1s. 6d. per ounce. See below.

WEBBS' EMPEROR.—This superior Cabbage is acknowledged to be the earliest and best in cultivation, and is every year becoming more popular. The hearts are large, very uniform in size and shape, exceedingly solid and firm, and of remarkably mild flavour. It is hardy in constitution, and of dwarf and neat habit of growth, having very few outer leaves. The highest honours at the leading Shows have been repeatedly awarded to it.—(*See Illustration above.*)

6d. and 1s. per packet; 1s. 6d. per ounce.

'I would like to mention that the Seeds I had from you have in spite of the weather all come splendidly. I never had a nicer lot of Cabbage than your Emperor.'—A. CLEMONS, Esq., Derby.

'I have been growing your Emperor Cabbage Seed for over ten years and I don't remember ever having seen one "bolt." Last year I sowed in June and sold the plants and had no complaint of any "bolting." I don't think there could be a better cabbage for our locality.'—Mr. F. T. BILLING, Tywardreath.

'I have had your Emperor Cabbage Seed for the last ten years and have always had marvellous results; it is by far the best variety I have ever grown. I never had one run to seed, and as soon as the cabbages commence to grow they start filling in the heart. It is the most profitable cabbage to grow.'—Mr. G. OLIVER, Mount Sorrel.

'I cut and sold some Webb's Emperor Cabbage on Saturday last, Feb. 18, seed sown in July and planted out in open field in September. Is this a record? I may say that I have grown "Webb's Emperor" for a good many years, and have never known them run to seed.'—T. EDGAR, Esq., Polden Hill Dairy.

'I have a splendid bed of Webb's Emperor Cabbage,—no Seed could have come better; it is a splendid Cabbage, both for earliness and long standing. I sent some very nice cabbages to the table before Christmas. I planted out about 1000, and although the seed was sown very early in July, only 3 or 4 ran to seed.'—Mr. C. DRULLER, Oldswinford Castle Gardens.

CABBAGE—continued.

Webbs' Vesuvius (Pickling).

The earliest Red Cabbage.—The best Cabbage for pickling purposes, which is dwarf in habit of growth, and very early. Its medium-sized heads are of beautiful deep red colour, very solid, and delicate in flavour. (See *Illustration annexed.*)

6d. and 1s. per packet.

Stockley's Select Giant Red.—The largest Red Cabbage 6d. and 1s. per packet.

Hill's Incomparable.—Very early, and of excellent flavour 9

CRESS.

(*Lepidium sativum.*) FRENCH, *Cresson.*

FOR a winter supply sow thickly in pans or shallow boxes of light soil, which may be put into any warm place. In the summer it should be sown thickly in the open ground, the first batch out of doors being grown under a hand-light if the weather should be unfavourable. The first sowing of Australian Cress should be made in September in a warm, sunny position; the next being made in March. The American Cress is often used as a substitute for Water-cress. A thin sowing should be made at the end of July on rich, somewhat moist ground.

Webbs' Extra Fine Curled.—2s. 6d. per quart, 1s. 6d. per pint 4

Plain.—The sort usually sown for early salads 2s. per quart, 1s. 3d. per pint, 3

Triple Curled.—Excellent for salads or garnishing 2s. per quart, 1s. 3d. per pint, 3

Sorrel-leaved.—Useful for salads 6d. per packet.

Australian, or Golden.—Very tender; useful for garnishing, or salads 4

American, or Land.—This perennial is an excellent substitute for Water-cress 4

Water-cress.—May be grown in a shady place if well watered 6d. and 1s. per packet.

WEBBS' FAVOURITE CABBAGE.
6d. per packet; 1s. per ounce. See page 16.

CRESS.

SAVOY CABBAGE.

(*Brassica oleracea bullata.*) FRENCH, *Chou Pomme.*

As a rule, about three sowings of Savoy are sufficient, in the months of February, March, and April respectively. The first planting may be made early in May, and then others should take place about once a fortnight, until the whole of the late crop is got in, which ought to be finished before the end of August. Sow also in July and August for early spring planting.

Webbs' New Latest of All.

A handsome variety, with large, curled, deep green heads. It is extremely hardy, standing through the severest winter, and will be fit for use long after most other sorts are over. For quality it is all that can be desired, the flavour being unsurpassed.—(See *Illustration below.*)

6d. and 1s. per packet ; 1s. 6d. per ounce.

WEBBS' LITTLE WONDER SAVOY.

6d. per packet ; 1s. per ounce. See below.

Webbs' Little Wonder.

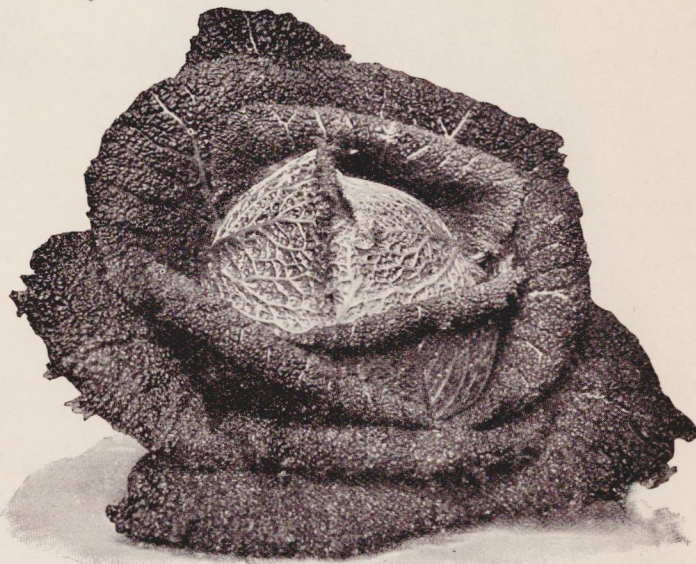

This splendid dwarf variety is distinct from, and unsurpassed by, any other ; if placed out fifteen inches from plant to plant, the ground will be covered with handsome round heads of excellent flavour. It has won numerous First Prizes. (See *Illustration above.*)

6d. per packet ; 1s. per ounce.

Webbs' Kinver Globe.

The heads of this excellent variety are globular in shape, very solid, of good size and the finest quality. It is exceedingly early, compact in habit of growth, and perfectly distinct from any other kind. (See *Illustration annexed.*)

--	--------------	---	--------------

WEBB'S PINK PERFECTION CELERY.

6d. and 1s. per packet. See above.

DURING January sow in shallow pans of light soil, and place the same in any light warm situation until the seedlings have made three or four leaves, when they must be transplanted into a frame. A good rich compost of loam, leaf-mold, and well-rotted dung, incorporated thoroughly together, should be placed in the bottom, and then the young plants may be put out, about six inches apart each way. For later crops, sow in heat early in February, and again about a month later, and treat the young plants in the same way. Fork a good thickness of rotten manure into the bottom of the trench, lift the plants as carefully as possible, and place them in the trenches nine inches apart; a good watering will then complete the operation.

Webb's Pink Perfection.

A new early variety of dwarf but robust habit of growth. The stalks are large, thick, of rich nutty flavour, and free from bitterness. It blanches easily and quickly, and retains its freshness a long time after being dug up.—(See *Illustration annexed*.)

6d. and 1s. per packet.

'Webb's Pink Perfection Celery did uncommonly well with me, and I was very well satisfied with it.'—Mr. JOSEPH BRAMLEY, South Driffild.

'The Celery Seed—both Pink and White—you supplied to me has proved to be unbeatable, as I have exhibited the same five times and received 5 First Prizes.'—Mr. HENRY BIRKETT, Primrose Cottage.

Webb's Giant White.

The best White Celery. A strong-growing new variety, valuable alike for exhibition or table purposes. The heads are very large, white, and exceedingly crisp and sweet in flavour. The plant being very hardy, is admirably adapted for late use. (See *Illustration*, page 21.)

1s. per packet.

'I won five First and two Second Prizes with your Celery last year, and my neighbour who had some plants of me also won one First and one Second Prize.'—Mr. W. MEAGOR, Nantstallon.

Webb's Solid White.

A large, handsome variety, with dwarf habit of growth; very solid, crisp, and of the finest flavour.

6d. and 1s. per packet.

Webb's Pearl White.

A splendid variety of very strong constitution, and one extremely valuable for exhibition purposes. The heads, which come quickly to use, are large, solid, exceedingly crisp and fine flavoured. Variegated foliage.

6d. and 1s. per packet.

Webb's Mammoth Red.

This is a very large, quick-growing variety; solid, crisp, and possessing an excellent nutty flavour. It is the hardiest Celery in commerce—grown successfully everywhere, and consequently very popular. Awarded many First Prizes.

6d. and 1s. per packet.

'I have grown your Pearl White Celery for 3 years, and it has proved the best I have ever had. Every one who has bought it of me says it is the finest he has had; it is tender and crisp.'—Mr. THOMAS DOBSON, Great Horton.

'Your Celery has turned out grand. It is very crisp and sweet.'—Mr. ARTHUR TANSLEY, The Gardens, Register House.

'I gave a few of your White Celery Seeds to a friend of mine. We both exhibited at Marlock Show, and obtained 2 First Prizes.'—Mr. F. TUCKER, The Gardens, Load Vicarage.

CELERY—continued.

WEBBS' GIANT WHITE CELERY.

1s. per packet. See page 20.

Webbs' Improved Leicester Red.—Distinct	6d. and 1s. per packet.
Wright's Grove White	6d. and 1s. per packet.

Sandringham White	6d. and 1s. per packet.
Celeriac, or Turnip-rooted.—Principally used for soups	6d. and 1s. per packet.
Celery Seed for Soups	3d. per ounce, 2s. per pound.

We also supply the following superior varieties at **6d. and 1s. per packet** :—

Williams' Matchless White, Williams' Matchless Red, Sulham Prize Pink, Ivory's Nonsuch, Cole's Crystal White, Cole's Superb Red, Seymour's Champion White, Manchester Red.

FRAME CUCUMBER.

(*Cucumis sativus*.)

FRENCH, *Concombre*.

CUCUMBER seed may be sown in any month of the year, according to the time the fruit is required, and the means at command for growing it. Those who depend upon frames for their supply should sow in February in three-inch pots, half-filled with good soil. Plunge them in a hot-bed, or bottom heat of some kind, and fill up the pots with soil as the plants increase in growth. This serves as a top-dressing, into which they will root freely, and obviates the risks incurred in fresh

potting. At this early stage be careful only to apply water of the same temperature as the frame ; and any soil put near the plants should be previously warmed through. In about a month they will be ready for transplanting into the fruiting-bed, the soil of which should be composed of leaf-mould, fine loam, and well-rotted manure, in equal parts. Make up the bed a few days before planting out, and after transplanting shade for a day or two until they have recovered from the shift. The temperature of the frame at night should be about 70°, and from that to 95° in the day-time ; but during severe weather it may be allowed to go down to a minimum of 65°. These plants are lovers of atmospheric moisture, which should be given, as well as water, at the roots, and a dung frame offers every facility for the operation. They dislike cold currents of air at all times, and the less that is given them the better they will do. In bright weather sprinkle a little of the litter from round the frame over the glass ; and if, after this, the temperature rises above 95°, then a little air should be given at the back. With proper attention to fresh linings, careful watering, stopping at one joint above the fruit, and an occasional thinning of the vine, plants in frames will bear from April to October ; and if plants about a foot high are ready to put out early in September in a suitable house or frame, the succession may be kept up. Cucumbers are well suited to winter culture in pots, especially if they can be plunged in leaves and dung. The best plan is to fix the empty pots where they are to stand, and fill in the space around them with heating materials. Fill up the pots with good turfy loam, well-rotted manure, and leaf-mould, and plant in the usual way.

Webbs' Universal.

As an all-round Cucumber, whether for summer or winter cultivation, market-gardening or private use, this grand variety is pre-eminent. It is a most persistent cropper, bears a continuous supply of handsome, dark green, medium-sized fruits of the finest quality.—(See *Illustration annexed*.)

1s. 6d. and 2s. 6d. per packet.

Webbs' Commander.

As an exhibition variety this valuable new Cucumber is unsurpassed, 24 to 30 inches being the usual length to which it may be grown. Its quality, too, is quite equal to its handsome appearance.—(See *Illustration page 22*.)

1s. 6d. and 2s. 6d. per packet.

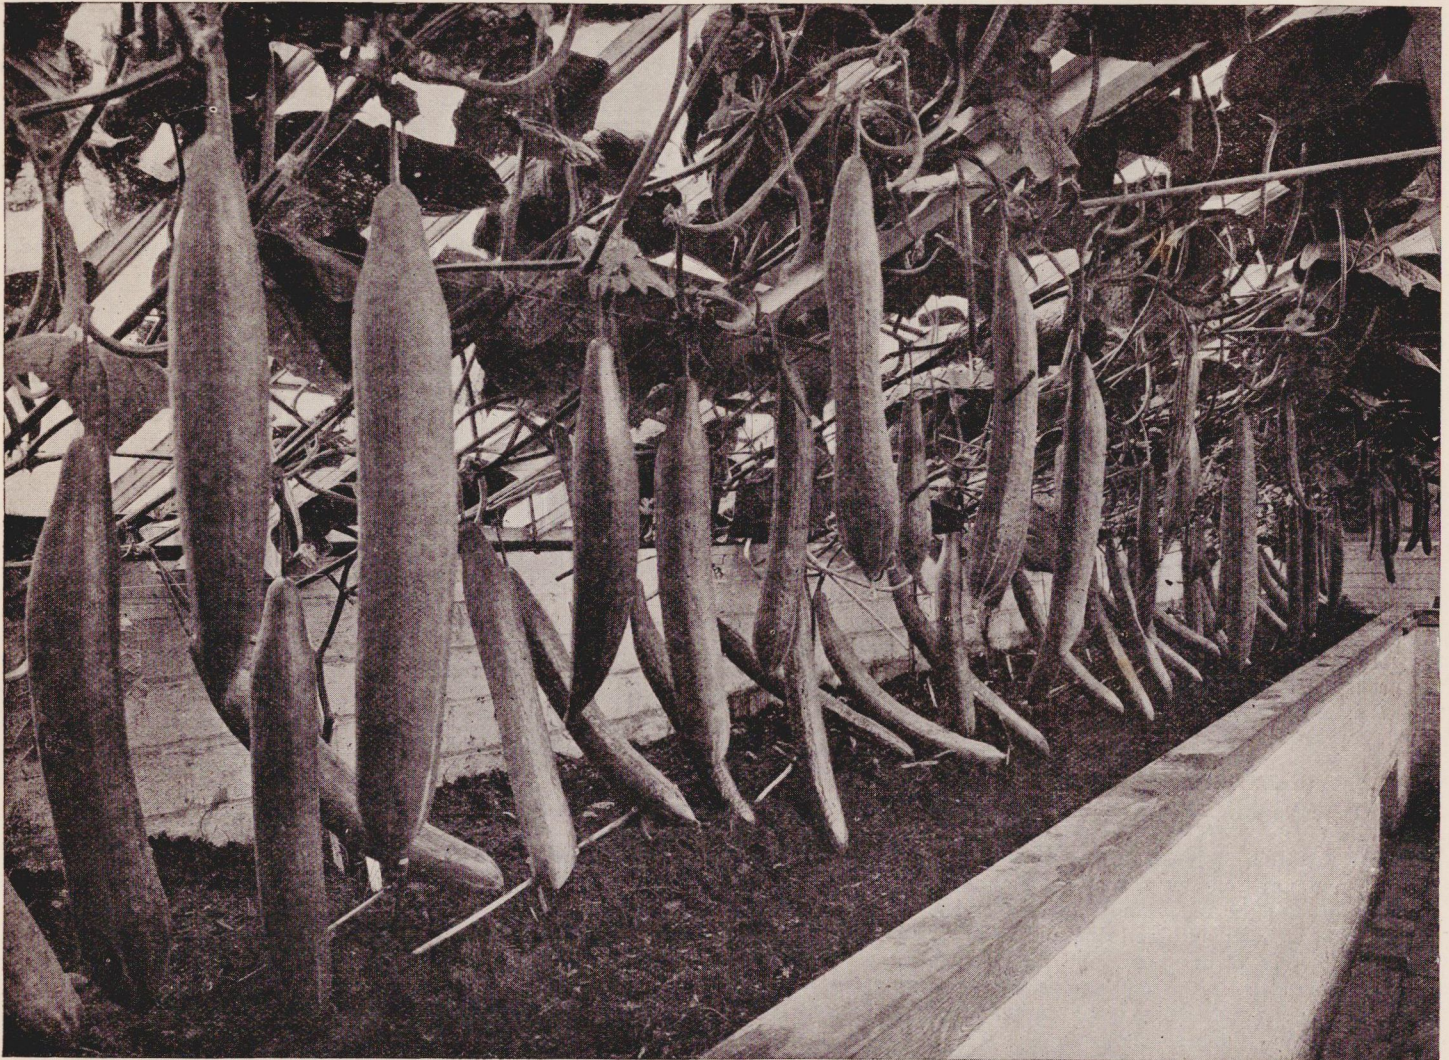

'I have grown your Bountiful Cucumber for several seasons, and consider it the best for use or show. It is a free setter, and of fine flavour and shape.'—MR. GEO. MERRY, The Ashe Gardens.

WEBBS' UNIVERSAL CUCUMBER.

1s. 6d. and 2s. 6d. per packet. See above.

FRAME CUCUMBER—*continued.*

WEBBS' COMMANDER CUCUMBER. From a Photograph of one of our Trial Houses at Wordsley. 1s. 6d. and 2s. 6d. per packet. See page 21.

Webbs' New Royal Favour.

We have every confidence in introducing this new Cucumber, as it is certain to achieve conspicuous success **NOVELTY.** both for table use and exhibition. It is a prolific bearer of exceptional quality, the fruit being medium-sized, uniformly well shaped, and of fine deep green colour, which it retains for some time after being cut.

1s. 6d. and 2s. 6d. per packet.

'I may state that all your seeds turned out splendidly, and especially the Royal Favour Cucumber, which was excellent in flavour, shape, and productiveness.'—Mr. E. DAVIES, *Gardener to Miss LLOYD ROBERTS, Plas Gwyn.*

Webbs' Improved Telegraph.

Webbs' Improved Telegraph Cucumber is a most valuable variety for either summer or winter cultivation. The fruit, which averages 18 inches in length, is straight, nearly smooth, of pale green colour, handsome appearance, and excellent flavour. This Cucumber has a strong constitution, and is an enormous cropper.

1s. 6d. and 2s. 6d. per packet.

'I have great pleasure in testifying to the genuineness of your Seeds. The Cucumber has given great satisfaction. It is a splendid cropper. I have recommended it to several friends.'—Mr. CHAS. HOWELL, *Wallace Lodge.*

Webbs' Stourbridge Gem.—This splendid Cucumber is the result of hybridisation between the popular varieties—Telegraph and Prince of Wales. It is a remarkably free setter, and very prolific, producing handsomely shaped fruit, from 18 to 24 inches in length, with beautifully white flesh, which is very delicate in flavour. It is suitable for either summer or winter cultivation, and its clean and symmetrical appearance renders it of great value for exhibition.

1s. 6d. and 2s. 6d. per packet.

'I am pleased to say that I was awarded Certificate of Merit on Wednesday last for your Stourbridge Gem Cucumber at the Sheffield Chrysanthemum Society Meeting. I staged four measuring 21, 22, 23, 24 inches in length.'—Mr. W. COOK, *Gardener to F. GREENWOOD, Esq., Abbeyfield.*

'I am very pleased indeed with your Cucumber, Stourbridge Gem, in fact all your seeds gave me every satisfaction, and as long as they give me such good results I shall continue to deal with your firm.'—Mr. W. LOVETT, *Gardener to A. B. COLLINGWOOD, Esq., Lilburn Tower.*

FRAME CUCUMBER—continued.

Webbs' New Cucumber for 1907.

"Everbearing."

This new introduction is a free setter and a most prolific bearer. The fruit grows to a good size, is very symmetrical, deep green in colour, and of fine flavour. It is also a continuous bearer and will rapidly become a great favourite, alike for the table and exhibition.

2s. 6d. and 3s. 6d. per packet.

Webbs' Bountiful.

A splendid new variety for either exhibition purposes or ordinary cultivation. The fruit grows to about 24 inches in length, is straight, smooth, and of deep green colour, very handsome in appearance, and of first-rate quality.—(See *Illustration annexed.*)

1s. 6d. and 2s. 6d. per packet.

'Webbs' Bountiful Cucumber has been a great success; it is an abundant bearer of nice handsome fruit, from 18 to 26 inches in length, and first-class for exhibition.'—Mr. EDWARD JONES, Rhiewport Gardens.

'I enclose a specimen of your Bountiful Cucumber which weighed when cut 4 lbs. 2 ozs., and measured 2 feet in length. I have cut over 150 from three plants.'—Mr. E. WILLIAMS, Gardener to S. NEWTON, Esq., Dennis.

Webbs' Perpetual Bearer.

This remarkably fine free-bearing variety shows a splendid bloom, and is very distinct; the fruit is uniform, most handsome in shape, of great length with short handle, and delicate in flavour.

1s. 6d. and 2s. 6d. per packet.

'The Seeds had from you gave the greatest satisfaction, winning the Silver Medal for Collection of Vegetables; also 9 Firsts and 6 Seconds at the Summer Shows. I also had 2 Firsts with your Cucumber, which measured 24 inches in length; in fact the best I ever grew.'—Mr. J. LARCOMBE, Gardener to J. R. F. G. TALBOT, Esq., Rhode Hill.

	Per packet.	s.	d.
Prince of Wales. —A superior exhibition Cucumber; short handle, and white spine; very hardy and prolific		1	6

Lord Kenyon's Favourite, Cuthill's Black Spine, Kirklees Hall Defiance, Sion House.

RIDGE CUCUMBER.

(*Cucumis sativus*.)

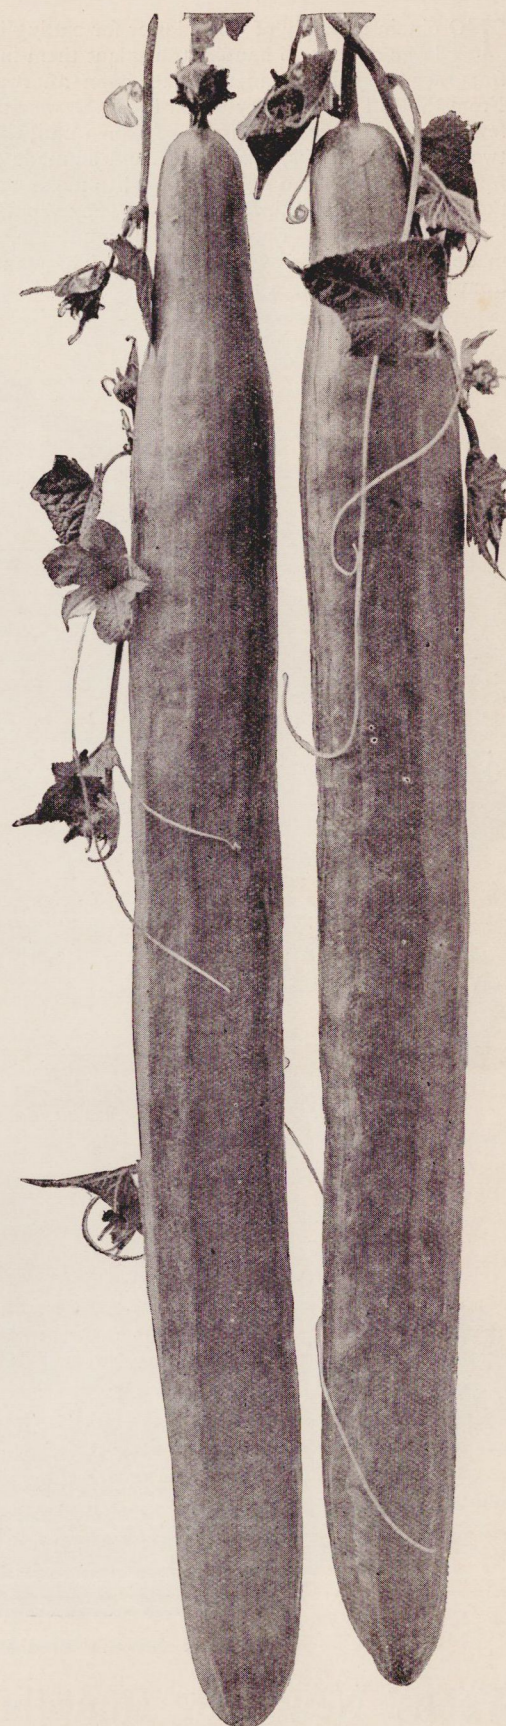

FRENCH, *Concombre*.

SOW during May in rich sandy soil, leaving a space of three feet between the plants each way, and when they appear protect at night if there should be any danger of frost. Sow also in heat in April, grow on in pots, gradually harden off, and plant out in June.

Webbs' Prolific Ridge.—The largest and best variety for outdoor cultivation. A very hardy and remarkably prolific Cucumber; it grows straight and smooth, and is unequalled for market garden purposes.

6d. and 1s. per packet.

WEBBS' BOUNTIFUL CUCUMBER.

1s. 6d. and 2s. 6d. per packet. See above.

CAULIFLOWER.

(*Brassica oleracea botrytis cauliflora.*) FRENCH, *Chou-fleur.*

TO obtain a supply of Cauliflower for cutting in May and June, the seeds should be sown in August. As soon as the seedlings get large enough to handle, transplant them into a rich piece of ground, and about the middle of October transplant again into a cold frame, or in such a manner that they can afterwards be covered with one or other of the several forms of plant-protectors now in use. From the end of February onwards, if the weather is favourable, the plants should be carefully lifted and put out under hand-lights, a few at a time, where they must be grown until they get too large for these protectors, and safe from frost. To afford a supply in the two following months, a sowing should be made on a half-spent hot-bed in February. The seedlings must be transplanted into a cold frame, where they can be encouraged to make a steady growth. These will be ready for transplanting, at intervals of a few days, from the end of April and through May. They should be transplanted on to a south border at a distance apart of from two feet to two and a half feet each way. For the early autumn crop, sow in the open air early in April; and to succeed these again, a final sowing must be made about the third week in May. The plants from the April sowing will be ready for transplanting at the end of June, and those from the May sowing a month later. In all cases heavily manured soil is necessary for their successful cultivation.

WEBBS' NEW LATE GUARDIAN CAULIFLOWER. 1s. 6d. and 2s. 6d. per packet. See below.

Webbs' New Late Guardian.—This is quite a new variety, and is remarkable for the large size of its heads, combined with excellent shape, robust habit, and its lateness. When well cultivated, the heads attain enormous proportions, and it is one of the best kinds ever introduced for general purposes.—(See *Illustration above.*)

NOVELTY. 

1s. 6d. and 2s. 6d. per packet.

CAULIFLOWER—continued.

WEBBS' EARLY MAMMOTH CAULIFLOWER. 1s. 6d. and 2s. 6d. per packet See below.

Webbs' Early Mammoth.

This splendid Cauliflower maintains its character as the finest variety for general use. The plant is of dwarf and compact habit of growth, with a short stem and small leaves, and its firm, snowy white heads are larger than any other sort in cultivation. It is highly popular on account of its unequalled cooking qualities, and its special adaptation for exhibition purposes.—(See *Illustration above*.)

1s. 6d. and 2s. 6d. per packet.

'I received a score of Cauliflower plants (Webbs' Early Mammoth) from a friend last year, and have cut heads weighing 8 to 9 lbs. when trimmed.'—Mr. J. MORGAN, Saltley.

'I must say that your Early Mammoth Cauliflower is the best I ever grew. I took the Champion Prize in the open class at our Show, and also the First in a collection in another class. I took several other prizes.'—Mr. E. W. SMITH, *Gardener to* J. H. BLETCHER, Esq., Worlaby.

'I never cut so many fine heads as I did from Webbs' Early Mammoth Cauliflower this year. It is one of the finest varieties for general use.'—Mr. T. MULLINS, *Gardener to* R. GOODBODY, Esq., Clara House, Ireland.

Webbs' Autumn Queen.

A grand variety, coming into use in the latter part of the summer and early autumn. The heads are very large, close, beautifully white, and when cooked are free from any strong flavour. It also makes a splendid variety for exhibition purposes.—(See *Illustration, page 26*.) 6d. and 1s. per packet; 2s. per ounce.

'Your seeds did excellently right through. Some of your Brussels Sprouts are like small Cabbages, and yet delicate in flavour and good to resist frost.'—A. E. CHAMBERS, Esq., Downton Lodge.

Webbs' New Early Frame.

The best for forcing. This is a valuable new variety for forcing indoors, and if sown early it will come in long before any other kind. It is of dwarf habit, producing small compact heads with few leaves.

1s. 6d. and 2s. 6d. per packet.

'I have been pleased with your Early Frame Cauliflower. I never grew a cauliflower that came in use so quickly, and shall certainly never be without it again.'—Mr. G. ILLSON, *Gardener to* J. S. DICKINSON, Esq., Kibworth House.

Webbs' Peerless.

This handsome new variety comes into use immediately after Webbs' Tom Thumb, and for consumption between the first early and late varieties it is most invaluable. The plant is of dwarf habit of growth, and the heads—which are well protected—are large, firm, pure white, and of the finest quality when cooked.—(See *Illustration, page 26*.)

1s. 6d. and 2s. 6d. per packet.

'Webbs' Peerless Cauliflower has done remarkably well.'—Mr. EDWIN CURRY, Skipton Bridge.

Webbs' Tom Thumb.

A very short-growing Cauliflower, with solid, pure white heads, which is specially recommended for the first crop, and is exceedingly valuable for frames and forcing purposes. It can be planted closer, and will come into use earlier than any other sort.

1s. per packet; 2s. 6d. per ounce.

CAULIFLOWER—continued.

Webbs' Kinver Monarch.

A fine early variety. A valuable Cauliflower, coming into use immediately in advance of Webbs' Early Mammoth. It is of strong constitution, and the heads are very firm, compact, of snowy whiteness, and the finest quality.—(See *Illustration below.*) 1s. per packet; 2s. 6d. per ounce.

Veitch's Autumn Giant.—A very distinct variety with large white heads; valuable for exhibition purposes . . . 6d. and 1s. per packet s. d.
2 0

Snowball. A fine early variety 1s. 6d. per packet

Lenormand's Extra Large.—A very superior second early variety, with large close heads; pure white 6d. and 1s. per packet 2 0

Walcheren.—Heads large and compact; valuable for early use . . . 6d. and 1s. per packet 1 6

Eclipse.—Valuable for autumn use 1s. per packet

Early Dwarf Erfurt.—Extra fine and remarkably early; firm white heads 6d. and 1s. per packet 2 0

Large Italian.—A splendid variety; most useful to grow with Veitch's Autumn Giant for succession 6d. and 1s. per packet 1 9

Stadtholder, or Giant.—A very fine late variety; close, compact heads . . . 6d. and 1s. per packet 2 0

Early London.—Fine white heads 6d. and 1s. per packet 1 9

WEBBS' COLLECTIONS OF CAULIFLOWER.

These Collections contain choice varieties to produce a continuous supply.

Four ounces of the best kinds for succession, 4 s. d.
sorts (*our selection*) 6 6

Four packets of the best kinds for succession, 4
sorts (*our selection*) 3 0

'With pleasure I write and inform you that I won First Prize for a collection of vegetables at York, it being my first attempt at exhibiting.'—Mr. A. R. SEARLE, The Gardens, Castle Ashby.

WEBBS' KINVER MONARCH CAULIFLOWER.
1s. per packet; 2s. 6d. per ounce. See above.

WEBBS' AUTUMN QUEEN CAULIFLOWER.
6d. and 1s. per packet; 2s. per ounce. See page 25.

WEBBS' PEERLESS CAULIFLOWER.
1s. 6d. and 2s. 6d. per packet. See page 25.

'The Seed I had from you last year did splendidly. I cannot speak too highly of your Early Autumn Mammoth Cauliflower. I find it the best for market or exhibition purposes, and I took several first prizes in open competition.'—Mr. F. J. BARRETT, Tan House Gardens.

'I have been cutting your Early Cauliflower since the 2nd of June, and also picking your early Peas since the 14th of June. I have the finest heads of Cauliflower I ever saw.'—Mr. F. BOOKER, Gardener to H. MEREDITH, Esq., The Paddocks.

'Your Mammoth Cauliflower and May Queen Broccoli are the best, by far, that have come under my notice.'—Mr. JOHN SPRAGGAN, Gardener to HENRY H. COCHRANE, Esq., Eshwood Hall.

'The Carrot Seed you supplied to me last year did uncommonly well, I think every seed must have grown. I had an abnormal crop.'—Mr. RALPH M. KEEN, Barley Croft.

'The Seeds I had from you have given me great satisfaction. I took First Prize for 6 varieties of Vegetables at the Handsworth Horticultural Show with the produce of same.'—Mr. THOS. FAULKNER, Gardener to J. H. PEARSON, Esq., Farcroft.

'I cannot speak too highly of your Early Mammoth Cauliflower; it was the best of anything I had last year.'—Mr. T. VICKERS, Well Vale, Alford.

'Monster Cauliflowers.—"J. G." Ruabon, writes: I grew three Cauliflowers, called Webbs' Kinver Monarch, weighing 9 lbs. each, after the leaves were cut level with the hearts. My plants were grown in a clay soil, in an allotment garden.'—'AMATEUR GARDENING.'

CARROT.

(*Daucus carota*.)

FRENCH, *Carot*.

FOR early use a sowing of Short Horn Carrot should be made at the end of March, and for the second or main crop any of the varieties may be sown at the end of April. The sowings in all cases should be made in rows about a foot apart, and not more than an inch in depth; and to render the operation of sowing more easy, it will be found a great advantage to well mix the seeds with sand.

Webbs' New Carrot "Wonderful."

This new forcing Carrot grows to an average of four to six inches in length; it is very clean in growth and of splendid quality and colour. A valuable introduction alike for the table in summer and for early exhibition work. **1s. 3d. per ounce.**

'I have just lifted a splendid bed of Webbs' New Wonderful Carrot, perfect in shape and of excellent quality.'—Mr. H. J. TOWELL, *Gardener to the Rt. Hon. EARL LOVELACE, Ockham Park.*

Webbs' Defiance Intermediate.

The best Carrot for general use. A very select variety of this favourite vegetable, which is specially adapted for growing in shallow soils. It is of beautiful shape, rich colour, and remarkably sweet and tender; valuable for exhibition purposes. **10d. per ounce.**

WEBBS' NEW STANDARD CARROT. 1s. 3d. per ounce. See annexed.

WEBBS' MARKET FAVOURITE CARROT.

1s. per ounce. See below.

Webbs' Market Favourite.

A remarkably handsome variety, indispensable for early use, and a splendid keeper. It is of exceedingly rapid growth, and produces very thick, beautifully-shaped roots about six inches long, which are of rich colour and fine quality.—(See *Illustration above*) **1s. per ounce.**

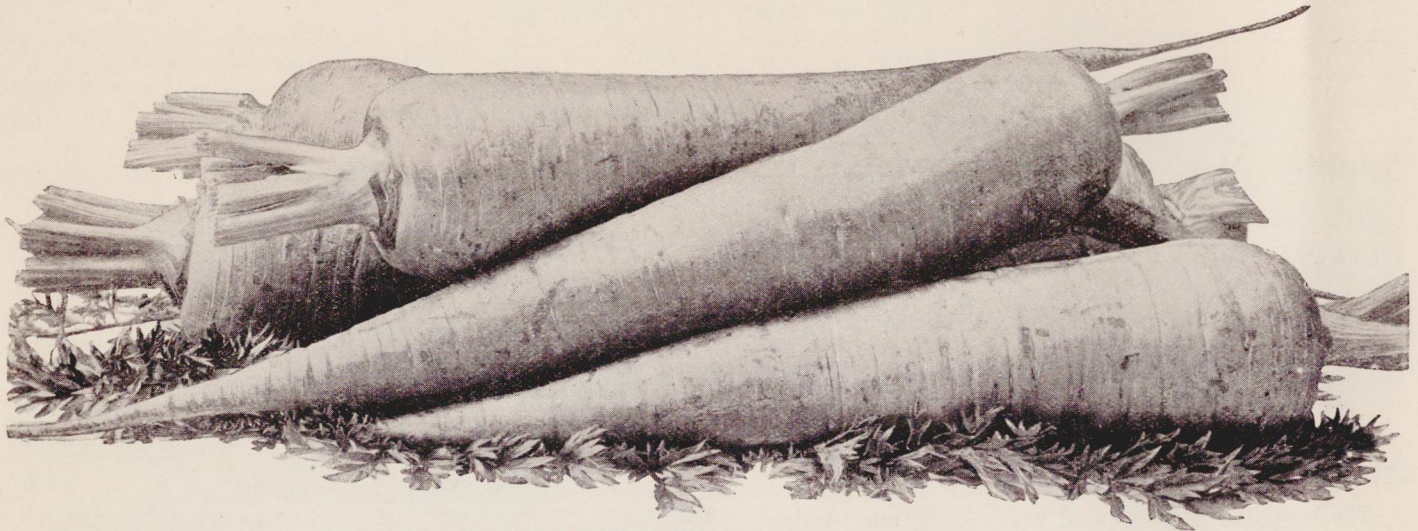

'I took First Prizes with your Prizewinner and Market Favourite Carrots, besides several Prizes for other Seeds I had of you.'—Mr. F. ROBINSON, *Hall Cottage.*

Webbs' New Standard.

A valuable new stump-rooted variety, early, and of very fine quality, adapted for either market gardening or private use. The roots, which attain an average length of about six inches, are straight, clean-growing, and of handsome appearance.—(See *Illustration annexed.*) **1s. 3d. per ounce.**

'I am pleased to tell you I have done exceedingly well with your Seeds during the past five years. I have three First Prizes for collections of vegetables this year and also three Firsts with your Prizewinner Carrot—the best I ever grew.'—Mr. J. LARCOMBE, *Gardener to J. R. F. G. TALBOT, Esq., Rhode Hill.*

CARROT—continued.

WEBBS' PRIZEWINNER CARROT. 1s. per ounce. See below.

Webbs' Prizewinner.—The roots of this novelty are of bright red colour, very long, and of most excellent quality. It is also specially suitable for exhibition purposes, owing to its large size and symmetrical shape.—(See Illustration above.)
1s. per ounce.

Webbs' Selected Altringham.—Extra fine stock. A large and most excellent Carrot, which possesses the sweet and crisp qualities of the Early Horn, and is a general favourite for winter use. Awarded First Prizes at the leading Shows of the Kingdom.
8d. per ounce.

Webbs' Selected Scarlet Short Horn.—This is an entirely new selection and a valuable acquisition, being of medium size, beautiful colour, remarkably tender, and excellent for either outdoor cultivation or forcing purposes.
1s. per ounce.

'All the Seeds I had from you last season turned out very well. I am pleased to say that I took First Prize with Webbs' Hollow Crown Parsnip, and First Prize with Webbs' Market Favourite Carrot at Crabbs Cross Show.'—Mr. DANIEL DIBBLE, Astwood Bank.

	Per ounce.	s.	d.
Early French Nantes. —Strongly recommended for early use and exhibition purposes		8	
James' Scarlet. —Large-sized roots, of excellent flavour and rich colour		8	
Early French Forcing Short Horn. —A short-rooted variety; invaluable for forcing	1	0	
Long Orange. —A useful sort		4	
Early Scarlet Horn		8	
Long Red Surrey. —A valuable variety for deep soils		6

'Your Prizewinner Carrot is the best I have ever met with, the Carrots being as good to-day as ever they were, and that notwithstanding last summer's drought.'—Rev. J. G. LANE, The Rectory, Over Whitacre.

CHOU DE BURGHLEY.

(*Brassica oleracea* var. *superba*.) FRENCH, *Chou de Burghley*.

THIS vegetable has the outward appearance of a Cabbage, but from which it differs in having a miniature Broccoli enveloped in the leaves. It is perfectly hardy, and remarkably tender, sweet, and delicate in flavour when cooked. Sow in March for an autumn supply, and in May for the spring crop.
1s. per ounce.

CARDOON.

(*Cynara cardunculus*.) FRENCH, *Cardon*.

SOW on a slight hot-bed in February for an early crop, and in May for a late one. Transplant into prepared trenches, and treat in the same manner as Celery.

Large Spanish.—Grown for the mid-rib of the leaf, which is blanched like Celery 1s. per ounce.

Couve Tronchuda, or Portugal Cabbage.

(*Brassica oleracea costata*.) FRENCH, *Chou Pomme*.

THIS plant prefers a rich soil, but being tender, must be sown in a little heat in February or March, grown on in a frame, and hardened off for planting out at the end of May under the same conditions as the Cauliflower. The heart of the plant can be used in the same manner as the Cabbage, and the ribs of the largest leaves will be found an excellent substitute for Sea Kale, if served up in a similar way.
1s. per ounce.

CORN SALAD, ITALIAN.

(Lamb's Lettuce.)

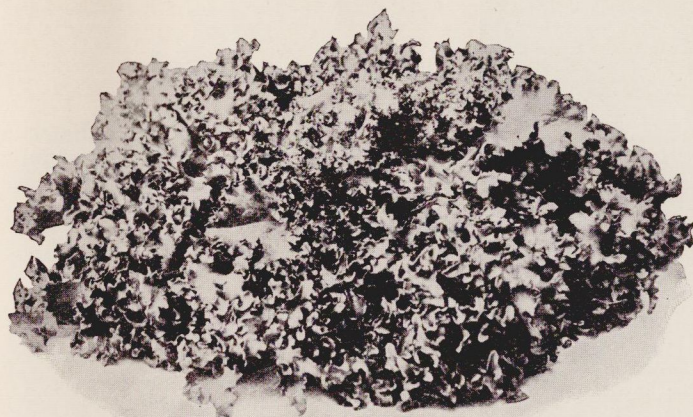

A hardy, useful salad 9d. per ounce.

IF grown quickly, the Endive will be crisp, succulent, and good. Make the first sowing about the second week in April, and subsequently about once a month until July, or the middle of August for the latest batch. The earliest sowings should be made on a warm south border; and when the plants are large enough to handle, transplant them on to a rich piece of ground in rows, say a foot apart.

Webbs' New White Heart.

A fine, broad-leaved variety, hardy in growth, and distinct in character. It is exceedingly sweet and crisp, blanches well, and is adapted for either summer or winter use.—(See *Illustration below.*)

1s. per packet; 1s. 6d. per ounce.

WEBBS' NEW WHITE HEART ENDIVE.

1s. per packet; 1s. 6d. per ounce. See above.

Sunflower Seed, for poultry, s. d.
per pound, 1 6

KOHL RABI.

(*Brassica oleracea caulorapa.*) FRENCH, *Chou-rave.*

KOHL RABI likes a good, well-enriched soil, and may be sown from April to July. Sow thinly in rows four inches apart, and as soon as the young plants have attained a height of two inches or so, transplant carefully into rows about fifteen inches asunder, and at eight inches apart in the rows.

Early Vienna.—Green; delicious if cooked when young.

1s. per packet; 1s. 6d. per ounce.

Early Purple.—Differs from the Vienna only in colour.

1s. per packet; 1s. 6d. per ounce.

LEEK.

(*Allium Porrum.*)

FRENCH, *Poireau.*

WEBBS' NEW CHAMPION PRIZE LEEK. 1s. 6d. and 2s. 6d. per packet. See below.

SOW from the middle of February to the middle of March in rows about six inches apart, and subsequently thin out a little where they come up too thickly. Keep them well watered in the seed-bed, and transplant in the beginning of May from the earliest sowing, and for the main crop in June. The ground must be good, and it is almost impossible to give them too much liquid manure.

Webbs' Colossal.

A very choice variety, rapid in growth, and extremely hardy. It is of splendid quality, and being of immense size and superior shape, is specially suitable for exhibition purposes.

1s. and 1s. 6d. per packet.

'Your Vegetable Seeds have all done excellently notwithstanding the drought.'—ENNIS DUNDAS CHAMBERS, Esq., Downton Lodge.

'Your Colossal Leeks were the finest I ever had, and the admiration of all who saw them.'—R. RATCLIFFE, Esq., The Poplars.

'We have grown your Commander Cucumber 2 feet long and 10 inches round.'—Mr. G. GREEN, The Gardens, Glenelg.

'Your Stourbridge Gem Cucumber is a splendid variety; I have had fruit 20 inches long.'—Mr. C. DRULLER, Oldswinford Castle Gardens.

'I won the First Prize with Webbs' Stourbridge Gem Cucumber at Tiverton (Bath) Show.'—Mr. T. JENKINS, Tiverton-on-Avon.

'The Seeds supplied by you have all done exceedingly well. I obtained First Prize at our Show for Webbs' Universal Cucumber in a keen competition.'—Mr. F. CORBY, Empingham.

'You will notice that I took First Prize with your Prizewinner Carrot, and I also took several other prizes with the produce of your seeds.'—Mr. H. CASE, Coventry.

'Your Seeds cannot be beaten for being true, and I cannot praise them too much.'—Mr. E. L. SKINNER, Tardebigge.

'We had a grand lot of Lettuce.—beautiful hearts crisp and sweet,—standing winter well.'—Mr. JAS. KERSLEY, Gardener to S. DARLING, Esq., Beckhampton House.

'It is now about 30 years since I first made the seed order out to your firm, and I might say that I have always been pleased with the results of everything I have had from you. I hope I may for many years to come still be able to say the same.'—Mr. GEO. MERRY, The Ashe Gardens, Etwell.

Webbs' New Champion Prize.

The best Leek. Too much cannot be said in favour of this new variety, as we have had it under careful trial for several years, and have the utmost confidence in recommending it. The stems, which are long, thick, and pure white, will be found invaluable for exhibition purposes, whilst its mild and agreeable flavour will render it a favourite on the table.—(See Illustration above.)

The Lyon.—A fine variety . 1s. and 1s. 6d. per packet.

Large Rouen.—Leaves broad 1s. per packet.

London Flag.—A well-known sort 6

LETTUCE—CABBAGE.

(*Lactuca sativa*.) FRENCH, *Laitue*.

FOR the earliest spring supply of Lettuce, a sowing should be made in August, on a warm site, and the young plants protected during winter from damp and frost. By these means a nice stock of Lettuce will be ready for transplanting as soon in February as the weather is favourable. The first sowing in spring should be early in March, and, to secure a constant succession, other sowings must be made about once a month until June. The seeds should always be sown broadcast on an open border, where the soil is tolerably light, and raked fine on the surface. From the time the seed is sown until the Lettuce are cut for the table they should never be allowed to become dry at the roots. Liquid manure may also be applied during the summer.

WEBBS' WONDERFUL LETTUCE. 6d. and 1s. per packet; 2s. 6d. per ounce. See below.

Webbs' New Lettuce— "Forcing Gem."

For forcing and early use this new variety will be found invaluable. It comes quickly to maturity, and produces nice compact hearts of excellent quality.

1s. per packet; 2s. 6d. per ounce.

'The Seeds you supplied me with have given great satisfaction, not a single failure amongst them; I never had a better lot of Lettuce; in fact everyone says they never saw finer in size and quality.'—Mr. G. H. PARRATT, The Gardens, Bradgate Park.

Webbs' Paragon.

A compact-growing new variety, with smooth, light green leaves. It stands a long time without running to seed, and forms large solid heads, which are remarkably crisp and tender.

6d. and 1s. per packet; 2s. per ounce.

'I beg to inform you that your Seeds have turned out grandly, beating anything I have ever had from any other firm.'—Mr. W. CURTIS, Knapp.

'I enclose my Gardener's order for Seeds. I still buy none but yours, and know of none to beat them.'—T. J. F. HASKOLL, Esq., Brandon House

Webbs' New Delicacy.

This splendid new variety grows to a medium size, is dark in colour, and produces firm, compact-growing heads which are very crisp, whilst the flavour will please the most fastidious taste. It is a variety that is not liable to run to seed.

NOVELTY. 1s. per packet; 2s. 6d. per ounce.

1s. per packet; 2s. 6d. per ounce.

'The Seeds you supplied me with have done exceedingly well. I have had some beautiful Lettuce, both Cos and Cabbage and also Peas. I picked from your Kinver Gem Pea quite 2 weeks before any one about here.'—Mr. WM. CARTER, Gardener to C. E. ASHFIELD, Esq., Hazelhurst.

Webbs' Wonderful.

Among the numerous new varieties recently introduced, we are confident that this Lettuce will take a leading place. Webbs' Wonderful produces solid and compact hearts of large size and beautiful quality: it stands a long time before running to seed.—See Illustration above.)

6d. and 1s. per packet; 2s. 6d. per ounce.

'I cannot speak too highly of the produce of your Seeds. I have Kinver Mammoth Broad Beans 12 inches long containing 9 beans, which is about the best ever seen around here. The Beans are perfectly straight.'—Mr. J. R. DYER, Buckfastleigh.

LETTUCE—CABBAGE—*continued.*

WEBBS' GREAT-HEART LETTUCE.

6d. and 1s. per packet ; 2s. 6d. per ounce. See below.

Webbs' Great-Heart.

An exceedingly large and handsome new variety ; being slow in running to seed, it stands fit for use longer than most other varieties. The hearts are large, solid, crisp, and of excellent flavour.—(See *Illustration above.*)

6d. and 1s. per packet ; 2s. 6d. per ounce.

'Great-Heart is a famous Lettuce. It is enormously productive, the hearts are firm and crisp, and it keeps in good condition for a very long time.'—*THE GARDENERS' MAGAZINE.*

Webbs' Model.

A desirable variety, of dwarf and compact habit of growth, having light green leaves which are slightly tinged with red. The hearts are of good size, remarkably firm, crisp, and of sweet flavour. Valuable for small gardens.

6d. and 1s. per packet ; 2s. 6d. per ounce.

'Webbs' New Wonderful Cabbage Lettuce is the best I have ever grown ; it has good solid heads and is very crisp.'—Mr. J. MURBY, The Gardens, Forest Grove.

Webbs' Selected Tom Thumb.

6d. and 1s. per packet ; 1s. 6d. per ounce.

Webbs' Immense Hardy Green.—The best Winter Lettuce.

This splendid variety is extremely hardy, of beautiful colour, superior flavour, and very compact.

6d. and 1s. per packet ; 2s. per ounce.

Early Paris Market.—Specially adapted for sowing early in spring on a warm border ; invaluable for forcing purposes.

6d. and 1s. per packet.

Drumhead, or Malta.—Large and crisp ; one of the best for summer use 9

Commodore Nutt.—Small, and remarkably early ; of dark green colour, compact habit . . . 1s. per packet, 2 6

All the Year Round.—May be used all the year round if sown at different times . . . 6d. and 1s. per packet, 1 6

Stanstead Park.—For autumn sowing 8

WEBBS' SUMMERHILL LETTUCE.

6d. and 1s. per packet ; 2s. 6d. per ounce. See below.

Webbs' Summerhill.

A splendid and distinct Cabbage Lettuce—one of the very best for summer use. It grows to a large size, is of handsome shape, and remarkably compact ; it folds in quickly, is exceedingly crisp, of delicious flavour, and does not readily run to seed. This Lettuce should be grown by every one.—(See *Illustration above.*)

6d. and 1s. per packet ; 2s. 6d. per ounce.

'I consider your Summerhill Lettuce a splendid variety, it is both handsome, crisp, and tender, and for a long-standing lettuce it would be hard to beat.'—Mr. WM. H. CONWAY, The Gardens, Hawley House.

Webbs' Criterion.

This choice Lettuce is very large in size, of handsome shape, and stands a long time before running to seed. Its smooth, light green leaves fold in quickly, and form solid hearts, which are exceedingly sweet and tender.

6d. and 1s. per packet ; 2s. 6d. per ounce.

Webbs' Magnet.

A handsome Cabbage Lettuce suitable for either summer or winter cultivation. The heads are very solid, extremely tender, delicate in flavour, and remain in season a long time.

6d. and 1s. per packet ; 2s. 6d. per ounce.

Webbs' Improved Drumhead.—An improved type of the old Drumhead 1 0

Continuity.—A long-standing variety . . . 1s. per packet.

Victoria, or Red-Edged 6d. per packet, 9

Hammersmith Hardy Green.—A winter kind 10

Grand Admiral.—For winter use . . . 6d. per packet, 10

Tom Thumb, or Tennis Ball.—Ordinary stock . . . 6d. per packet, 1 0

Neapolitan.—Hearts well 6d. per packet, 10

Mixed Cabbage Varieties 9

'I cannot speak too highly of your Immense Hardy Green Cabbage Lettuce. It is the only one that has stood through the winter ; all the others are a complete failure. I am now cutting splendid ones of the Immense Hardy Green.'—Mr. F. EASTERFIELD, The Gardens, Ivy House.

LETTUCE—COS.

(*Lactuca sativa.*) FRENCH, *Laitue.*

Webbs' New Ideal.

We have much pleasure in introducing this new Cos Lettuce, as from repeated trials with other varieties we are convinced that it is a most desirable acquisition. **NOVELTY.** Growing to a medium size, it produces very firm heads, which are crisp, of beautiful green colour, and it has a most distinct self-folding habit.—(See *Illustration annexed.*)

1s. per packet ; 2s. 6d. per ounce.

Webbs' Exhibition.

A superb variety of strong but compact growth, standing a long time fit for cutting before running to seed. The heads, which require no tying, are of immense size, solid, crisp, and of the finest quality. This Lettuce is adapted for exhibition or for table use.—(See *Illustration below.*)

6d. and 1s. per packet ; 2s. 6d. per ounce.

'I consider your Exhibition the best Cos Lettuce grown for private use or show.'—MR. GEO. MERRY, The Ashe Gardens.

'I grew Webbs' Exhibition Cos Lettuce in a batch of about 100 equal to the photograph in your catalogue.'—MR. J. MURBY, The Gardens, Forest Grove.

'I took First Prize two years in succession with your Exhibition Lettuce, and First Prize with the Great Heart last year.'—MR. D. WRIGHT, Ivo Villas.

Webbs' Wordsley Gem.

This valuable variety comes into use far in advance of all other kinds of Cos Lettuce. It is of medium size, exceedingly crisp, of the finest flavour, and suitable for either summer or winter cultivation. 6d. and 1s. per packet ; 2s. 6d. per ounce.

'The Summerhill and Exhibition Cos Lettuce Seed I had of you last year turned out grand. I grew Summerhill like Cabbage, every leaf being good for salad, and I never knew Lettuce so crisp.'—MR. FRANCIS SENDELL, Old Vicarage Gardens.

WEBBS' EXHIBITION COS LETTUCE.

6d. and 1s. per packet ; 2s. 6d. per ounce. See above.

WEBBS' NEW IDEAL LETTUCE.

1s. per packet ; 2s. 6d. per ounce. See above.

Webbs' New Winter Green Cos.

Although this fine new Lettuce grows to a large size, it has the merit of being crisp and of excellent **NOVELTY.** flavour. It is very hardy, and suitable for autumn sowing, and will stand the ordeal of severe weather.

6d. and 1s. per packet ; 1s. 6d. per ounce.

'I took First Prize at Craven Arms Show with your Cos Lettuce, each weighing 3½ lbs. They were the best in the Show.'—MR. S. J. WOOD, Onibury.

'Your Lettuce is by far the best I ever grew.'—MR. F. J. THORNE, Gardener to J. G. MACKENZIE, Esq., Sunningdale Park.

Webbs' Monstrous White.

This variety grows to an enormous size ; it is very solid, turns in well, is remarkably crisp, and of extra fine flavour. The length of time it remains without running to seed, together with its other good qualities, renders it exceedingly valuable for summer cultivation.

6d. and 1s. per packet ; 2s. 6d. per ounce.

'I had a few plants of your Monstrous Cos Lettuce given me ; result : Lettuce 4½ lbs. each, not one or two but scores. It is marvellous for turning in quickly.'—WILLIAM D. BASON, Esq., Oakville.

'I received the splendid Collection of Vegetable and Flower Seeds, and only hope they will turn out as satisfactory as those of last year, when I don't think one seed missed.'—MR. S. M. HEALEY, Master, Winchcomb Union.

Webbs' Winter White.

The heads of this handsome Lettuce are very large, crisp, and sweet. It is a fine variety for summer use, and being exceedingly hardy, is also specially suitable for autumn sowing, as it stands the severest winter without protection.—(See *Illustration, page 34.*)

6d. and 1s. per packet ; 2s. per ounce.

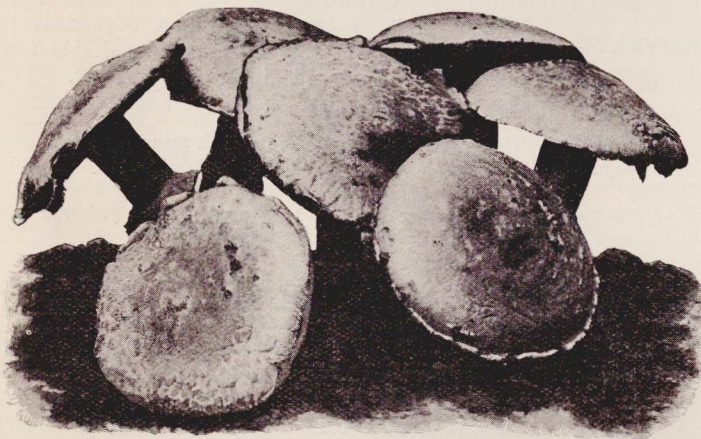

'I have always found your Seeds of an excellent character, some especially so—for example, your Mainstay and Stourbridge Marrow Pea, Kinver Monarch Cauliflower, First of All Cabbage, Prizewinner Carrot, Banbury Onion, Viceroy Tomato, and many other kinds are unsurpassed, both for general and exhibition purposes.'—MR. W. L. BASTIN, Head Gardener to Sir ALEXANDER HENDERSON, Bart., Buscot Park Gardens.

'All the Seeds you supplied me with last year did wonderfully well ; not one failure.'—F. DANIEL, Esq., Boughton Lodge.

LETTUCE—COS—*continued.*

WEBBS' WINTER WHITE COS LETTUCE.

MUSTARD.

(*Sinapis alba* and *Sinapis nigra*.) FRENCH, *Moutarde*.

White.—Used generally for salads.

2s. per quart, 1s. 3d. per pint, 3d. per ounce.

Chinese.—Very distinct, black-seeded, fine pungent flavour.

2s. per pint, 4d. per ounce.

MUSHROOM.

(*Agaricus campestris*.) FRENCH, *Frai de Champignon*.

MUSHROOMS can be grown in any cool, shady situation out of doors in the summer-time, and during the winter months in any outhouse, shed, or cellar where the temperature does not fall below 45°, and is tolerably uniform. Where such conditions are at hand, proceed as follows:—Collect the fresh horse-droppings from the stable every day, shake out the greater bulk of the straw, and spread the remainder, not too thinly, over a floor in any shed where the rain is kept out. Commence to make the bed by putting in the droppings regularly and lightly in layers until the mass is about two feet deep. Then compress firmly to the depth of about twelve inches, when a test-peg should be inserted to ascertain the temperature. Examine the peg every morning, and as soon as the heat is found to be on the wane insert pieces of spawn about the size of a walnut, at intervals of three or four inches apart, and just below the surface of the dung. Cover the bed with about three inches of good loam, and beat firmly with the back of a spade. Keep the test-peg inserted to see that the temperature does not fall too low; if there should be any signs of this, cover the bed with hay to the depth of three or four inches. In about six weeks' time the Mushrooms should begin to show, and if the bed is getting dry give a watering with warm water, which will probably be required afterwards about once a fortnight, as success depends on maintaining a uniform temperature.

Webbs' Mushroom Spawn (Fresh).—The very best quality; specially prepared for us. **5s. 6d.** per bushel of **16** cakes; **1s. 6d.** per peck of **4** cakes. **1** cake **6d.**

MELON.

(*Cucumis Melo.*)

FRENCH, *Melon.*

FOR the earliest crop sow about 20th of January, singly, in small pots only half filled with a light compost, then plunge in bottom-heat. As the plants advance in growth, the remaining space in the pots must be filled up with soil, and the check caused by re-potting at this early stage is thus avoided. Melons can be very successfully grown and fruited in pots, and the advantages of this method consists in having the plants more under control. The fruiting-pots must be plunged in leaves or dung, or a mixture of both, when the seedlings are ready for planting out. Fill them with good, strong, turfy loam, inclining to a clayey nature, if procurable, and when planting, see that the base of the stem is raised two or three inches above the rim of the pot. The temperature of the heating materials round the pots should be from 70° to 80°; the plants must be well watched for insects, and carefully attended to in giving air, watering, and syringing. Train the main shoot the length of the trellis, and then pinch off its point to induce the growth of laterals, on which the fruit will make its appearance. When a sufficient number of flowers are open at the same time, they may be fertilised. Half a dozen fruit may generally suffice for one plant to carry. While the flowers are being set, the atmosphere of the house and the roots should be kept a little drier, but as soon as the fruit commences to swell, watering must be attended to as before. When the fruit is three-parts swelled, it must be carefully watched. Too much water given at this stage will cause it to split; therefore, as soon as signs of cracking appear round the stalk, water may be entirely withheld; and if a little air is admitted to the house every night, the flavour of the fruit will be improved. Successful cultivation depends greatly upon the regularity of the heat employed.

WEBBS' NEW MELON—"EPICURE." 1s. 6d. and 2s. 6d. per packet. See below.

New Green-fleshed Melon— Webbs' Favourite.

1s. 6d. and 2s. 6d. per packet.

New Scarlet-fleshed Melon— Webbs' Epicure.

1s. 6d. and 2s. 6d. per packet.

We had every confidence in introducing these two new Melons, as we were convinced that they would give every satisfaction, and we are pleased to say that this has been fully justified. They are both of vigorous growth, free setters, and exceptionally heavy fruiters, whilst the flesh, which is very deep, is most luscious and melting. The rind is thin, netting superb, and they are strongly recommended for exhibition purposes.

'Your New Favourite Melon has done remarkably well, and has been greatly admired. I cut one fruit off a plant that bore four and it turned the scale at 7 lbs. The flavour was delicious.'—Mr. C. COX, The Gardens, Weald Hall.

'Your Melon is a very desirable variety. I grew it along with six other kinds, and found it to be the best. It is a sure setter, of very superior flavour, and the most handsome Melon I ever saw.'—Mr. E. MERRICK, Gardener to R. A. COCKBURN, Esq., Fetcham Lodge.

MELON—continued.

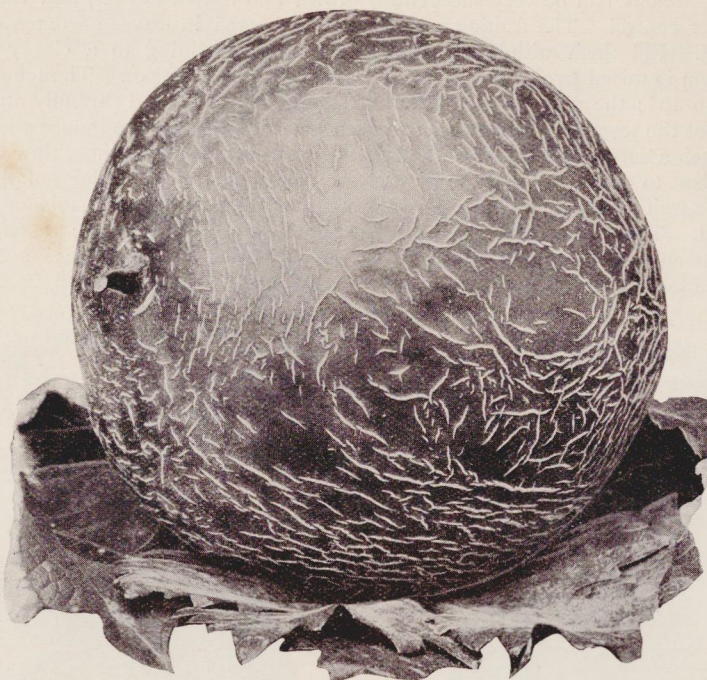

Webbs' Pride of Stourbridge.

This magnificent Melon has become exceedingly popular, as it is distinct from, and superior to all other scarlet-fleshed varieties in cultivation. The fruit is regularly and beautifully netted, and the flesh is of great depth, exceedingly tender, melting, and of the richest flavour. It is a remarkably free setter, of robust constitution, very productive, and unequalled for its handsome form and splendid quality. It is specially adapted for exhibition purposes.—(See *Illustration annexed.*)

1s. 6d. and 2s. 6d. per packet.

'Journal of Horticulture.'—
'Two splendid Melons for planting now are Webbs' Pride of Stourbridge and Webbs' Masterpiece. Having grown them both, I can recommend them as first-class.'—GEO. MERRY, The Ashe Gardens, Etwell.

'Pride of Stourbridge Melon produced excellent results, and your Purity Primula is unsurpassed. My order again this year is the best proof of the quality of your Seeds.'—MR. W. ELLIOTT, Blyth Hall Gardens.

WEBBS' PRIDE OF STOURBRIDGE MELON.

1s. 6d. and 2s. 6d. per packet. See above.

Webbs' Royal Warrant.

A very early variety, perfectly distinct, of hardy constitution, a free setter, and remarkably productive. The fruit is of medium size, round and uniform in shape, with bright orange-coloured skin, which is very thickly and beautifully netted, whilst its yellowish white flesh is very firm, fine in texture, and of exquisite flavour.—(See *Illustration below.*) 1s. 6d. and 2s. 6d. per packet.

WEBBS' ROYAL WARRANT MELON.

1s. 6d. and 2s. 6d. per packet. See above.

Webbs' New International.

A cross between President and Hero of Lockinge. The fruit is somewhat oval in shape, with dark yellow skin, which is handsomely netted. Under ordinary cultivation, on heavily cropped plants, the usual weight of each fruit is from 3 to 4 pounds; under special culture, however, they may be grown to 6 or 7 pounds in weight. The flesh, which is pale green, is exceedingly deep and of most delicious flavour.

1s. 6d. and 2s. 6d. per packet.

'Webbs' Royal Warrant Melon was of medium size, beautifully netted, and a free setter, with pale flesh of delicious flavour.'—MR. W. WILLETT, *Gardener to Captain HELME, Bishopstrow House.*

'Webbs' New International Melon is a grand variety; it is of excellent flavour, very handsomely netted, and is also a very free setter—a most desirable variety in every way.'—MR. W. PRIOR, *The Gardens, Maesfen.*

Webbs' Queen Victoria.

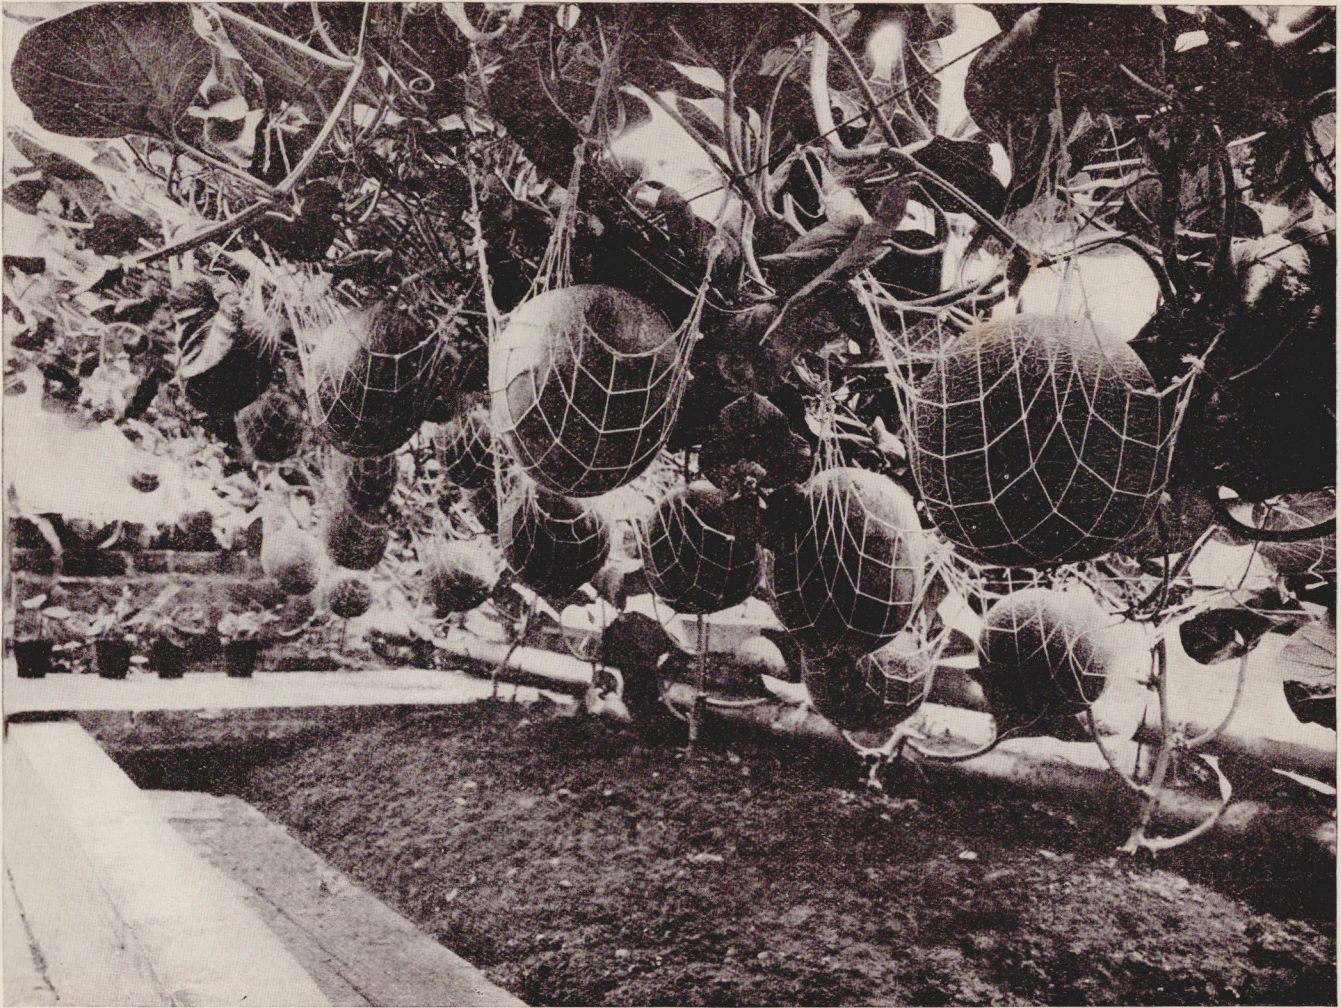

A splendid variety, which has a strong constitution; it sets its fruit freely, and is an abundant bearer. The fruit is nearly round, large, and remarkably handsome, having a lightish yellow and very thin skin, which is regularly netted. Its dark green flesh is of great depth, very solid, sweet, and luscious.—(See *Illustration below.*) 1s. 6d. and 2s. 6d. per packet.

WEBBS' QUEEN VICTORIA MELON.

1s. 6d. and 2s. 6d. per packet. See above.

MELON—continued.

WEBBS' CENTENNIAL MELON. From a Photograph of one of our Seed Houses. 1s. 6d. and 2s. 6d. per packet. See below.

Webbs' Centennial.

A handsome new scarlet-fleshed Melon of splendid constitution, a sure setter and very prolific cropper. The fruit is round in shape, of medium size, with beautifully netted skin, whilst the flesh is thick, firm, and of the richest flavour.—(See Illustration above.)

1s. 6d. and 2s. 6d. per packet.

Webbs' Woodfield.

From the time of its introduction this exquisite and popular green-fleshed Melon has given universal satisfaction, being rich, melting, juicy, and of delicious flavour; remarkable for its beautiful netting and handsome shape. It is a distinct variety, of good growth, a free setter, and of strong and robust constitution; it has a firm and very thin skin, and is all that can be desired for the table. It is also specially adapted for pot-culture, and valuable as an exhibition Melon.

1s. 6d. and 2s. 6d. per packet.

'Webbs' Melon is the finest variety I have ever grown.'—Mr. JOHN EVANS, *Head Gardener to Sir H. WILMOT, Chaddesden Hall.*

'Webbs' International Melon is one of the best, both as regards weight and appearance; it is also a fine setter and of good flavour.'—Mr. E. HERRING, *Gardener to the Rev. Dr. CHAFY-CHAFY, Court Gardens.*

'I have had a splendid crop of your Queen Victoria Melon, one weighing 4½ lbs.'—Mr. J. RAYNER, *Gardener to C. E. HAMMOND, Esq., Newmarket.*

Webbs' New Masterpiece.

This valuable new Melon is distinct from all other varieties, and will, we feel sure, become highly popular. The fruit is oval in shape, whilst the flesh, which is rich scarlet in colour and slightly tinged with green, is firm and of the most exquisite flavour. It is a free setter, and is not liable to canker. (See Illustration, page 38.)

1s. 6d. and 2s. 6d. per packet.

Webbs' Beauty of Wordsley.

This beautiful Melon is the result of a cross between William Tillery and Colston Bassett, and we are confident that it will maintain its character as one of the finest green-fleshed Melons in cultivation, the most flattering testimonials respecting it being constantly received. The fruit is of medium size, oval shaped, finely netted, and of exceedingly handsome appearance. The flesh is of pale green colour, very firm, juicy, and of the most delicious flavour.

1s. 6d. and 2s. 6d. per packet.

'Webbs' Pride of Stourbridge Melon is the best-flavoured Melon I have ever tasted. I took two Prizes with it at Hastings.'—Mr. H. C. CLARKE, *Tottenham.*

'Webbs' Queen Victoria Melon gave me extreme satisfaction. It is handsome in form, and of delicious flavour; certainly one of the best I have grown.'—Mr. R. D. PAGE, *Holydene.*

MELON—continued.

	<i>Per packet.</i>	<i>s. d.</i>
William Tillery. —A splendid green-fleshed Melon, of oval shape, with thin skin, ribbed evenly, and slightly netted. It is a very free setter, of excellent constitution	1	0
Windsor Castle. —A valuable green-fleshed variety of rich flavour	1	6
Cox's Golden Gem. —A yellow-skinned kind of perfect form; the flesh is of a delicate pale green	1	0
Blenheim Orange. —A scarlet-fleshed Melon of delicious flavour, which sets well; handsomely netted	1	6
Munro's Little Heath. —Hardy and prolific; scarlet flesh	6d. and	1 0

Any other variety can be supplied.

'Webbs' Pride of Stourbridge Melon was exhibited by me at Shrewsbury, and took First Prize. I consider it a first-class variety.'—Mr. J. WILKS, Cresswell Hall Gardens.

'Webbs' Beauty of Wordsley Melon is a free setter, and of excellent flavour—all that can be desired.'—Mr. W. HARRISON, *Gardener to* H. CHANCE, Esq., Sherborne House.

'I have again grown Webbs' Queen Victoria Melon, and have proved it to be the finest and best out of 12 sorts.'—Mr. J. COMLEY, The Gardens, Abermont.

'You will be pleased to know I won First Prize with your Woodfield Melon at Exeter last August. It is a grand Melon.'—Mr. S. J. BAKER, Wear House.

'Webbs' Woodfield Melon is a splendid variety, having a very rich yellow rind, with thick green flesh of the finest quality. It took First Prize at Sherborne in a strong competition.'—Mr. J. B. PAYNE, *Gardener to the* LORD BISHOP OF BATH AND WELLS.

WEBBS' NEW MASTERPIECE MELON.

1s. 6d. and 2s. 6d. per packet. See page 37.

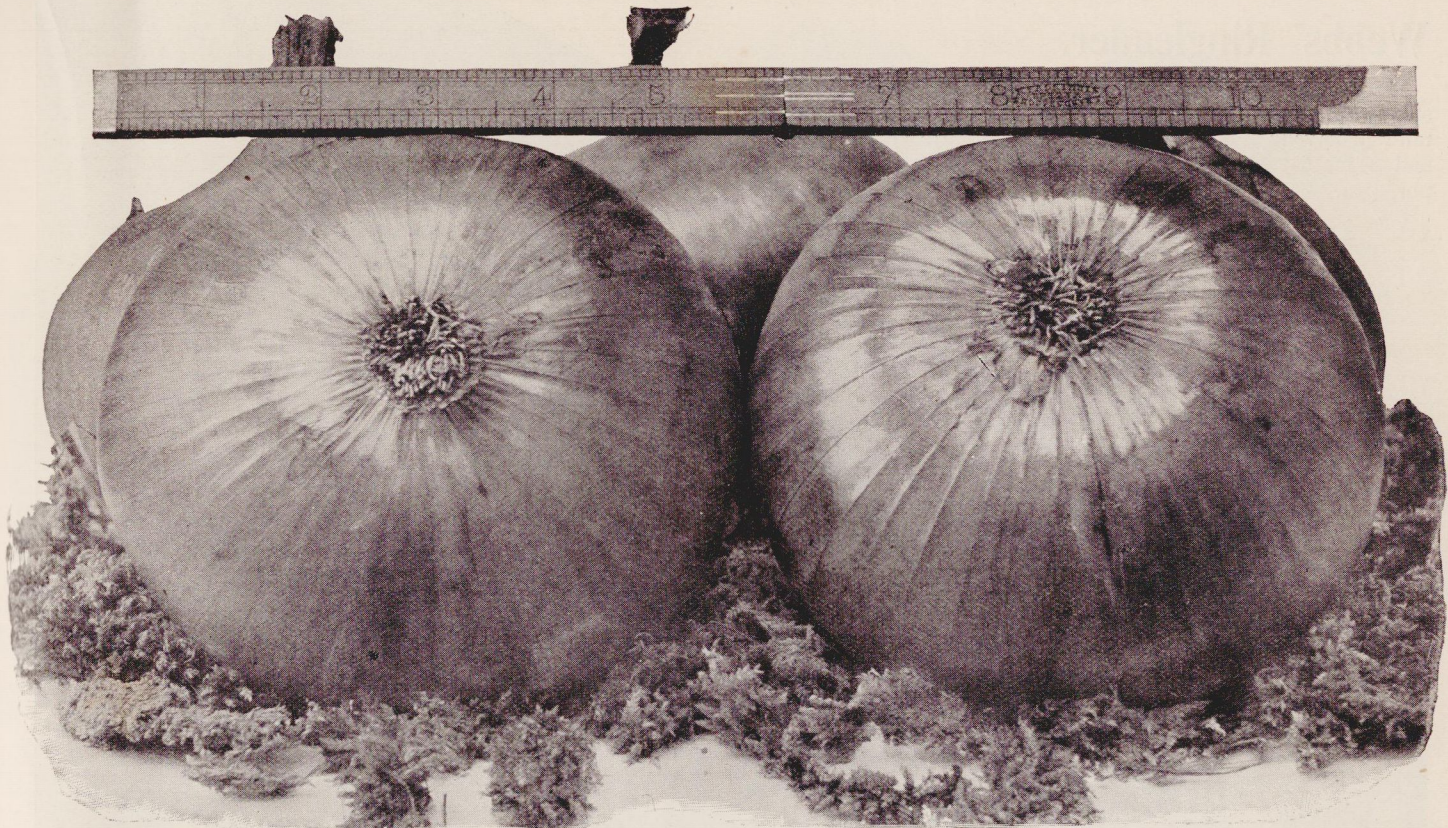

ONION.

(*Allium Cepa.*)

FRENCH, *Oignon.*

A LIGHT rather than a strong soil is liked by Onions, but it should not be too light, or means must be taken to solidify it to a certain extent. Being gross feeders, too, they like a soil well enriched with manure, and this must certainly be afforded them if a heavy crop is to be secured. In a wet season the spring-sown plants will come to great perfection, and so also will the autumn-sown ones; but while, on the contrary, a dry season is the sure cause of a light crop from the spring sowing, those sown in autumn, if not so large as they would be under more favourable circumstances, will still be the best. For autumn sowing Webbs' Monster White and Webbs' Red Globe Tripoli are the best varieties. The seeds should be sown in August or early in September on a piece of ground that has been well and deeply forked over, to ensure a sufficient amount of drainage for carrying off the heavy autumn and winter rains. On this bed they will stand until spring without protection, and in the meantime the ground for their reception should be prepared by being deeply dug and well manured, and left very rough on the surface to allow the free and beneficial action of the frost upon it. As soon in spring as the weather becomes favourable, and the ground gets into a free, workable condition, have it well forked over again and raked level. Then, either run a tolerably heavy roller over the ground, or tread it somewhat firmly. Now mark out the ground into rows a foot apart for an ordinary crop, fifteen or eighteen inches apart if the production of extra large bulbs is aimed at, and proceed with the transplanting, allowing the space of six or eight inches between the plants. Be careful when putting out not to insert more of the plant into the ground than can be helped, if possible not deeper than the base of the future bulb. If the grower wishes to obtain a crop from autumn-sown seeds without the trouble of transplanting, let the ground be prepared in the same way as for transplanting on, and sow in rows the same distance apart, *i.e.* twelve or fifteen inches. The bed will then give an early supply of young Onions for pulling in spring, and these should be drawn regularly over the bed, so that the plants intended to remain are left six or eight inches apart. The thinning should be done as early as possible. Where spring sowing only is resorted to, the preparation of the seed-bed should be carried out as before described, and the seeds sown at the end of February or the beginning of March, according to the state of the weather—but the earlier the better if the conditions are favourable. To secure a crop of Silver-skinned Onions for pickling, sow broadcast, somewhat thickly, but regularly, in March, on a piece of ground that has not been so heavily manured. Tread the ground very firm, level it with the back of a rake, and then sow the seeds, which should be lightly covered with fine soil and rolled in. Thinning should not be resorted to in this case.

ONION—continued.

WEBBS' IMPROVED BANBURY ONION. 6d. and 1s. per packet; 1s. 6d. per ounce. See below.

Webbs' Improved Banbury.—This splendid variety is of exceedingly mild flavour, and an excellent keeper. It is acknowledged to be the finest main crop Onion in cultivation, and it has been successful everywhere in open competitions—the large size, small necks, and fine quality of the specimens exhibited being highly praised.—(See *Illustration above.*)

6d. and 1s. per packet; 1s. 6d. per ounce.

'The Seeds I had from you this spring have given great satisfaction. I may say your Improved Banbury Onion is quite in front of any onions round here. Your Stourbridge Marrow Pea has no equal, nor your Emperor Cabbage.'—Mr. B. J. FROSDICK, *Gardener to Dr. DOUGLAS BEDFORD, The Hermitage.*

'I did very well at our Show with the produce of your Seeds. I took First Prize for Comet Asters and First Prize for Stocks, First for Cauliflower, First for Collection, and First for Banbury Onion. The Onions were the talk of the show; there was not an onion there to compare with your Banbury. I took 13 prizes in all.'—Mr. W. LITTLE, HARSLEY HILL.

'During the past season your Seeds have given great satisfaction. The Improved Banbury Onion has done remarkably well with me; also Defiance Intermediate Carrot. I consider Kinver Marrow Pea one of the best I have ever grown. It is very prolific, the pods are well filled, and the peas are of good flavour.'—Mr. H. R. JUDSON, *Gardener to J. G. MORTLOCK, Esq., Meldreth Court Gardens.*

'During the 13 years I have used your Seeds they have given me the greatest satisfaction, and I have taken many prizes. I have had a grand bed of Onions from your Improved Banbury. It is the best Onion in cultivation, and a good keeper.'—Mr. G. BARNES, *Gardener to W. H. HIBBERD, Esq., Canford Magna.*

Webbs' New Nonsuch.

A new large-sized, globe-shaped Onion, which is a splendid keeper. It is very solid and mild in flavour; **NOVELTY.** the skin is pale golden in colour, and it is very valuable for both large and small gardens.

1s. 6d. per packet; 2s. 6d. per ounce.

'I have had a splendid lot of onions; they are all sound and of excellent quality, and have been the talk of the neighbourhood.'—Mr. S. RUSS, Ilminster.

Webbs' New Crimson King.

NOVELTIES. Excepting in colour these two Onions are identical. They are globular in shape, large in size, of fine quality, and excellent keepers. Being of perfect shape and handsome appearance, they are valuable for exhibition.

'I have won First Prize with your Onion, and exhibited them in two collections with which I got First Prizes.'—Mr. W. PICKARD, Clarence Villa.

Webbs' Model.

One of the most valuable novelties in Onions we have introduced. The bulbs are of globular shape, with brownish yellow skin; they grow to a large size, are firm and of agreeable flavour, whilst their keeping qualities are unquestionable.

6d. and 1s. per packet; 1s. 6d. per ounce.

'The Onions grown from Seed had from you last season were, both for size and quality, the admiration of the neighbourhood.'—Mr. W. H. HOSKEN, Lea View Farm, Redruth.

Webbs' New Yellow King.

Each, 6d. and 1s. per packet; 1s. 6d. per ounce.

'You will be pleased to know your Red Globe Onion carried off First Prize in the open class at Northleach Show. It was the best Onion in the Show.'—Mr. R. MILLS, Windrush.

ONION—continued.

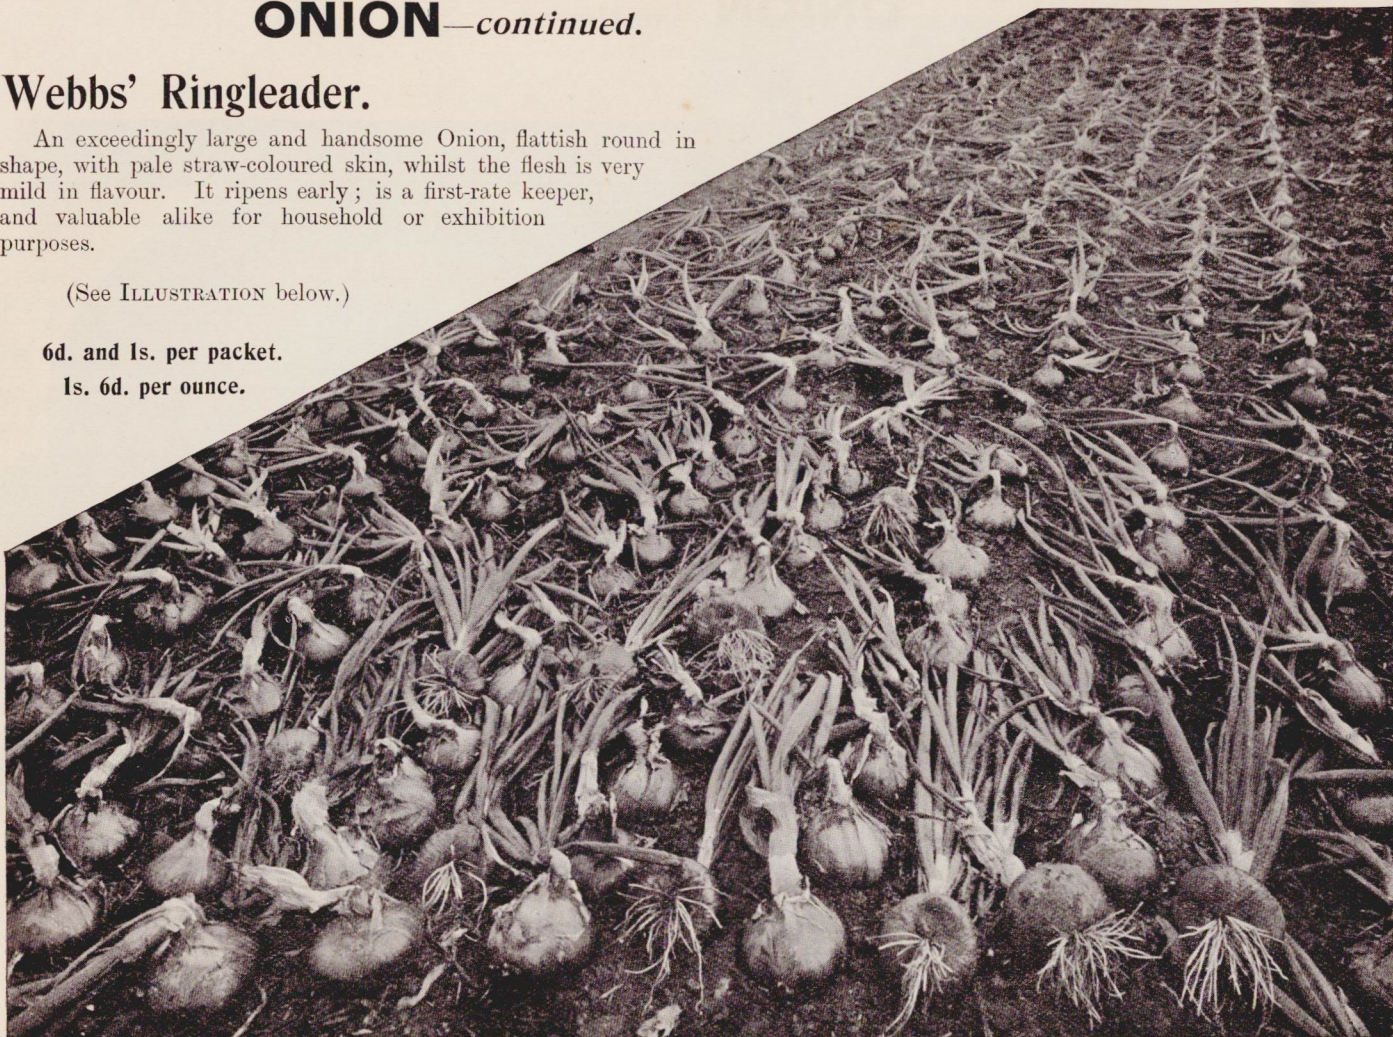

Webbs' Ringleader.

An exceedingly large and handsome Onion, flattish round in shape, with pale straw-coloured skin, whilst the flesh is very mild in flavour. It ripens early; is a first-rate keeper, and valuable alike for household or exhibition purposes.

(See ILLUSTRATION below.)

6d. and 1s. per packet.

1s. 6d. per ounce.

WEBBS' RINGLEADER ONION. 6d. and 1s. per packet; 1s. 6d. per ounce. See above.

Webbs' Reliance.

This variety is of the greatest service for exhibition, being of large size and handsome shape, whilst its good keeping and heavy cropping qualities make it of equal value for culinary use. The skin is of beautiful straw colour, and its white flesh is very firm and mild in flavour.

6d. and 1s. per packet; 1s. 6d. per ounce.

'I think your Reliance Onion is one of the best varieties for exhibition or general purposes. It was my best Onion out of 14 varieties.'—Mr. W. PRIOR, The Gardens, Maesfen.

Webbs' Red Globe Tripoli.

A remarkably large variety of symmetrical shape, which is valuable for exhibition purposes. It has a fine skin of beautiful colour, is exceedingly mild in flavour, very hardy, and an excellent keeper. This splendid Onion is specially adapted for autumn sowing.

6d. and 1s. per packet; 1s. 6d. per ounce.

'I grew a lot of your Red Globe Tripoli Onions over two pounds each in weight.'—Mr. WM. HEADON, Launceston.

Webbs' Monster White Tripoli.

This fine Onion, which is specially suitable for autumn sowing, is very firm, mild, and a first-rate keeper, whilst its extraordinarily large size and handsome shape warrant us in recommending it as a valuable variety for show purposes.

6d. and 1s. per packet; 1s. 6d. per ounce.

Webbs' New Masterpiece.

A handsome new variety, of globular shape, growing to a large size, and a good keeper. The flesh is white, with pale yellow skin, and mild in flavour. Valuable for culinary and exhibition purposes.

1s. 6d. per packet; 2s. 6d. per ounce.

'Masterpiece Onion is one of the best Onions to grow either for show or for home use; it is a very quick grower and mild in flavour.'—Mr. GEO. MERRY, The Ashe Gardens.

Webbs' Mammoth Red Tripoli.

A large and handsome variety; specially recommended for autumn sowing, and, if transplanted in early spring, bulbs of enormous size may be produced early in summer.

6d. and 1s. per packet; 1s. 6d. per ounce.

'I am glad to inform you that I took 11 Prizes at our Show this season. Your Masterpiece Onion beat all others in competition.'—Mr. J. RAYNER, Newmarket.

Webbs' Queen.

An excellent silver-skinned variety, of mild flavour, and remarkable for its early growth and keeping qualities. If sown about the middle of March, full-grown bulbs may be obtained by the first of June which will remain sound until the next year.

6d. and 1s. per packet; 1s. 6d. per ounce.

ONION—continued.

WEBBS' NEW IMPERIAL ONION. 1s. 6d. per packet ; 2s. 6d. per ounce. See below.

Webbs' New Imperial.

A grand new variety of cylindrical shape, and growing to a large size. Its flesh is white, and of mild flavour, whilst its keeping qualities are everything to be desired.—(See Illustration above.)

1s. 6d. per packet ; 2s. 6d. per ounce.

(*Pastinaca sativa*.)

PARSNIP.

FRENCH, *Panais*.

THE Parsnip does best when grown in ground that has been deeply dug and manured the previous autumn, with the manure not buried too near the surface. Fresh dug-in manure causes the roots to fork, and those which possess this blemish are very wasteful. Previous to sowing, about the second week in March, work the ground up lightly with a fork, and sow in shallow drills about eighteen inches apart. The plants must subsequently be thinned out, and it is best to do this twice,—the first time when they are two or three inches high, and finally later on, when the strongest plants can be selected for retention. Thin them out this time to about twelve inches apart. If stored in sand, they will keep until late in the spring.

WEBBS' SELECTED HOLLOW CROWN PARSNIP. 6d. per ounce. See below.

Webbs' New Marrowfat.—This excellent new Parsnip is the finest ever offered to the public. It grows **NOVELTY.** to a good size, is of perfect form, and the skin is very clear and smooth. When cooked the flavour is far superior to other varieties, and it is also highly recommended for exhibition.

9d. per ounce.

Student.—Good flavour, and a heavy cropper 6

Maltese.—A superior variety 6

Hollow Crown.—Good for the general crop 4

Elcombe's Improved.—Very choice 6

(*Petroselinum sativum*.)

PARSLEY.

FRENCH, *Persil*.

A VERY rich soil is not required for this useful herb, which may be sown at any time from February till August. The seeds should be sown in drills about half an inch deep, and covered with fine soil. Parsley takes longer than most seeds to germinate, so that it must be watched during dry weather, and watered if necessary. Plants potted in September, and placed in a cold frame, will be valuable for winter use.

Webbs' Exquisite Garnishing.—An exquisitely curled new variety; most valuable for either garnishing or culinary purposes. It is strong in habit of growth, and very hardy. 1s. per packet; 1s. 6d. per ounce.

Webbs' Giant Curled.—A remarkably large and handsomely curled variety, which is far superior to all others for general purposes. It has a hardy constitution, is of the greatest value for garnishing, and as a prizewinner it has been very successful. 6d. per packet; 10d. per ounce.

Myatt's Garnishing.—A well-known sort 10
Double Curled.—A hardy variety 4

WEBBS' GARDEN PEAS.

(*Pisum sativum*.)

FRENCH, *Pois*.

IT is usual, for the first crop, to make a sowing on a south border in November, and if the winter is not too severe, and the seeds escape the ravages of birds and mice, a satisfactory and early crop will be the result. The second sowing should be made about the beginning of February; and as soon as these are through, sow again, and continue this practice until the end of June, after which, in ordinary seasons, it is too late. The earliest and latest sowings should be of dwarf and early varieties; and as regards the distance to be left between the rows, the grower must use his own judgment, allowing more or less space according to the height of the varieties grown. The earlier crops should be staked as soon as possible after they are through the ground, to give them a little protection; and the best time for staking the later crops is when they are about three inches high.

SECTION I.—Earliest.

WEBBS' NEW PIONEER PEA.

3s. per quart. See page 44.

PEAS. SECTION I.—Earliest—continued.

Webbs' New Pioneer.

This new Pea is a remarkably handsome blue wrinkled marrow, growing from 3 to 3½ feet in height; it is hardy in constitution, and very early in coming to maturity, following immediately after the early small round varieties. The pods are very large, straight, deep green in colour, and contain from 8 to 10 fine Peas of most excellent quality.—(See *Illustration*, page 43.) **3s. per quart.**

'Pioneer Pea; this Pea with us is a grand cropper of first-rate quality.'—Mr. JOS. KERSLEY, *Gardener to S. DARLING, Esq., Beckhampton House.*

'I have no hesitation in saying that Pioneer is the best early Pea one can grow. Planted the same time as Little Marvel and William Hurst, it came in quite as early.'—Mr. GEO. MERRY, *The Ashe Gardens.*

'All your seeds have done well, especially the new Pioneer Peas, which were very fine; also the Improved Banbury Onion and Early Mammoth Cauliflower. I cut some Emperor Cabbages of enormous size.'—Mr. F. HUBBARD, *Gardener to Rev. W. M. C. M'ALLISTER, Hempstead Rectory.*

Webbs' New Leader.

A splendid first early variety, coming into use at the same time as the early white round sorts. It grows about 3 to 3½ feet in height, is of dark green colour, and produces its pods chiefly in pairs. The pods are long, slightly curved, and contain from 8 to 10 large Peas of a most delicate and superior flavour. In addition to its extreme earliness and other good qualities, it is a valuable addition to our list of exhibition varieties. **2s. 6d. per quart.**

'I can speak in the highest terms of your Leader Pea.'—Mr. J. HAWTIN, *Gardener to C. J. COX, Esq., Rock House.*

'Your Peas turned out splendidly. I have never seen any to equal them in size, quality, and quantity.'—Mr. J. ANDREWS, *Sipson.*

'The Peas I had of you last year turned out splendidly. I never had such lovely Peas before.'—Mr. P. BLACKBOURN, *Broom Hill.*

Webbs' New Little Marvel.

An extremely valuable variety, specially suitable for gardens of limited extent, and is also a grand variety for growing in pots for early use, or for outside culture for market-gardening purposes. It is very early in coming to maturity, grows from 12 to 18 inches in height, producing fair-sized pods, which contain 7 to 8 finely flavoured Peas. **2s. 6d. per quart.**

'The Seeds I had from you this Spring have done very well. I think every seed germinated. I have some fine rows of Peas, especially Little Marvel, Senator, Perfection, and Kinver Marrow.'—Mr. W. R. MORRIS, *The Gardens, Rochford.*

'I am very well pleased with the Seeds I had from your firm. They have all done well, especially the Peas. They were very fine.'—Mr. HENRY COSS, *Gardener to LORD ERNEST SEYMOUR.*

Webbs' Improved Sangster's No. 1.

Remarkably early. We have selected a very choice stock of this prolific Pea. Height 2½ feet. **1s. 3d. per quart.**

'Your Peas are very good, especially Wordsley Wonder, which has been greatly admired, being literally covered with blooms and pods.'—Mr. A. MOORE, *Gardener to HYLIA G. ELKINGTON, Esq., Rednal.*

'I have had very good results with both Vegetable and Flower Seeds that we received from you. Sir Robert said he never saw such Peas; there were plenty of pods 6 inches long with nine peas in, and some ten.'—Mr. G. GLAYSHER, *Gardener, Headley Park.*

Webbs' Kinver Gem.

This round blue variety surpasses all other Peas as to earliness, and is consequently of the greatest value for table and market purposes. It is a magnificent kind, of dwarf habit, growing 2½ feet high, very distinct, and exceedingly prolific—the haulm being covered with slightly curved pods which are remarkably well filled with peas of exquisite flavour. **2s. per quart.**

'I have sown your Seeds for a number of years and have found them very satisfactory. Your Kinver Gem Pea is the earliest I ever grew, and it is an abundant cropper.'—Mr. R. MASON, *Gardener to Mrs. W. H. DIXON, Edgbaston.*

Webbs' Perfection.

The earliest and most prolific white round Pea in cultivation. This splendid variety is an extraordinary cropper, with vigorous habit of growth. It bears very handsome, well-filled pods, which, as well as the foliage, are of beautiful bright green colour, and the flavour of the Peas is all that can be desired. Average height, 2 feet. **1s. 6d. per quart.**

'As in former years, this year I have found your Seed to give the greatest satisfaction as to productiveness and excellence of quality. I wish for none better. Your Perfection Pea is a grand one for earliness and productive quality. I have been picking off one row ever since the first week in June, and even now there seems plenty coming on.'—Mr. E. C. DREW, *Head Gardener to The Dowager Countess Beauchamp, Homme House.*

'My experience of the Perfection Pea more than bears out the remarkable results at the County Council Experimental Gardens. Sown in open ground on Feb. 18, first bloom May 28, first gathering June 21. A grand crop in every way,—the best I have ever grown.'—G. MOOLY, *Esq., Stourbridge.*

PEAS. SECTION I.—Earliest—continued.

NEW DWARF PEA— Webbs' Surprise.

For
full particulars
see below.

2s. per pint ; **3s. 6d.** per quart.

This new early Marrowfat Pea is dwarf in growth, averaging from 15 to 18 inches in height, vigorous in habit, a prolific bearer, and produces large pods of dark green colour which contain from 8 to 10 peas of grand flavour. As a cropper it has no equal for its height, and it is undoubtedly destined to become a general favourite.—(See Illustration above.)

NOVELTY. 

'I am pleased to tell you your Peas and other Seeds have turned out very well.'—Mr. W. TRIBE, *Gardener to W. K. WENHAM, Esq., Purley.*

'The Seeds we received from you all grew and have given satisfaction to my employer and myself. I think your Surprise Pea is one of the best dwarf varieties, and it will be popular when more known.'—Mr. E. HOWELL, *Gardener to S. NEWMAN, Esq., Grigshot.*

PEAS. SECTION II.—Second Early.

Webbs' New Pea for 1907— "Paragon Marrowfat."

We have every confidence in introducing this excellent dwarf marrowfat variety, which produces large, deep green pods. It is vigorous in habit and is a prolific bearer. The pods, which are slightly curved, are borne in pairs and closely filled with from 8 to 10 peas of excellent flavour. Height 3 feet. (*See Plate facing this page.*)

2s. 6d. per pint.

Webbs' Promotion.

We feel assured that the convenient height and good cropping qualities of this valuable second early Pea are appreciated by our numerous customers, especially amateurs and market gardeners. The haulm is of robust habit growing from 1½ to 2 feet in height, and heavily laden with fair-sized pods, which contain about 7 large peas of the choicest quality. 2s. 6d. per quart.

'Your Promotion Pea is now just ready, and is really a splendid Pea.'—Mr. R. H. COCKBURN, Gartmore Gardens.

'I am very pleased with Webbs' Promotion Pea. It is a splendid cropper, the pod being large and well filled with Peas of excellent flavour.'—Mr. G. URQUHART, Gardener to W. THORNTON, Esq., Wemyss Hall.

'I am pleased to inform you that the Peas I had of you are of most delicious flavour and good croppers. I hope to send you an order for some of the same sort for next season.'—Mr. EDWIN BAKER, Eastbourne.

'I am greatly pleased with Webbs' Promotion Pea. I consider it quite an acquisition, being a distinct variety, a heavy cropper, and of first-class quality.'—H. SAMPSON, Esq., Thornleigh.

Webbs' Kinver Marrow.

Awarded First Prizes at the Birmingham and other leading Shows. The excellent results from the use of this superior second early Pea prove that it is invaluable for both general cropping and exhibition purposes. It is remarkably productive, with robust habit, growing 3½ feet high; the pods are handsome, of bright green colour, very long, curved, and closely filled with peas of the finest flavour. 2s. per quart.

Webbs' Stourbridge Marrow.

A grand second early variety, and the finest Pea of its class, for either ordinary garden cultivation or exhibition purposes, that has ever been offered to the public. It is an exceedingly strong and vigorous grower and an enormous cropper; it attains a height of 4½ feet, and bears immense pods, which are produced in pairs, each pod containing from 9 to 11 large peas of the most delicious flavour. Awarded numerous First Prizes at Birmingham and other leading Shows.—(*See Illustration, page 47.*)

2s. 6d. per quart.

'Your Stourbridge Marrow Peas have done very well with me.'—B. BRANDETH, Esq., Esperange, Formby.

'All your Seeds did exceedingly well last season, especially the Peas. I consider your Stourbridge Marrow Pea excellent, both for quality and productiveness.'—Mr. ERNEST AVERY, Gardener to J. B. BROOKS, Esq., The Gardens, Finstall Park.

'Having grown your Seeds for several seasons, I have pleasure in testifying to their general excellence. I consider your Stourbridge Marrow and Kinver Marrow Peas are unsurpassed for quality and productiveness.'—Mr. JOHN SPRAGGAN, Gardener to HENRY H. COCHRANE, Esq., Eshwood Hall.

Webbs' Wordsley Wonder.

This wonderful Pea is the result of crosses between Advancer, Little Gem, and Prizetaker. It is a blue wrinkled marrow, growing 2½ feet high, and is of strong and vigorous habit. The pods—produced in pairs at every joint—are of medium size, slightly curved, and each pod is literally packed with from 10 to 12 large Peas, which are exceedingly sweet, of beautiful colour, and the finest flavour. Its height and cropping properties render it indispensable to the amateur. 2s. 6d. per quart.

'Your Wordsley Wonder Pea is marvellous for yielding and good flavour. I am charmed with it. Banbury Onions also are wonderful.'—T. R. DYER, Esq., Ashville.

'In justice to you I must say your Peas—Wordsley Wonder, Masterpiece, and Mainstay—were exceptionally fine, both as to crop and quality.'—Mr. JOHN CANNING, Foxcote.

WEBBS' NEW SECOND EARLY PEA FOR 1907,
"PARAGON MARROWFAT."

For description, price, etc., see page 46.

PEAS. SECTION II. Second Early—continued.

**For particulars see
page 46.**

WEBBS' STOURBRIDGE MARROW PEA, 2s. 6d. per quart.

PEAS. SECTION III.—General Crop.

WEBBS' NEW PEA—"Distinction."

NOVELTY.  A fine new blue wrinkled Pea, coming in with the late main crop varieties. The pods are large, of a fine deep green colour. In growth it has a robust constitution, and we recommend it as most desirable for exhibition purposes. Height $3\frac{1}{2}$ to 4 feet. 2s. per pint; 3s. 6d. per quart.—(See Illustration above.)

PEAS. SECTION III.—General Crop—*continued.*

WEBBS' ASTRONOMER PEA. 3s. per quart.
See below.

Webbs' Astronomer.

A remarkably handsome main crop variety growing about 3 feet in height. It is a wonderful and most persistent bearer, fruiting far longer than most other varieties, and is invaluable for general or late sowing. The pods are of medium size, closely filled with dark green peas, which are of the finest quality.—*(See Illustration above.)* 3s. per quart.

'Webbs' Astronomer Pea is a very heavy cropper, producing large Peas (nine and ten in a pod), and the flavour is very good.'—Mr. F. COOK, Stetchworth Ley.

'Messrs. Webbs' Seed Farms at Kinver. But there are still newer creations in Astronomer and Masterpiece, both equally prolific in bearing, and yielding remarkably fine pods.'—*THE GARDENING WORLD.*

Webbs' Chancellor.

This blue wrinkled marrow Pea is one of the finest main crop varieties in existence. The haulm is of robust habit of growth, and a beautiful deep green colour; it attains a height of 3 feet, and commences podding close to the ground. The pods, which are produced in pairs, are nearly straight, broad, long, and of very handsome appearance; they contain from 8 to 10 extra large peas of the most delicious flavour. 2s. 6d. per quart.

'Webbs' Chancellor Pea is really a fine sort—of dwarf habit, prolific, and of excellent flavour. It produces as many as ten Peas in a pod, in some instances.'—Mr. J. SIMPSON, *Gardener to the Right Hon. Lord WHARNCLIFFE*, Wortley Hall.

'Webbs' Chancellor Pea is a distinct variety, of good flavour, very prolific, and conveniently dwarf; each pod is well filled with large-sized Peas.'—Mr. EDWARD TATE, *Gardener to Sir COUTTS LINDSAY*, Bart., Balcarres.

Webbs' Talisman.

A splendid exhibition Pea. A magnificent blue wrinkled main crop Pea, which was raised on our own Farms, from a cross between the varieties—Culverwell's Giant Marrow and Omega. It grows about 5 feet in height, has stout stems, and large, light green foliage; the pods are long, straight, very handsome in appearance, and contain about 9 extra large and fine-flavoured Peas. Besides being of first-class table quality, this Pea is of the greatest value for exhibition purposes. 3s. per quart.

'Webbs' Pea—Talisman—will surely come to the front. After careful testing in my trial of 70 varieties last year, I must place it among the very best Peas of the day.'—Mr. J. H. RIDGEWELL, *The Gardens, Histon Road.*

'You will be glad to know that all your Seeds have done well. The Peas have been a perfect show—the finest I have ever grown.'—Mr. G. CUBBINS, *Gardener to Miss TURNER*, Caversham Rise.

Webbs' Electric Light.

This remarkably fine marrow Pea is of the choicest quality, and one that we recommend with every confidence for the general crop. It grows to a height of 3½ feet, with a profusion of splendid pods measuring 4½ to 5 inches in length, which are closely filled with large Peas. As an exhibition variety it is invaluable, and its delicious flavour causes it to be highly appreciated for the table. 2s. per quart.

'Webbs' Electric Light is a grand Pea for the general crop.'—Mr. J. EDMONDS, *Gardener to His Grace the DUKE OF ST. ALBANS.*

'I was much pleased with the Peas you sent me last year, and now enclose order for more and other Seeds.'—Miss E. W. PATTERSON, Spaxton.

Webbs' Royal Standard.

This handsome main crop Pea was originated by hybridising the well-known varieties—Ne Plus Ultra and Telephone. It is a blue wrinkled marrow, of strong constitution, attaining a height of 5 feet, and is a great and continuous bearer; the pods are very large, broad, straight, and closely filled with from 7 to 9 extra large peas, which are of delicate flavour. 2s. 6d. per quart.

'Royal Standard is a fine main crop Pea, and the result of a cross between Ne Plus Ultra and Telephone, both standard varieties of the highest order. It grows to a height of five feet, is a blue wrinkled marrow and a prodigious cropper. The pods are large, of fine appearance, and well filled with from seven to nine unusually large Peas of excellent flavour.'—*THE GARDENERS' MAGAZINE.*

PEAS. SECTION III.—General Crop—*continued.*

WEBBS' SENATOR PEA. 3s. per quart. *See page 51.*

PEAS. SECTION III.—General Crop—continued.

Webbs' Senator.

Webbs' Senator is distinct from and superior to Charles I. or any other Pea. This splendid new Pea was raised at our Kinver Trial Grounds, and has been selected for a number of years; it is a cross between the varieties—Prince of Wales and Culverwell's Giant Marrow, and is a very remarkable cropper, the pods being produced mostly in pairs; they are of good size, and contain on an average about 9 large Peas, which are sweet in flavour. It is of branching habit, grows from 2½ to 3 feet in height, and has proved to be a most valuable variety, either for private use or market-gardening purposes.—(See Illustration, page 50). . . 3s. per quart.

First-Class Certificate, Royal Horticultural Society, 1902.

'Out of ten varieties of Peas I grew last season Webbs' Senator was the best.'—Mr. CHAS. GRABB, Gladsmuir.

'I think it is my duty to say a few words in favour of your Peas—Senator and Stourbridge Marrow. After trying both for three years, I consider your Senator one of the finest Peas grown; it stands the dry weather better than any I have grown, and resists mildew.'—Mr. W. HIGGINS, *Gardener to Sir A. E. DRYDEN, Bart., Canon Ashby House.*

'I sowed Webbs' Pea, Senator, with several other kinds, and found it the most prolific Pea that I have grown this season. It stood the dry weather remarkably well, without any trace of mildew. It is well studded with pods containing Peas of fine colour and flavour.'—Mr. JOHN SELWAY, *Gardener to the Right Hon. Lord NORTHBOURNE, Betteshanger Park.*

'Your Senator Peas are excellent in every way. Even when old they retain their beautiful marrow flavour.'—Mr. E. BUTLER, *Gardener to Lt.-Col. CRICHTON BROWNE, Easton Court.*

Webbs' Masterpiece.

A handsome blue wrinkled main crop Pea, growing about 4 feet in height, of strong and branching habit of growth. Its fine broad, blunt-ended pods, which are produced in abundance, are of dark green colour, and closely filled with large Peas of superb quality. This new variety has been under trial at our Kinver Seed Farms for several seasons, and we are convinced that it is destined to become a general favourite . . . 3s. per quart.

'Of the Ne Plus Ultra type, Webbs' Masterpiece is one of the best, and is preferable to the type, as it is a much better grower, and has better colour.'—*JOURNAL OF HORTICULTURE.*

'I took 14 First Prizes and 6 Seconds at our Show; nearly all the exhibits were grown from your Seeds. Your new Pea—Masterpiece—is the largest Pea I have seen, a tremendous cropper, and what a time it lasts!'—Mr. F. AGAR, Superintendent, Constabulary Station, Lutterworth.

'For late supplies and general use Autocrat is most reliable. Webbs' Masterpiece is a great favourite here, and much resembles the former, but the pods are larger, and both are of fine quality.'—*'THE GARDEN.'*

Webbs' New Enterprise.

A new and valuable variety, growing to the convenient height of from 2½ to 3 feet. Its dark green pods are produced abundantly, and contain from 8 to 9 large Peas of the finest quality when cooked . . . 2s. 6d. per quart.

'A Great English Seed Farm.—Peas: New Enterprise is a main crop variety, with large handsome green pods, tightly packed with finely flavoured Peas; and Chancellor, Royal Standard, and Talisman, all excellent main crop varieties.'—*'THE GARDENERS' MAGAZINE.'*

'The New Kaiser Pea is a splendid variety; a heavy cropper with long pods containing nine beautiful, deep-green Peas of excellent flavour when cooked.'—Mr. J. MURBY, *Gardener to Mrs. CAZENOVE, Forest Grove.*

WEBBS' NEW KAISER PEA.

3s. 6d. per quart. See below.

Webbs' New Kaiser.

This is a distinct new variety of our own raising, being one of the results of the series of cross-fertilisation which have been conducted at our Kinver Trial Grounds. It is a main crop variety, growing to a height of 3½ feet, and a prodigious cropper, producing long, well-filled pods of deep green colour. Its table qualities are of the highest order, whilst for exhibition it is destined to become one of the most successful varieties ever introduced, and we have every confidence in recommending it as the best novelty of the day. Awarded Certificate of Merit, Royal Horticultural Society, 1903.—(See Illustration above) . . . 3s. 6d. per quart.

'Kaiser Pea has done remarkably well with us the two seasons I have grown it. It is a very heavy cropper with long pods.'—Mr. GEORGE MERRY, The Ashe Gardens.

PEAS. SECTION III.—General Crop—*continued.*

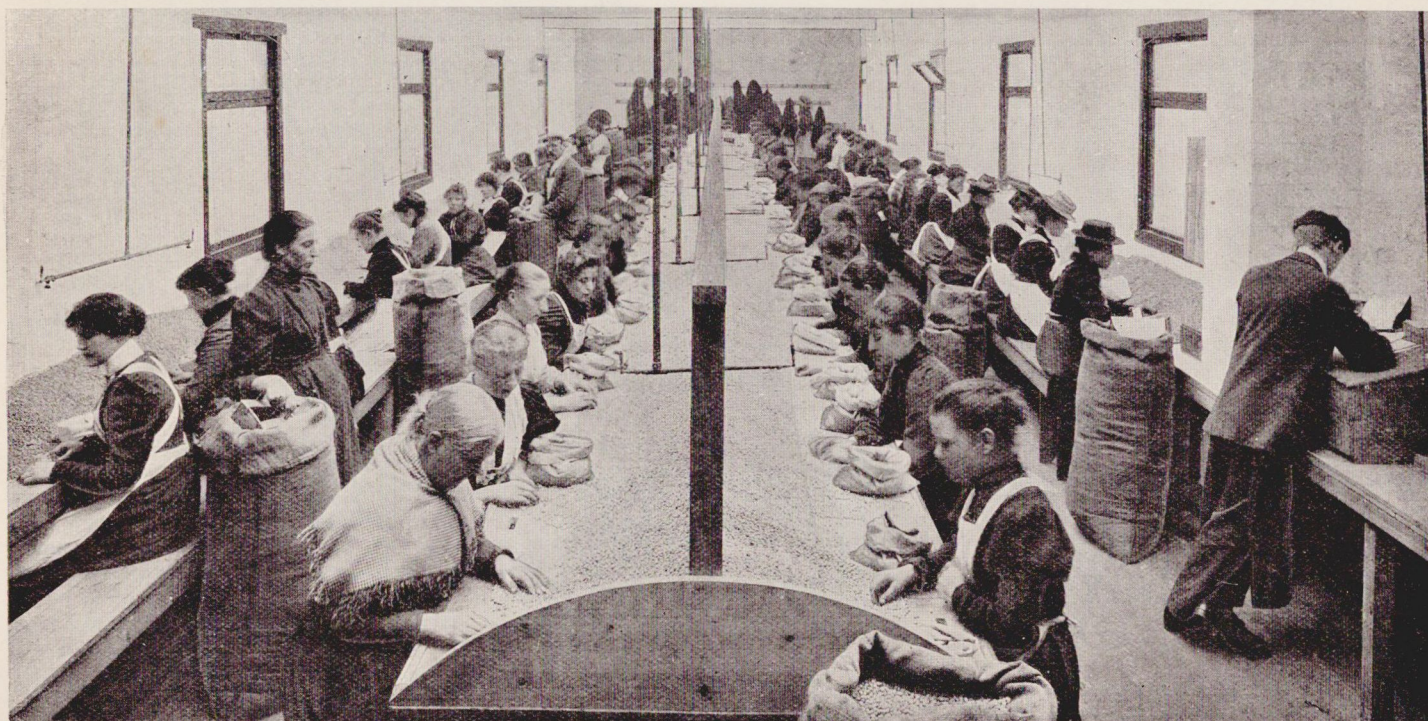

Webbs' New Mainstay.—In offering this new variety, we have every confidence that it will rapidly become a general favourite on account of its sterling qualities. It grows to a height of $3\frac{1}{2}$ feet, is of robust habit, and produces an abundance of large, curved pods, which are well filled, and of a dark green colour. The Peas are of fine flavour; and whilst it is an excellent one on the table, it is also a valuable acquisition for exhibition purposes. **2s. per pint; 3s. 6d. per quart.**

HAND-PICKING PEAS AT WEBBS' ROYAL SEED ESTABLISHMENT.

RADISH.

(*Raphanus sativus*.) FRENCH, *Radis* (turnip-rooted), *Rave* (long).

THE first sowing out of doors may be made in favourable localities during December or January, in beds about four feet wide. After sowing broadcast rake the seeds in, and cover the beds with some dry loose litter, which need not be disturbed until the seeds are up; and it should not be taken off then except in fine weather. After March, sowings should be made about twice a month, or three times in two months, according to the demand. Turnip Radishes are best for winter culture; the seeds may be sown in rows or broadcast.

Webbs' New Climax.

This is a deep crimson-coloured Radish of medium length, which will be found a most desirable variety. **NOVELTY.** Its white flesh is firm, crisp, and of delicate flavour. 8d. per ounce; 3s. 6d. per pint.

Webbs' Favourite.

A quick-growing crimson and white variety, of pretty appearance, which is remarkably crisp, tender, and mild in flavour. 8d. per ounce; 3s. 6d. per pint.

Webbs' New Triumph.

This is a new scarlet variety of medium length, with white flesh; it has a small top, and keeps tender and crisp for a long time.—(See Illustration below.) 8d. per ounce; 3s. 6d. per pint.

Webbs' Long White.

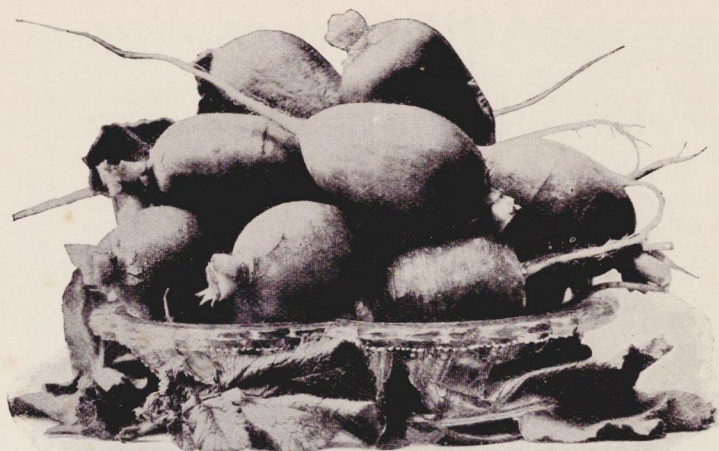

A beautifully white long variety of most excellent flavour, suitable for either forcing or outdoor culture. 6d. per ounce; 2s. 6d. per pint.

Webbs' Crimson Globe.

A splendid Radish with short top, and of very rapid growth, well adapted for either early forcing or summer cultivation in the open ground. 6d. per ounce; 2s. 6d. per pint.

Webbs' Long Rose.

A handsome long-shaped variety, with bright rose-coloured skin; very early, and of handsome appearance. The flesh is very mild, and of pleasing taste. 6d. per ounce; 2s. 6d. per pint.

WEBBS' RUBY GEM RADISH.

8d. per ounce; 3s. 6d. per pint. See page 54.

'I must say your Stourbridge Marrow Pea is a splendid cropper, with 10 to 11 peas in a pod, and of excellent flavour. During the 6 years I have tried them I have found your Vegetable and Flower Seeds give better results than those obtained from other firms. I shall not be afraid to recommend them.'—Mr. WM. LEMON, The Elms Gardens.

'I feel I cannot let the season pass without giving you a word of praise for the grand quality of your seeds. Your Pink Perfection Celery is the best I ever grew. I did not have a single failure in anything supplied by you.'—Mr. H. ANTHONY, Gardener to the Hon. R. HARDINGE, South Lawn.

WEBBS' EARLY WHITE FORCING TURNIP RADISH.

6d. per ounce; 2s. 6d. per pint. See page 54.

WEBBS' NEW TRIUMPH RADISH.

8d. per ounce; 3s. 6d. per pint. See above.

'We found the Radish—"Favourite"—an exceedingly good one, and the earliest we had grown on the open border. Radishes generally were good here this year, but none surpassed the "Favourite" for earliness, flavour, and appearance.'—Mrs. CLARK, Anglesey Abbey.

RADISH—continued.

Webbs' Crimson Ball.

An exceedingly early Turnip-shaped variety, producing very little top. The root is of brilliant crimson colour, tipped with white, very handsome, and of mild and pleasant flavour.

6d. per ounce ; 2s. 6d. per pint.

Webbs' Ruby Gem.

This is a new and distinct type of deep crimson Globe Radish, which grows to a good size and does not become pithy or hollow. It is very useful for forcing, and the flesh is pure white, firm, crisp, and very mild in flavour.—(See Illustration, page 53.)

8d. per ounce ; 3s. 6d. per pint.

Webbs' Improved Early Frame.—A select stock of remarkably quick growth. It is very mild, crisp, of excellent flavour, and unsurpassed both for forcing and the earliest outdoor crop.—(See Illustration below.)

6d. per ounce ; 2s. 6d. per pint.

Webbs' Improved Olive-shaped Scarlet.—A very handsome variety, of superior quality and extraordinarily quick growth.

6d. per ounce ; 2s. 6d. per pint.

Webbs' Purple Globe.—Comes into use early, and is valuable for outdoor or forcing purposes.

WEBBS' IMPROVED FRENCH BREAKFAST RADISH.

6d. per ounce ; 2s. 6d. per pint. See below.

'The Globe Radish Seed I had from you last year' did remarkably well. It produced the best bed of Radishes I have grown.'—Mr. R. C. HODGETT, Mount Pleasant.

'The Seeds supplied by you, both flower and vegetable, gave great satisfaction.'—Mr. CHAS. COOK, Gardener to J. BENNETT, Esq., The Cedars.

'I bought some Seed of Webbs' New Favourite Radish, and would recommend it as one of the best that I ever had, if not the best.'—Mr. J. H. GARDNER, Anlaby Road.

WEBBS' IMPROVED EARLY FRAME RADISH.

6d. per ounce ; 2s. 6d. per pint. See above.

RHUBARB.

(*Rheum hybridum.*)

FRENCH, *Rhubarbe.*

(For Rhubarb Roots, see page 62.)

RHUBARB is often propagated by a division of the old stools ; but where it is desired to raise it by means of seeds, sow it in rows, two or three feet asunder, during the month of March, and when the plants are up, thin out to ten or twelve inches apart. If a good growth is encouraged throughout the summer months, the seedlings will be ready in October for transplanting into their permanent quarters.

Rhubarb Seed saved from the following sorts,

6d. and 1s. per packet.

Early Tobolsk.	Linnæus.	Johnston's St. Martin.
Dancer's Early Scarlet.		Mitchell's Royal Albert.
Myatt's Victoria.	Champagne.	Mixed Varieties.

SCORZONERA.

(*Scorzonera hispanica.*)

FRENCH, *Scorzonère.*

THOUGH there is a great difference between the roots of this plant and those of Salsafy, the cultivation is exactly the same.

1s. per ounce.

SPINACH.

(*Spinacea oleracea.*)

FRENCH, *Épinard.*

MAKE the first sowing at the end of February or the beginning of March, and subsequently every fortnight or three weeks until August. Sow in rows twelve inches apart and about an inch deep. A good thinning will subsequently be required, and the hoe should be run amongst the plants as often as possible. The New Zealand variety must be sown in heat, in pans or boxes during March, and planted out at the beginning of June, in rich ground at a distance of two feet apart each way.

Webbs' New Invincible.

A very superior variety, which produces leaves of good substance and fine colour. It stands a long time before starting to seed, and the flavour is excellent.

6d. per ounce ; 2s. 6d. per pint.

Webbs' Prolific.

An excellent summer variety, especially where a large quantity of this favourite vegetable is in demand. It stands dry weather well, and produces an abundance of large thick leaves, which continue fit for use far longer than any other kind.

4d. per ounce ; 2s. per pint.

Round-leaved.—For spring and summer sowing,
2s. per quart, 1s. 3d. per pint, 3d. per ounce.

Prickly, or Winter.—For autumn sowing,
2s. per quart, 1s. 3d. per pint, 3d. per ounce.

Long Standing Prickly.—A very useful variety for winter and spring sowing . . . 2s. 0d. per pint ; 4d. per ounce.

Flanders.—An excellent winter variety,
2s. 6d. per quart, 1s. 6d. per pint, 3d. per ounce.

New Zealand.—A rapid grower . . . 10d. per ounce.

Orache, or Mountain Spinach.—Distinct . . . 6d. per ounce.

Perpetual Spinach, or Spinach Beet . . . 10d. per ounce.

'Your Spinach was so good last year please send on by return another eight quarts of same. Your Seeds have given every satisfaction.'—
MR. THOMAS GRANT, Head Gardener to The MARQUIS OF EXETER, The Gardens, Burghley.

STRAWBERRIES. See below.

STRAWBERRY SEED.

(*Fragaria.*)

FRENCH, *Fraises.*

Choice large-fruited varieties, mixed . . . 1s. per packet.

(For Strawberry Plants, see page 62.)

SALSIFY.

(*Tragopogon porrifolium.*)

FRENCH, *Salsifis.*

SALSIFY likes a tolerably good soil, rather light in its nature. For the main crop, sow early in April in rows about fourteen inches apart, and one and a half inches in depth. Thin out when ready to the width of four or five inches. The roots may remain in the ground until required for use, or be taken up in the autumn, and stored in the same way as Carrots or Beet. 1s. per ounce.

SEA KALE.

(*Crambe maritima.*)

FRENCH, *Chou marin.*

ABOUT the end of March sow in rows one foot apart, and thin out the young plants to six inches between each in the rows. Transplant to well-prepared ground in the following spring. The easiest way to force Sea Kale is to lift the roots and pack them into boxes of light soil, to be placed, as required, in any dark but warm structure.

Lily White . . . 1s. per packet.

Ordinary, 9d. per ounce. (For Sea Kale Plants, see page 62.)

TOMATO, or LOVE APPLE.

(*Lycopersicum esculentum*.)

FRENCH, *Tomate*.

TO grow the Love Apple successfully out of doors, it is essential to start the plants as early as possible in spring, in order to get them strong and well established by the time the weather becomes favourable enough for planting out. Sow at the end of February or the beginning of March, in pans of light soil, and plunge in heat. When large enough to handle, transfer the seedlings into small pots filled with light rich soil, and as they advance in size and vigour give them another liberal shift into a similar compost, and grow on in such a position as will afford plenty of heat, light, and moisture. Harden them off gradually, and plant out at the base of south walls at the end of May or beginning of June. The soil cannot be made too rich, and after planting they should be given a good soaking of water. Subsequently thin and stop the shoots as required.

WEBBS' VICEROY TOMATO. From a Photograph of one of our Seed Houses at Wordsley. 1s. 6d. and 2s. 6d. per packet. See below.

Webbs' Regina.

This valuable Tomato is early and very prolific; it sets its fruit well out of doors, and also under glass, and is therefore of the greatest service for both open-air and house culture. The fruit is smooth, somewhat round in shape, of beautiful deep colour, and delicious flavour.

1s. 6d. and 2s. 6d. per packet.

Webbs' Coronation.

A most productive variety; the plant, which is of vigorous growth, produces an abundance of fruit in heavy clusters; deep red in colour, oval shape, and medium size. It is suitable for both indoor and outdoor cultivation.

1s. 6d. and 2s. 6d. per packet.

'I cannot refrain from giving you a word of praise concerning your Tomatoes. We have had a splendid house of Sensation, and also Early Dwarf; it was a picture to see them, and they are the best I have grown.'—MR. A. FLETCHER, The Gardens, Bettwood Hall.

Webbs' Viceroy.

For exhibition or for general use this handsome new variety is indispensable. The plant is of strong and vigorous growth; it sets its fruit freely and in great abundance. The fruit is of large size, smooth, rich scarlet in colour, and of beautiful shape, whilst the flavour is all that can be desired.—(See Illustration above.)

1s. 6d. and 2s. 6d. per packet.

Webbs' Early Dwarf Red.

This is a very prolific Tomato, of large size, beautiful colour, handsome shape, and excellent flavour; it arrives quickly at maturity 1s. per packet.

'I am pleased to tell you how well your seeds did with me this last year. I planted 12 of your Regina Tomato out of doors against a south wall, and I had over 100 lbs. of fruit off them.'—MR. J. LEWIS, Gardener to Mrs. WALFORD, Ruyton Towers.

**Webbs'
New Emperor
Tomato.**

We have every confidence in offering this tomato both to small and large growers. It is an enormous cropper of fine shape and deep red colour. For market-growing it is unsurpassed, whilst it is equally valuable for the Gentleman's Gardener or Amateur. —(*See Illustration annexed.*)

1s. 6d. and 2s. 6d. per packet.

'The Tomatoes grown from your seed are luscious and highly appreciated.'
—G. H. BAINES, Esq., Bradgate.

'Being growers of Tomatoes, we were induced to try yours; we have now one house in full bearing, a sight never seen in the neighbourhood of Fareham, fruiting from the bottom, and a good setter.'—Messrs. W. and G. DROVER, Nurserymen, Fareham.

WEBBS' NEW EMPEROR TOMATO. 1s. 6d. and 2s. 6d. per packet. *See above.*

TOMATO—continued.

Webbs' New Jewel.

Amongst the many varieties of Tomato now in commerce, we believe there is none to equal this new variety for sweetness and fine flavour. The fruit is of moderate size, nearly round in shape, and of beautiful deep red colour. The plant sets its fruit freely, crops well, and is in every way a most desirable novelty.—(See *Illustration annexed.*)

1s. 6d. and 2s. 6d. per packet.

'I have had during the past season a splendid crop of your Tomato, one bunch consisting of fourteen fruits.'—Mr. A. ARCHER, The Gardens, The Radfords.

'I had a better crop of Regina and Jewel Tomatoes than you show in your photo—many weighing over 1 lb.'—W. H. DOUGLAS ROBOTHAM, Esq., Holmwood.

Webbs' Jubilee.

This is an exceedingly handsome variety, of strong constitution, and enormously productive. The fruit is of immense size, beautiful bright scarlet colour, free from crack, and remains perfect on the vine longer than any other kind. It is flattish-round in shape, smooth, very solid, unsurpassed in flavour, and unequalled for exhibition purposes or general cultivation.

1s. 6d. and 2s. 6d. per packet.

'I set 50 Tomato Seeds (from a packet I got from you) and was surprised to find that 50 plants came up, and they finished as well as they started. They were a mass of fruit, many weighing over 8 ounces.'—Mr. A. PEARSON, Cleethorpes.

'The Tomato Seeds I had from you this year have given satisfaction, being very heavy croppers.'—Mr. P. ROCHE, The Shrubby.

WEBBS' NEW JEWEL TOMATO. 1s. 6d. and 2s. 6d. per packet. See above.

Webbs' Sensation.

This choice Tomato is very robust in habit of growth, and the plants are exceedingly prolific, setting their fruit at every joint. It is flattish-round in shape, perfectly smooth, of rich deep red colour, and the most delicious flavour; and being large and handsome, it is of great value for the exhibition table.

1s. 6d. and 2s. 6d. per packet.

'I am sending you just a snapshot of a few of the Coronation Tomatoes. I must say it is the best Tomato I have ever grown. I have had as many as 26 fruit in one bunch.'—Mr. W. BARKER, *Gardener to* W. J. CHADBURN, Esq., Grove House.

'The Tomatoes—Viceroy and Sensation are the best I have ever grown, and I was awarded second prize for Sensation at the Royal Caledonian Society's Show in Edinburgh last week.'—Mr. R. H. COCKBURN, Gartmore Gardens.

'I cannot speak too highly in praise of Webbs' Sensation Tomato, it is the heaviest cropper I have ever grown, and the flavour is all that can be desired.'—Mr. A. BOWLES, *Gardener to* O. A. ELLIS, Esq., The Rookery.

Webbs' Chancellor.

Amongst the many Tomatoes already in commerce, this variety will be a decided acquisition. The fruit is of fine shape, large, smooth, and bright red in colour, the flesh being thick and of agreeable flavour. It sets its fruit freely, and is a heavy cropper.

1s. 6d. and 2s. 6d. per packet.

'Your seeds did very well last year, giving the greatest satisfaction. Regina Tomato was a sight, covered from top to bottom with fine fruit, and some bunches carrying 19. Several weighed from $\frac{1}{2}$ to $\frac{3}{4}$ lb. and not thinned out. It is a plant with strong constitution and a free setter, indoors or outdoors.'—Mr. W. H. MEREDITH, *Gardener to* Rev. R. H. HARVEY, Hanbury Rectory.

'I would like to say that the Seeds you supplied last season did wonderfully well. The Regina Tomato in particular producing the largest and finest crop I have ever grown during the 13 years I have been here, and I shall have pleasure in recommending your seeds whenever I can.'—Mr. J. DAISLEY, *Gardener to* W. SMITH, Jun., Esq., Goole Grange.

(*Brassica rapa*.)

TURNIP.

FRENCH, *Navet*.

TURNIPS require to be grown as quickly as possible, therefore moist soil and liberal manuring are necessary. For the first crop, sow any of the early varieties in March, and then any other sorts as often as may be required afterwards. For the winter crop sow at the end of July, again about the second week in August, and a little later if necessary; but do not sow until the ground has been well soaked with rain, and thin out more liberally than the summer crops require.

WEBBS' PRIZETAKER TURNIP. 6d. per ounce, 2s. 6d. per pint. See below.

Webbs' New Silver Ball

A beautifully formed globe-shaped variety, and an exceedingly rapid grower. The bulb is white, with a fine tap-root, whilst the flesh is fine-grained, firm, and of mild flavour.

6d. per ounce; 2s. 6d. per pint.

'At Alrewas Show I got First Prize for a collection of Vegetables, First for Beans, and First with Goldfinder Potatoes, all grown from your Seeds.'—Mr. J. LUCAS, Fradley.

'Turnips.—As a winter variety we grow largely Webbs' Prizetaker, a green-topped sort, but extremely hardy and of fine quality.'—*The Gardener*.

Webbs' Early Six Weeks.

This handsome Turnip, which is a very quick-growing variety, is exceedingly hardy, firm, and of superior flavour. It is suitable for either summer or winter cultivation, and, being of fine shape, is of great value for exhibition purposes.

4d. per ounce; 1s. 9d. per pint.

'Your Early Six Weeks Turnip has been true to its name; I never saw better Turnips in so short a time.'—Mr. H. DOBBIE, *Gardener to F. E. WATSON, Esq., Thickthorn House.*

'Too much cannot be said for your Early Purple Top Turnip; it is the earliest I have ever tried.'—Mr. E. GRAHAM, *Gardener to Mrs. BURNETT, Bywell House.*

Webbs' Early Purple Top.

This splendid variety continues to give the highest satisfaction. It is a distinct Turnip, of very fine flavour and handsome shape, which, in extensive and repeated trials, has proved much superior to all other early kinds.

6d. per ounce; 2s. 6d. per pint.

Webbs' Prizetaker.

The elegant shape and splendid quality of this Turnip render it a valuable variety for exhibition purposes. It is very hardy and a good keeper, whilst the flesh is white, sweet, and of unsurpassed quality.—(See *Illustration above*.)

6d. per ounce; 2s. 6d. per pint.

'Turnips.—From the first week of the last-named month till the middle of October make frequent sowings in small quantities of Webbs' Prizetaker. This is our favourite winter turnip here. It is a green, round, extremely hardy turnip, continuing to grow even when the weather is intensely cold; the flesh is beautifully white, and the quality of the best. I do not hesitate to say that after several years of repeated trials there is no other turnip that I am acquainted with that can compare with this for winter use. It keeps well when stored till quite the middle of April.'—*The Gardeners' Magazine*.

Webbs' Climax.

A very fine purple-top variety, which arrives early at maturity; it is suitable for either summer or winter cultivation, and is a first-rate keeper. The flesh is deep yellow in colour, firm, and of very mild flavour.

6d. per ounce; 2s. 6d. per pint.

'The New Climax Turnip Seed came up remarkably well, and has turned out a most productive crop. I shall certainly plant this sort next season.'—H. T. HICKMAN, Esq., Hagley.

Webbs' Scarlet Gem.

This is a flattish-round variety with bright red skin, and very smooth. The flesh is white, of good quality, and it is an excellent keeper.

6d. per ounce; 2s. 6d. per pint.

Webbs' Yellow Gem.

A superior dark yellow variety which is very solid and of splendid flavour. It is handsome in shape and matures quickly.

6d. per ounce; 2s. 6d. per pint.

Early White Milan	6	2 6

'Your Early Six Weeks Turnip has been true to its name: I never saw better Turnips in so short a time.'—Mr. H. DOBBIE, *Gardener to* F. E. WATSON, Esq., Thickthorn House.

VEGETABLE MARROW.

(*Cucurbita esculenta*.) FRENCH, *Courge à la Moëlle*.

WHERE the convenience of bottom-heat of any kind is at hand, sow early in April in pots of light loam and leaf-mould, and plunge the pots into the heating materials. Pot the plants on as required, and grow on in a frame until the end of May, when they can be planted out wherever they are intended for, under a hand-light, the protection of which they will require only for a week or two. If they can be sown in the permanent position reserved for them, dig out a space sufficient to hold a barrowful or two of fermenting materials, such as fresh horse-dung and leaves, cover the same with a few inches of soil, and sow the seeds early in May under a hand-light. The latter may be removed when all danger of frost is past.

Webbs' Large Cream.—This prolific vegetable Marrow grows to a large size and is adapted for general use. Its fruit is pale cream colour, and the flesh is firm and of excellent quality. **6d. and 1s. per packet.**

Webbs' Large Green.—A very large and handsome variety, of free bearing properties. It is solid, and the flesh is of delicate flavour.—(See *Illustration annexed*.) **6d. and 1s. per packet.**

Webbs' Large White.—The best White Vegetable Marrow. A superior variety, of very large size and handsome shape; it is firm, of capital flavour, and a prolific bearer. **6d. and 1s. per packet.**

Hibberd's Prolific. —Very prolific, early, and of choice quality	6d. and 1s. per packet.
Moore's Vegetable Cream	6d. and 1s. per packet.
Pen-y-hyd. —Of globular form and delicate flavour	6d. and 1s. per packet.
Custard. —Excellent flavour	6d. and 1s. per packet.
Muir's Hybrid. —An extra fine variety	1s. per packet.
Large Green. —A well-known variety	3d. and 6d. per packet.
Green Striped. —Productive	6d. and 1s. per packet.
Large Cream. —For general use	3d. and 6d. per packet.
Long Green Bush	6d. and 1s. per packet.
Long White Bush	6d. and 1s. per packet.
Mixed Varieties	3d. and 6d. per packet.

WEBBS' LARGE GREEN VEGETABLE MARROW.

6d. and 1s. per packet. See above.

WITLOEF.

A distinct variety of Winter Salad. Sow the seed at the beginning of June, in drills 9 inches asunder, and, when large enough, thin out the plants to six inches apart. **WEBBS' SELECTED WITLOEF.** **6d. and 1s. per packet.**

Webbs' Gold Medal Seed Potatoes.

 **Awarded Gold Medal at the National Potato Society's Show, London, 1905.**

Also Gold Medal at the Birmingham Chrysanthemum Show, 1905.

Messrs. WEBB & SONS being the most extensive growers of Seed Potatoes in the United Kingdom, supply the best varieties in large quantities on very advantageous terms. Every Potato goes through the sorters' hands several times, in order that only the most suitable for Seed purposes may be sent out.

Reduced Rates are charged per Sack, Half-Ton, and Ton.

Orders for Seed Potatoes of 20s. value delivered Carriage Free.

FIRST EARLY POTATOES.

WEBBS' NEW EARLY POTATO—"COLONIST." From a Photograph taken at our Kinver Seed Farms. *See below.*

Webbs' New Early Potato—"Colonist."—We are fortunate in being in a position to offer this new variety, as we consider it the finest early potato ever introduced. It is a remarkable disease resister, a very heavy cropper, whilst the quality is everything that can be desired, the flesh being white and mealy when cooked. It is kidney-shaped, has smooth skin, shallow eye, and will become popular on the exhibition table.—(*See Illustration above.*)

4s. per peck of 14 lbs.; 14s. per bushel of 56 lbs.

'Potatoes.—Of the several fresh varieties grown this season Webbs' Colonist comes out on the top. It is an early potato of very high quality, kidney-shaped, flesh white and mealy, and a very heavy cropper. I am agreeably surprised with the returns from this variety, and hope to grow it more extensively as an early kind. There has been so many new varieties offered in recent years that one gets a trifle sceptical of their accredited good qualities.'—T. H. SLADE, Poltimore Gardens, in *The Gardeners' Magazine* of Sept. 29, 1906.

Webbs' Express.—This is a most valuable variety for early use, as it arrives quickly at maturity. It is a seedling from Beauty of Hebron, and comes into use even before that well-known Potato. The tubers are of good size, kidney shaped, with clear, smooth skin, whilst the flesh is white, firm, and of the finest quality. It cooks well when first lifted, and is also an excellent keeper.

3s. 6d. per peck of 14 lbs.; 12s. per bushel of 56 lbs.

FIRST EARLY POTATOES—*continued.*

Webbs' Improved Ashleaf.—This selection is universally appreciated owing to its high-class qualities. It has short haulm, is a remarkably heavy cropper, of splendid flavour, and handsome appearance; whilst for forcing purposes it is without an equal.

4s. per peck of 14 lbs.; **14s.** per bushel of 56 lbs.

	Per peck of 14 lbs.		Per bushel of 56 lbs.			Per peck of 14 lbs.		Per bushel of 56 lbs.

SECOND EARLY POTATOES.

☛ *Reduced Rates for large quantities of potatoes upon application.*

Any other variety not mentioned in this List can be supplied; prices upon application.

WEBBS' NEW GUARDIAN POTATO. *See below.*

Webbs' New Guardian.—A new white kidney variety for mid-season. It is a wonderful cropper, a good keeper, and of first-class table quality. It has been under cultivation at our Kinver Trial Grounds for several seasons, and we find it all that a good Potato should be; it is exceptionally hardy, and during the time we have had it under observation we have not found a tuber affected by disease.—(See Illustration above.)

3s. 6d. per peck of 14 lbs.; **12s.** per bushel of 56 lbs.

Webbs' Celebrated Seed Potatoes were awarded a Gold Medal at the Birmingham Chrysanthemum Society's Show, 1905.

SECOND EARLY POTATOES—continued.

WEBBS' WORDSLEY PRIDE POTATO. See below.

Webbs' Wordsley Pride.—A very superior second early kidney, and an extraordinary cropper, producing an abundance of large, handsome tubers suitable for exhibition purposes, and equally valuable for table use. The skin is white, very smooth, with few eyes, whilst the flesh is fine-grained, exceedingly white, and of first-class quality.—(See *Illustration above*.)

3s. per peck of 14 lbs. ; **10s. 6d.** per bushel of 56 lbs.

Royal Kidney. —A heavy cropping variety	3	0	10	6
Early Regent. —Very white flesh of superior flavour	3	0	10	6

Webbs' Surprise.—Webbs' Surprise Potato maintains its high character as one of the best second early kidneys ever offered. The tubers are large, exceedingly handsome in shape, with small eyes, and unsurpassed for cooking properties, being snowy white, very mealy, and of the finest flavour ; it is a remarkably heavy cropper.

Wonderful Red Kidney. —A large cropper of fine flavour	3	6	12	0
White Elephant. —A heavy cropper of good quality	2	6	8	6

'I must tell you how pleased I feel with your New Guardian Potato. I purchased 14 lbs. from you in the spring. They were overlooked in the bag and were all shrivelled, with spurts over a foot long ; these were all rubbed carefully off, and planted the end of May in some rather rough heavy ground. I never thought they would do any good. I was half inclined to throw them away ; however, we lifted them at the end of September and they yielded 214 lbs. of splendid tubers, clean and free from any disease.'—Mr. EDWARD JONES, Rhiewport Gardens.

'The Wordsley Pride Potatoes were splendid, some of them over 15 inches round, and when cooked were excellent.'—Mr. W. WARDMAN, Hawcoat.

Webbs' Celebrated Seed Potatoes were awarded a Gold Medal at the National Potato Society's Show, London, 1905.

MAIN CROP POTATOES.

WEBBS' PROGRESS POTATO. *See below.*

Webbs' New Majestic.—This new variety is destined to become a favourite in general cultivation, as it combines all the best qualities of a potato, being a heavy cropper, good cooker, and free from disease. It is a main crop variety, flattish-round in shape, has white flesh, and is valuable alike for exhibition or table purposes.

3s. 6d. per peck of 14 lbs. ; **12s.** per bushel of 56 lbs.

'Potatoes.—The Wordsley Potatoes are carefully tested by extensive trials. Gold-finder is maintaining its early reputation, and other varieties likely to attain the same prominence are Industry and Record. Selection again amongst Potatoes is what this Worcestershire firm rigidly adheres to, knowing so well that it is only by this the popular tuber can be kept perfect.'—*THE JOURNAL OF HORTICULTURE.*

Webbs' Industry.—A very fine main crop variety, of strong and robust constitution, and a wonderfully heavy cropper. The tubers, which are flattish-round in shape, grow to a large size, and keep remarkably well until very late in the season. The flesh is white and floury when cooked, and of exceedingly fine quality.

3s. per peck of 14 lbs. ; **10s. 6d.** per bushel of 56 lbs.

'I have been very successful with your Potatoes. At our local Flower Show I took First Prize for the best collection of Potatoes. I also secured First Prize for best collection of Vegetables offered by you. At the Monmouth Show I was again successful, and took First Prize in the open class for a collection of Potatoes. Also First Prize for the best dish of Kidney Potatoes. In the Amateur class I took the First Prize both for kidney and round varieties, thus taking every First Prize offered for Potatoes out of 65 entries.'—Mr. WALTER HASKINS, Church Farm.

'Webbs' Industry Potato has turned out well ; I have this week lifted a splendid crop of large, clean, and handsome tubers of first-class quality. It is also a grand variety for exhibition purposes.'—Mr. G. NEWELL, *Gardener to W. C. B. CAVE, Esq., Wellington Lodge.*

Webbs' Progress.—This main crop Potato is of very strong and vigorous habit of growth, exceedingly prolific, and most valuable for either table or exhibition use. The tubers are long and of large size, with few and very shallow eyes, whilst the flavour of its white mealy flesh is all that can be desired.—*(See Illustration above.)*

3s. per peck of 14 lbs. ; **10s. 6d.** per bushel of 56 lbs.

'Your Progress Potato is the best I have ever grown. I took six up last Saturday that weighed 1 lb. each.'—Mr. E. H. HUNT, *Gardener to JOSHUA BOWERS, Esq., Meanwood Park.*

'I had 7 lbs. of your Progress Potatoes which yielded 77 lbs., all free from disease. Six of the tubers weighed 8 lbs.'—Mr. WALTER CHAPMAN, Comberton.

'The Seeds I had from you last spring did exceedingly well. At the Craven Agricultural Show I won the Championship—a silver Medal—for the best tubers in the Show with your Gold-finder Potato against 75 competitors. I was also awarded the Bronze Medal for your Prizetaker Turnips.'—Mr. C. HILL, Kildwick.

'Some one gave one of my men two of Webbs' Progress Potatoes to try, and he gave them to me. The two potatoes weighed 6 ozs. ; I cut each potato into three pieces, and after planting them I have 39 lbs. from them. The largest potato was 1½ lbs., and more than half of them weighed over a lb. each.'—Mr. C. A. BAYFORD, Shugborough Gardens.

Orders for Seed Potatoes of 20s. value Carriage Free.

MAIN CROP POTATOES—*continued.*

WEBBS' NEW "UMPIRE" POTATO. From a Photograph taken at our Kinver Seed Farms. *See below.*

Webbs' New "Umpire."—This superior new Potato is one of our own raising, having been originated at our Kinver Seed Farms. It is a late main crop variety, exceedingly productive, of fine quality and handsome appearance; the tubers are oval in shape with yellow flesh, and hitherto have shown no sign of disease. The cooking qualities of this new variety are unsurpassed, and we have the utmost confidence in recommending it.—(*See Illustration above.*) **5s. per peck.**

Webbs' Gold-finder.—A most handsome white-skinned main crop variety, very productive, and of robust habit of growth. The tubers are round, slightly flattened, and of large and uniform size; the flesh is white, fine-grained and of unsurpassed quality when cooked. **3s. per peck of 14 lbs.; 10s. 6d. per bushel of 56 lbs.**

'I am well satisfied with the Potatoes you sent me; they are a very good sample, grand eaters and excellent croppers.'—Mr. JOHN ELSTON, Draycott.

'I beg to inform you that the Potatoes I had of you this season have given great satisfaction. I dug 103 lbs. out of the few pounds I had.'—Mr. WILLIAM DIMENT, Corscombe.

Webbs' Empire.—A new and desirable main crop variety of our own raising, that has for some years undergone most exhaustive trials on our seed farms. The tubers are flattish-round in shape, white, of good average size, and of most excellent cooking qualities. It is a heavy cropper, and a first-class keeper. **4s. per peck of 14 lbs.; 14s. per bushel of 56 lbs.**

Evergood (Findlay).—It is oval in shape, has a fine clear skin, whilst its cropping qualities are extraordinary. **3s. per peck of 14 lbs.; 10s. 6d. per bushel of 56 lbs.**

MAIN CROP POTATOES—continued.

WEBBS' NEW "CHIEFTAIN" POTATO. From a Photograph taken at our Kinver Seed Farms. See below.

Webbs' New "Chieftain."—Among the many new varieties introduced in recent years our new Chieftain will take a very high place for the main crop. It is a white oval-shaped variety, which crops very heavily and keeps well, **NOVELTY.** having hitherto proved quite free from disease. It is a good cooker, and will also be found a valuable addition to the exhibition varieties.—(See *Illustration above.*) **4s. per peck of 14 lbs. ; 14s. per bushel of 56 lbs.**

Webbs' Record.—Awarded First Prize at Birmingham in the class for a new variety. Like our other varieties of home-bred Potatoes, this valuable addition is strongly recommended. It is a white kidney-shaped main crop variety, strong in habit of growth, and for cropping, cooking, and keeping qualities all that can be desired.

3s. per peck of 14 lbs. ; 10s. 6d. per bushel of 56 lbs.

Goodfellow (Findlay).—This white round main crop Potato is a vigorous grower and very hardy. It is an exceptionally heavy cropper, producing even-sized tubers of good cooking quality. It also keeps well.

3s. per peck of 14 lbs. ; 10s. 6d. per bushel of 56 lbs.

Empress Queen (Findlay).—A kidney-shaped variety of the finest cooking quality. For cropping it has few equals, and it also resists the disease. This Potato is highly recommended by those who have grown it.

3s. 3d. per peck of 14 lbs. ; 11s. per bushel of 56 lbs.

'I have taken up my Potatoes. The Up-to-Date Seed I had from you turned out just a bag and quarter to the yard (160 lbs. to the bag),—very few diseased and a good sample. Local seed put in by the side, with same treatment, nearly half diseased and a slight crop. Your 14 lbs. Seed of Guardian turned out 207 lbs. The 7 lbs. of Colonist 110 lbs., and the 7 lbs. of Chieftain 126 lbs., and all good samples.'—R. B. ASHTON, Esq., Portland House.

MAIN CROP POTATOES—*continued.*

WEBBS' NEW POTATO FOR 1907—"PROVIDER." See below.

Webbs' New Potato for 1907— "Provider."

In offering this new white round main crop variety we feel sure it will give every satisfaction, both for its cropping and cooking qualities. It is a robust grower and an extraordinary disease resister.—(See *Illustration above.*)

WEBBS' GENERAL LIST OF FLOWER SEEDS.

THE following List contains a selection of the best and most popular Annual, Biennial, and Perennial Flower Seeds. Larger packets than those priced may be had, and any kinds not enumerated can be supplied at advertised prices. If Flower Seeds are ordered by numbers, please give date of the Catalogue from which they are taken, as the numbers are changed in each issue.

ANNUALS are plants which flower, produce seeds, and die the same year as they are sown; Biennials, those which are sown one year, bear their flowers and seeds and die the next; under the term 'Perennials' are classified those which grow and flower for several years; and included in one or other of these classes are hundreds of floral gems—many of which are indeed amongst the most beautiful members of the vegetable kingdom.

IMPORTANT.—Instructions for Cultivation are on every packet of Webbs' Flower Seeds. Webb & Sons send all Flower Seeds free by Post or Rail to any part of the United Kingdom; and Flower Seeds to the value of 10s. free to any part of the World.

WEBBS' NEW ASTER FOR 1907—"Mammoth White." From a Photograph taken at our Kinver Seed Farms. 1. 1s. 6d. per packet. See below.

ASTER.

These noble flowers are universal favourites. Webbs' Victoria and Webbs' Pæony-flowered are very fine Asters, being large and perfectly double; Webbs' Chrysanthemum-flowered is a beautiful dwarf variety, which comes into bloom later in the season than all other varieties; and Webbs' New Bedding, Mammoth White, Salmon King, Decoration, Victoria, Ostrich Plume, Peerless and Snowflake, are very superior kinds; *half-hardy annuals*.

1. WEBBS' NEW ASTER FOR 1907—

"Mammoth White."—(See ILLUSTRATION above.)

Novelty. A remarkably fine variety growing about 18 inches high, bearing strong stems and of branching habit. The blooms are pure white with very long petals, and under good cultivation enormous flowers are produced which are valuable for cutting or exhibition purposes. . . . per packet, 1s. 6d.

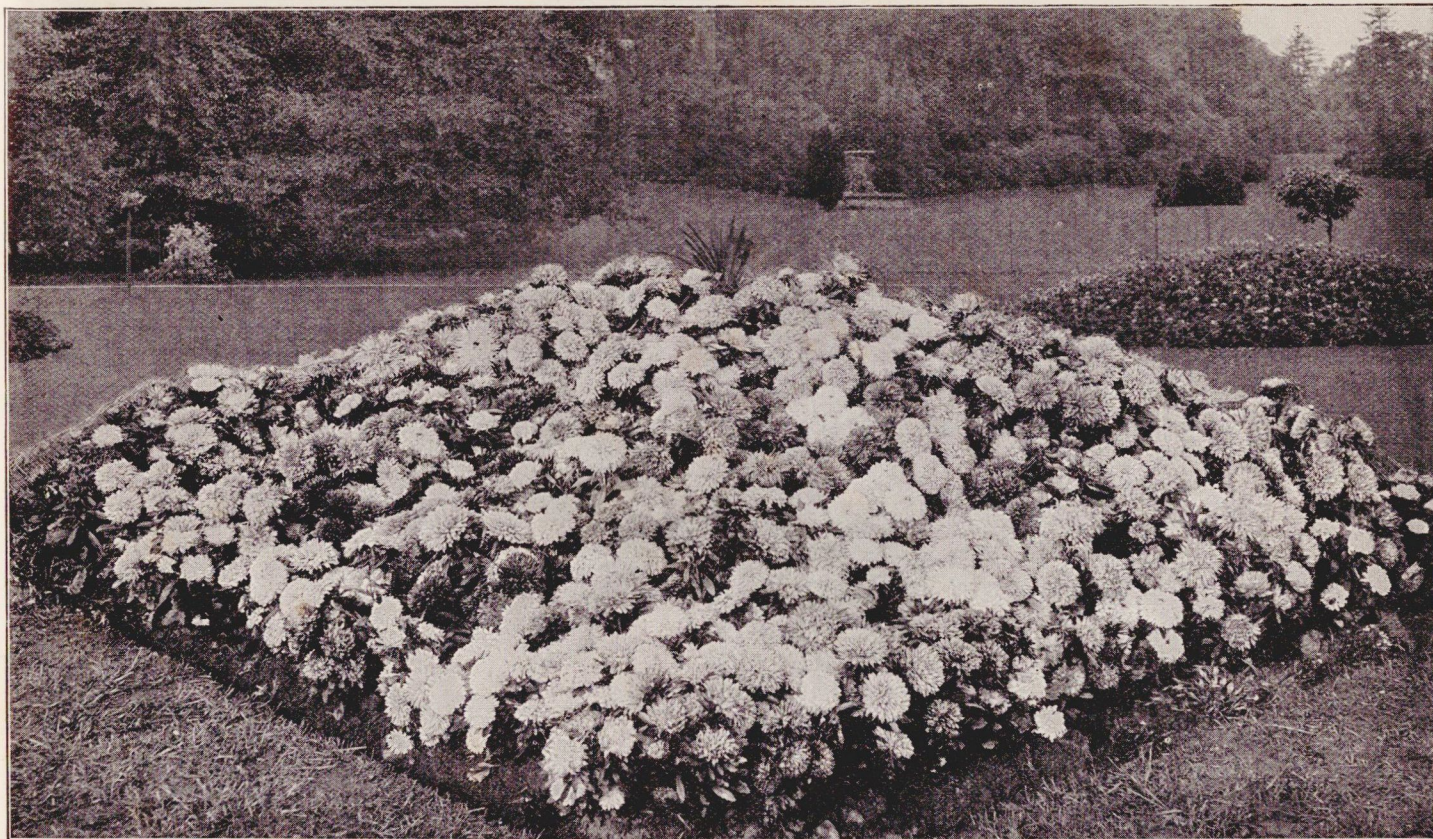

'I obtained First Prize with your Decoration Aster at Carisbrooke Show against seven competitors. They were very much admired by the Judge and fellow-gardeners.'—Mr. W. E. WICKENS, The Woodlands.

2. Webbs' New Aster "Salmon King."

Novelty. A very showy variety of the large-flowered type of Asters. The blooms are bright salmon-rose in colour and have curled petals. It is most valuable for cutting. per packet, 1s. 6d.

'Your Seeds give great satisfaction here. I don't remember ever having a better lot of Asters, Stocks, Phlox Drummondii, etc., than I had this last summer. I have also as usual a grand lot of Primulas of your "Exquisite" strain.'—Mr. E. BUTLER, Gardener to Lt.-Col. CRICHTON BROWNE, Easton Court.

ASTER—continued.

WEBBS' BEDDING ASTER. *See below.*

Webbs' Bedding

Webbs' Bedding (see ILLUSTRATION above), specially recommended for bedding purposes, producing a magnificent effect when planted in masses of separate colours in the open garden. The plants are dwarf and compact in habit of growth, and the varieties uniform in time of flowering.

	<i>Per packet.</i>	<i>s.</i>	<i>d.</i>

33.	CHINA, mixed, 1½ ft.			3

34. **Aster, Perennial, Mixed** (*Michaelmas Daisy*).

Large-flowered hybrids, very attractive for autumn flowering. Flowers of varied tints, easy of cultivation and hardy.

per packet, 1s. 6d.

'China Aster.—One of these beautiful types is Webbs' Snowflake Aster, a single white variety growing about a foot in height and producing a wonderful quantity of blossom. China Asters vary immensely in height in different sections, but that named is a good average, being suitable either for bedding or cut flowers and even for pot culture. The accompanying illustration shows the typical form of the flower, which is of good average size for this race, and gracefully built up without being formal like those of the Quilled Asters or even the Chrysanthemum type.'—THE GARDENING WORLD.

'I gained 3 First and 3 Second Prizes with Asters grown from your Seed at Shortley Bridge and Staley Flower Shows last year.'—Mr. T. F. STORBS, Quarry House.

ASTER—continued.

OSTRICH PLUME ASTER.

1s. 6d. per packet. See page 73.

35. **Webbs' New Lilac Gem.** *Novelty.* Quite a unique and distinct colour amongst Asters, the flowers being of a delicate silvery lilac. The plant attains a height of about 12 inches, and is an abundant bloomer . . . per packet, 1s. 0d.
36. **Webbs' New Coronet.** *Novelty.* This is an entirely new variety of the Comet type of Aster. It is dwarf and sturdy in habit, producing an abundance of pure white flowers, and is particularly suitable for growing in pots . . . per packet, 1s. 6d.
37. **Webbs' New Decoration.** (See PLATE facing this page.) *Novelty.* This novelty is an improvement on Queen of the Market, being earlier and producing blooms of nearly double the size of that variety. The flowers are white, and similar in form to the Comet Aster . . . per packet, 1s. 6d.

'Stocks and Asters grown from Webbs' Seeds took the First Prizes at our Show; and the Helichrysums were very much admired.'—Mr. JOHN RUDD, Wooddalling.

'The Seeds, both Flower and Vegetable, turned out well. The Stocks, Asters, and Zinnias were simply grand.'—Mr. W. E. WICKENS, Gardener to R. R. PITTER, Esq., Lugley House.

'I took First Prize for your Victoria Asters 3 years in succession at Moor Park Flower Show.'—Mr. HERBERT ELEMENT Croxley.

Webbs' Pæony-flowered. These magnificent Asters are a great improvement on the ordinary Pæony-flowering varieties; 1½ ft.

64. 6 „ „ „	1s. 6d.

'I was awarded First and Second Prizes for your Victoria Asters at our Show.'—Mr. W. H. GADDEN, Church Cottage.

'The Asters from your Seed (White Queen) were splendid, the plants being literally covered with blooms.'—Mr. C. S. FAIRHEAD, Birch Hall.

'I think you will like to know that the flowers grown from the Seeds you sent Mrs. Hewett were splendid. The Asters were better than we ever had, and the Zinnias and Stocks were very fine, as also were many of the other annuals.'—Mrs. HEWETT, Leckford.

'May I say how pleased I was with all the Seeds you sent me last year. My gardener took First Prize with Asters, while the Tomatoes, Celery, and Carrots were especially good.'—R. S. AGER, Esq., Westfield Lodge.

WEBBS' SUPERB ASTERS.

No. 1—Webbs' Peerless. No. 2—Webbs' New Decoration. No. 3—Webbs' Victoria.
No. 4—Webbs' Snowflake. No. 5—Webbs' Ostrich Plume.

ASTER—continued.

65. **Webbs' New Cardinal.** Novelty. A compact-growing variety about 9 inches in height; its beautiful intense deep crimson coloured flowers are most effective for bedding purposes *per packet* 1s. 0d.

Webbs' Victoria (see PLATE facing page 74), a strain of great merit, including many new and charming colours; the flowers are large, beautifully imbricated, and perfect in form. We can highly recommend this Aster as a decorative and exhibition variety; 1½ ft.

| 169. Grandiflora , crimson, 6 in. | 6 |
| 170. Persicum , rose, 6 in. | 6 |

ARCTOTIS.

Ornamental plants for border decoration.

- | | |
|---|-----|
| 171. Breviscapa , orange and crimson, 6 in., <i>half-hardy perennial</i> | 3 |
| 172. Grandis , a handsome new annual which grows about 2 to 2½ ft. high. The flowers measure from 2½ to 3 inches across, and are very showy, the ray florets being pure white with narrow yellow zone at base, whilst the reverse side of petals is pale lilac | 1 0 |

'I am quite certain that better Seeds could not possibly be had than yours. I have sown no others for the last 11 years, and have never had a failure yet.'—Mr. THOS. POOLE, The Gardens, Burneston Vicarage.

'All Webbs' Seeds have given me the greatest satisfaction.'—Mr. W. DYER, Patrichbourne Rectory Gardens.

AURICULA.

173. **Webbs' Defiance** (see ILLUSTRATION annexed), saved from the finest stage varieties. This charming spring flower is deserving of extended culture; it will bloom in shaded situations in the open ground, but it requires pot-cultivation and the protection of a cool frame to bring it to perfection; mixed, 6 in., *hardy perennial* *per packet*, 2s. 6d.
174. **Webbs' Defiance**, smaller packet, 1s. 0d.

ABRONIA.

Pretty trailing plants, with verbena-like flowers, that are deliciously fragrant.

Per packet. s. d.

175. **Arenaria**, yellow, *half-hardy perennial* 6
176. **Umbellata**, rosy lilac, *half-hardy annual* 3

AMMOBIUM.

Curious everlasting flowers, with winged stems; *hardy perennials*.

177. **Alatum**, white, 1½ ft. 3
178. **Alatum grandiflorum**, white, 2 ft. 6

AMBYOLEPIS.

179. **Amblyolepis setigera**, a sweet-scented hardy annual, suitable for borders; yellow, 1 ft. 3

ACROCLINIUM.

Beautiful daisy-like everlasting flowers; useful for winter bouquets, vases, and other decorative purposes; *half-hardy annuals*.

180. **Album**, white, 2 ft. 3
181. **Roseum**, rose, 2 ft. 3
182. **Roseum, flore pleno**, rose, 2 ft. 6

AMARANTH, GLOBE.

Everlasting flowers; very useful for bouquets and conservatory decoration; *half-hardy annuals*.

183. **Nana compacta**, violet-red, 6 in. 6
184. **Mixed**, 1 ft. 3
185. **6 varieties**, separate, 1s. 6d.

WEBBS' NEW ROSY MORN AGERATUM.

148. 1s. *per packet*. See page 78.

WEBBS' DEFIANCE AURICULA.

173. 2s. 6d. *per packet*. 174. *Smaller packet*, 1s. See above.

ANAGALLIS.

Very pretty for rock-work and the edgings of beds; *half-hardy annuals*.

Per packet. s. d.

186. **Cærulea**, blue, 6 in. 3
187. **Grandiflora rubra**, scarlet, 6 in. 3
188. **Grandiflora carnea**, flesh colour, 6 in. 3

AMBROSIA.

189. **Ambrosia Mexicana**, a very fragrant hardy annual; yellow, 2 ft. 3

ABUTILON.

190. **Webbs' Choice**, a showy greenhouse shrub, which grows 6 to 8 ft. high, with beautiful bell-shaped flowers; mixed 1 0
191. **Webbs' Choice**, larger packet 2 6

WEBBS' GOLD MEDAL BEGONIAS.

Awarded Gold and Silver Medals at London, Shrewsbury, Wolverhampton, and many other important Shows. Splendid plants for the decoration of greenhouses; the seeds we offer have been saved from the best varieties in commerce; *greenhouse perennials*.

WEBBS' TUBEROUS-ROOTED DOUBLE BEGONIA. 192. 2s. 6d. per packet. 193. Larger packet, 5s. See below.

192. **Webbs' Tuberous-rooted Double Begonia** (see ILLUSTRATION above). This superior strain may be depended upon to produce a fair percentage of double flowers of large size, and in a great variety of the most beautiful colours; mixed, 1 ft. The seed has been saved from the collection of plants exhibited by us at the principal shows, and which secured so many high Awards 2s. 6d. per packet.
193. Larger packet 5s. 0d.

'We have some very fine flowers of Double Begonias from your Seeds in every colour that we get in Begonias. The blooms are equal to named varieties.'—Mr. GEO. MERRY, The Ashe Gardens.

'I have a magnificent show of bloom from your Double Begonia Seed, some quite four and five inches across them. Every one says they are lovely.'—Mr. WM. CARTER, *Gardener to* C. E. ASHFIELD, Esq., Hazelhurst.

WEBBS' GOLD MEDAL BEGONIAS—continued.

WEBBS' TUBEROUS-ROOTED SINGLE BEGONIAS. 194. 2s. 6d. per packet. 195. Smaller packet, 1s. 6d. See below.

194. **Webbs' Tuberous-rooted Single Begonia** (see ILLUSTRATION above). This splendid strain of Tuberous-rooted Begonia, which has been hybridised with great care, is unequalled for the size of its blooms and their variety and richness of colour. The seed, having been saved from the newest and most beautiful kinds, will produce many interesting additions to this popular class of plants. Cannot be too highly recommended; mixed, 1 ft. 2s. 6d. per packet.
195. Smaller packet 1s. 6d.
196. **Webbs' New Crested (Single).** This admirable strain of single Tuberous-rooted Begonia is quite a novelty, the flowers, which are of various colours, being bearded and fringed in a most interesting and attractive manner 2s. 6d. per packet.
197. FRIEBELI, scarlet, 1 ft., half-hardy perennial Per packet. s. d. 1 6
198. SEDENI VICTORIA, brilliant scarlet, 1 ft. 1 6
199. STRIPED TUBEROUS-ROOTED, mixed, 1 ft. 1 6
200. FIBROUS-ROOTED, mixed, valuable for bedding purposes or for greenhouse decoration 1 6

For Begonia Bulbs, see page 145.

'I raised over 400 plants from a packet of Begonia Seed, many of which had exceedingly fine blooms, of deep rich colour and varied hues.'—W. HILLIER, Esq., Bulkington.

'We are very pleased with your Crested Tuberous-rooted Begonias; we have them in all the shades of colour. They are very interesting and every one should grow them.'—Mr. GEO. MERRY, The Ashe Gardens.

BARTONIA.

201. **Bartonia aurea**, an exceedingly showy and free-flowering hardy annual; yellow, 1 ft. Per packet. s. d. 3

BEET.

Ornamental-foliaged plants, useful for ribbon-gardening; hardy annuals.

202. **Webbs' Bedding**, dark foliage, 1 ft. 6
203. **Ornamental Chilian**, variegated foliage, 2 ft. 6

BROWALLIA.

Half-hardy annuals, very useful for conservatory decoration.

204. **Elata**, blue, 1½ ft. Per packet. s. d. 3
205. **Elata alba**, white, 1½ ft. 3

BALM OF GILEAD.

206. **Balm of Gilead**, a sweet-scented hardy perennial; light purple, 2 ft. 3

BALSAM.

Very popular and exceedingly beautiful plants, suitable for greenhouse decoration, and for massing in the flower-garden during the summer months. They produce gorgeous clusters of large double flowers abundantly, in all shades of colour from white to crimson : *tender annuals*.

207. **Webbs' New Miniature.** Novelty. A dwarf and compact strain of this popular flower. The plants rarely exceed a foot in height, and are most profusely furnished with beautiful double flowers in a great variety of colours . . . *per packet, 1s. 0d.*
208. **Webbs' Peacock,** a beautiful and very compact-growing strain of this favourite flower. The blooms are large and very double, whilst the colours are exceedingly rich and effective; mixed, 18 in. *per packet, 1s. 0d.*
209. **Webbs' Camellia-flowered,** large double flowers, including beautifully striped and spotted ones; mixed, 2 ft. *per packet, 1s. 0d.*
210. **Webbs' Camellia-flowered,** smaller packet, 6d.
211. 12 choice varieties, separate 3s. 6d.
212. 6 „ „ „ 2s. 0d.
213. **Webbs' Rose-flowered,** flowers principally self-colours, very large and double; mixed, 2 ft. *per packet, 1s. 0d.*
214. **Webbs' Rose-flowered** . . . smaller packet, 6d.
215. 12 choice varieties, separate 3s. 6d.
216. 6 „ „ „ 2s. 0d.
217. **Balsam, mixed varieties,** 2 ft. *per packet, 6d.*

BELLIS PERENNIS ("Double Daisies").

Well-known plants ; valuable for spring bedding ; *hardy perennials*.

			<i>Per packet.</i>	<i>s.</i>	<i>d.</i>
218.	Flore pleno,	mixed, 3 in.		1	0
219.	„	“Longfellow,” rose, 3 in.		1	0

BRACHYCOME.

Neat and compact half-hardy annuals, with numerous cineraria-like flowers.

- | | | | | | | | | |
|--|---|---|---|---|---|---|---|---|
| 220. Iberidifolia , blue, 9 in. | . | . | . | . | . | . | . | 3 |
| 221. Iberidifolia alba , white, 9 in. | . | . | . | . | . | . | . | 3 |

'The Coleus Seed I had from you last year far surpasses any seed I have had from any firm. The colour and markings were something grand, and the plant was of excellent habit in growth.'—MR. GEO. HUBBARD, The Gardens, Nantclwyd Hall.

WEBBS' NEW CORONET CANDYTUFT.

399. 1s. *per packet.* See page 92.

COLEUS.

Our seeds of these handsome ornamental-leaved plants have been saved from splendid collections; *half-hardy perennials*.

- 222. Webbs' New "Sunset."**—The leaves are most beautifully variegated with nearly every shade of colour, and are more than double the size of those of the ordinary Coleus. Being of strong habit of growth, it forms a valuable addition to this splendid race of foliated plants; variegated foliage, 2 ft.
per packet, 2s. 6d.
- 223. Webbs' Exhibition** (see ILLUSTRATION below). For richness and variety of colouring, as well as for luxuriance of foliage, our "Exhibition" strain of this handsome ornamental-leaved plant is strongly recommended; variegated foliage, 1½ ft.
per packet, 1s. 6d.
- 224. Coleus, 12 splendid varieties,** separate 3s. 6d.
- 225. " 6 " " "** 2s. 0d.

WEBBS' EXHIBITION COLEUS. 223. 1s. 6d. per packet. See above.

CALANDRINIA.

These pretty flowers grow freely in any good garden soil ; *hardy annuals*.

		<i>Per packet.</i>	<i>s.</i>	<i>d.</i>
226.	Grandiflora , rose, 1 ft.	.	.	3
227.	Speciosa , purple, 6 in.	.	.	3
228.	Speciosa alba , white, 6 in.	.	.	3
229.	Umbellata , a trailing plant; crimson, <i>perennial</i>	.	.	3

CERASTIUM.

Small silver-foliaged plants, excellent for edgings ; *hardy perennials*.

- | | |
|--|---|
| 230. Biebersteini , white foliage, 6 in. | 6 |
| 231. Tomentosum (see ILLUSTRATION, page 90), white foliage, 6 in. | 6 |

CARNATION.

Invaluable for their delicious scent and abundance of bloom ; saved from the finest named kinds ; *hardy perennials*.

232. **Webbs' Imperial** (see ILLUSTRATION annexed).—

The value of this plant for nearly every purpose for which flowers are in demand is now universally recognised. Our Imperial strain may be depended upon to produce a splendid assortment of perfectly-formed flowers in nearly every shade of colour ; **mixed**, 2 ft.,

per packet, 2s. 6d.

233. **Ditto**, larger packet

5s. 0d.

'I have a beautiful bed of Carnations grown from a sixpenny packet of your Mixed Border Seed. I could cut hundreds of blooms, for the most part double ones, and of good colours.'—FRED. R. BRITTON, Esq., The Bank House.

'The quality of the Carnations from your 3s. 6d. packet of Seed could not be better if I had paid three times the price. Whenever they have been shown during the last two years they have always been in the 1st Prize Collection.'—MR. J. URWIN, Spenny Moor.

'Webb & Sons' Trial Grounds.—Carnations are cultivated here very largely, and amongst the enormous quantities of seedlings were blooms that had both good form and the best colours to recommend them.'—'THE GARDEN.'

'The Carnation Seed I had from you last year has done splendidly. The flowers were the admiration of all who saw them.'—MR. T. PRICE, Weobley.

'The five-shilling packet of Carnation Seed I had of you (two years ago) turned out magnificently—fully eighty per cent double, and some of the blooms quite unique ; they are a grand lot, and have grown into beautiful plants.'—W. E. HAMMOND, Esq., Newark-on-Trent.

'I again took First Prize with Webb's Carnations at our Show ; this is the eighth year in succession. I think I have now good reason to class them A1. I took sixteen Prizes altogether.'—MR. W. RICHARDS, Bishop's Castle.

'We are much pleased with the Imperial Carnations.'—REV. M. H. E. R. JERVIS, Bures Vicarage.

'Webbs' Kinver Trial Grounds.—Carnations from seed are extensively grown, and over eighty per cent of them come double. As all the best of them are propagated from layers it follows that the quality of the strain continues to be improved. The same object would also be effected by marking the best and saving them for seed. Webb's Imperial is the name of the strain. A very large plantation was in full bloom, so that the individual merits of every plant could be noted. Colours are not saved separately, as that would scarcely answer any particular purpose.'—'THE GARDENING WORLD.'

WEBBS' IMPERIAL CARNATION.

232. 2s. 6d. per packet. 233. Larger packet, 5s. See above.

CARNATION—continued.

234. **Webbs' New Perpetual Bouquet Carnation** (see ILLUSTRATION below). **Novelty.** A remarkably early and perpetual blooming strain, growing 18 inches in height, and producing an abundance of beautiful flowers in a variety of colours in from 6 to 8 months from the time of sowing. Equally valuable for outside and inside cultivation, *per packet*, 1s. 6d.
235. **Larger packet** 2s. 6d.
236. **Webbs' Choice**, this strain is remarkable for dwarf and compact habit of growth, and for its large assortment of richly-coloured and superbly-marked flowers, which are produced in the greatest profusion; mixed, 2 ft. *per packet*, 2s. 6d.
237. **Ditto**, smaller packet 1s. 6d.
238. **Carnation, Grenadin**, charming double flowers, very early and free-flowering; brilliant scarlet, 2 ft. 1 0

'Having dealt with you for the past six years is, I think, good testimony to the value of your Seeds. I consider you serve us well both for Flower and Vegetable Seeds. Your Border Carnations were a perfect picture last year. The Zinnias also did remarkably well.'—Mr. F. RUIF, *Gardener to* L. H. ELKINGTON, Esq., Manor House.

'I am pleased to say that I have found your Vegetable and Flower Seeds, during the 20 years I have tried them, give far better results than those obtained from other firms. I took several first class prizes this year with the produce.'—Mr. EDWARD HAWKINS, Rock Villa.

'My man considers the Seeds he had from you remarkably good.'—ISAAC MORRIS, Esq., North View

WEBBS' NEW PERPETUAL BOUQUET CARNATION.

234. 1s. 6d. *per packet*. 235. *Larger packet*, 2s. 6d. See above.

267. „ **mixed**, 3 to 7 ft. 6
268. „ **12 fine varieties**, separate 2s. 6d.

CATCHFLY.

Useful and profuse-blooming hardy annuals, suitable for beds and borders.

269. **Lobel's**, red, 1½ ft. 3
270. „ **white**, 1½ ft. 3

CATANANCHE.

Free-blooming everlasting flowers of graceful habit; *hardy perennials*.

271. **Bicolor**, white and blue, 2 ft. 3
272. **Cærulea**, blue, 2 ft. 3

'The New Dianthus, named **Salmon Queen**, introduced by Messrs. Webb & Sons, of Stourbridge, is a valuable addition to the existing varieties of the Indian Pink. The flowers of a beautiful salmon colour, are laciniated, and present a very effective appearance. Messrs. Webb & Sons are also sending out a new Celosia, called **New Oriental**, the colours of which range from yellow to the deepest blood-red.'—'GARDEN LIFE.'

WEBBS' PRIZE MEDAL CALCEOLARIA.

Awarded the Banksian Medal at the Great Temple Show, London, and many other Honours.

WEBBS' SUPERB CALCEOLARIA. From a Photograph of one of our Seed Houses at Wordsley.

273. 2s. 6d. per packet. 274. Smaller packet, 1s. 6d. 275. Extra large packet, 5s. See below.

273. **Webbs' Superb Calceolaria.**—(See ILLUSTRATION above.) This magnificent strain of Calceolaria was carefully saved from a remarkably fine prize collection of plants grown in our Seed Houses at Wordsley, being of the most compact habit, and bearing masses of flowers of great size and exquisite shape, in almost every shade of colour, beautifully spotted and blotched, which presented an appearance of brilliancy and regularity that is rarely seen; mixed, 2 feet, greenhouse perennial . . . per packet, 2s. 6d.

274. **Webbs' Superb** . . . smaller packet, 1s. 6d.

275. **Webbs' Superb** . . . extra large packet, 5s. 0d.

'We have a grand show of Flowers from your Seed. Cinerarias are the very finest I have ever seen, such glorious colours; and the Calceolarias are just perfection. Our gardener is very pleased with them.'—Mrs. E. HEWITT, Hillside.

'The Calceolaria Seed you sent me last year turned out grand. They were the admiration of all my neighbours.'—Mr. W. BRADBURY, Lozells.

'I had a beautiful show of Webbs' Superb Calceolarias from a small packet of seed. The large-flowering Sweet Peas have also done well.'—Mr. J. MURBY, *Gardener to Mrs. CAZENOVE*, Forest Grove.

'The Calceolaria Seed Mrs. Warner had last year has turned out a most beautiful and varied show of flowers.'—Mrs. WARNER, Ipsley Mount.

'I beg to say that all of your Seeds gave every satisfaction, and are of the best quality. I may also say Webbs' Seeds are gaining favour very fast in the Cleveland district.'—Mr. WILLIAM PERCIVAL, South Banks.

'The Great Temple Show, London.—Calceolarias of the herbaceous type were staged by Messrs. Webb & Sons, Stourbridge, and a remarkably fine strain it is. The colours are clean cut and bright, while the habit of the plants is decidedly dwarf. The enormous bank of bloom presented a fine appearance, and should do much to convince the public that the strain is one of the best extant.'—*JOURNAL OF HORTICULTURE*.

'Calceolarias.—On page 491 we figure a well-grown, floriferous, large-flowered, herbaceous Calceolaria from a photograph taken at Wordsley, Stourbridge, where Messrs. E. Webb & Sons' seed business is. The plants from seed, we believe, are cultivated at Kinver, and the methods are evidently highly successful.'—*JOURNAL OF HORTICULTURE*.

'The Temple Show.—A brilliant lot of herbaceous Calceolarias came from Messrs. E. Webb & Sons, Stourbridge, a firm noted for the excellence of its strain. There were some wonderful combinations of colour in the blotched and spotted varieties, while the selfs were very pure and bright. The Messrs. Webb also staged Gloxinias in fine condition.'—*THE GARDENERS' MAGAZINE*.

'A call at "Webbs," Wordsley.—The Calceolarias were the cleanest and best-grown plants I have ever seen. The seeds were sown on June 3, and are now contained in 8-inch pots to flower.'—*THE GARDENERS' CHRONICLE*.

'I had a small packet of your Cineraria Seed, and have some very fine blooms and large plants.'—Mr. JOHN ALLCHURCH, Barnt Green.

'Your Cinerarias were the best I have ever seen; they were admired by all who saw them.'—G. W. WILKES, Esq., Lyston Court.

'I can safely say that your Asters, Begonias, and Cinerarias cannot be beaten.'—Mr. J. STEVENS, The Gardens, Capron House.

WEBBS' PRIZE MEDAL CINERARIA.

Very carefully selected strains, which cannot be surpassed. The magnificent displays of this beautiful flower which we have made at the leading Shows have secured many honours.

WEBBS' SUPERB CINERARIA. From a Photograph of one of our Seed Houses at Wordsley.

276. 2s. 6d. per packet. 277. Smaller packet, 1s. 6d. 278. Extra large packet, 5s. See below.

276. **WEBBS' SUPERB CINERARIA.**—(See ILLUSTRATION above.) This strain has been saved from beautifully-formed flowers of very large size, excellent substance, and the most exquisite and varied colours. It is unequalled for exhibition purposes, of the greatest value for greenhouse decoration, and undoubtedly the finest strain in existence; mixed, 1½ ft. per packet, 2s. 6d.

277. **Webbs' Superb, smaller packet** 1s. 6d. 278. **Webbs' Superb, extra large packet** . . . 5s. 0d.

'All your Seeds turned out excellently. My employer was charmed with your wonderful strain of Cineraria.'—MR. JOHN FARMER, *Gardener to F. EVERITT, Esq., J.P., Harborne.*

'I have an excellent show of your Cinerarias, Superb and Stellata.'—MR. G. ILLSON, *Gardener to J. S. DICKINSON, Esq., Kibworth House.*

'Cineraria, Webbs' Superb Strain.—Some days ago Messrs. Webb & Sons, Wordsley, Stourbridge, sent us a box of blooms of their Superb strain of Cineraria, and we considered them good enough for an illustration to show the form and character of the blooms. Readers will notice the very broad overlapping rays just recurved at the tips as they should be in the florists' strain of Cineraria. Another point to be noticed is the small size of the disc in the centre, making just a small eye in the centre of blooms measuring 2 in. to 3 in. across. The flowers were of excellent texture and retained their colours even when dried up. Most of the flowers sent us were selfs of some rich dark purple or violet colour, while some of them had a small white zone surrounding the disc in the centre.'—*THE GARDENING WORLD*, April 7, 1906.

'Cinerarias from Wordsley.—A selection of single flowers of Cinerarias have been sent to us from Messrs. Webb & Sons, Wordsley, Stourbridge. They are large and very handsome, of rich velvety, glossy blue, violet, purple, crimson, and crimson and white shades. Of course we cannot refer to the type or character of the plants, since we have no means of judging, but the selected pips were good.'—*JOURNAL OF HORTICULTURE*, March 15, 1906.

'The Superb Cinerarias have been a grand show again this Spring; also the Stellata, which I think is admired more every season that we grow them.'—MR. GEO. MERRY, *The Ashe Gardens.*

DOUBLE CINERARIA.

279. **Webbs' Double.** Our strain of Double Cineraria was selected from remarkably fine flowers. It is a very superior variety, and will produce a high percentage of choice double blossoms, of large size and beautiful colours; mixed, 1½ ft. per packet, 2s. 6d.

280. **Webbs' Double, larger packet** 5s. 0d.

CINERARIA MARITIMA.

281. **Cineraria maritima**, a very ornamental half-hardy perennial; silvery foliage, 2 ft. per packet, 6d.

'The Flower Seeds I got from you last year gave every satisfaction. The Cinerarias are a particularly fine strain.'—MR. W. L. VETT, *Gardener to E. J. COLLINGWOOD, Esq., Lilburn Tower.*

CINERARIA STELLATA.

(A most beautiful addition to the Cineraria family.)

CINERARIA STELLATA. 282. 2s. 6d. per packet. 283. Smaller packet, 1s. 6d. 284. Extra large packet, 5s. See below.

282. **Cineraria stellata** (see ILLUSTRATION above). Few plants are capable of producing such an effective display as this charming greenhouse annual. When grouped it is admirable for conservatory decoration, whilst single plants are most useful for table decoration, and the sprays when cut lend themselves to the most charming arrangements in vases with ferns or other light foliage, as the flowers last a long time in water, per packet, 2 6

325. **Webbs' Perfection**, white, 6 in. 1 6

'Webbs' Perfection Cyclamen.—Mr. R. Milner, Margam Gardens, Port Talbot, sends superb flowers of the Persian Cyclamen with the following note: "This strain of the popular Persian Cyclamen is really perfection. From seed sown in July, we have had a batch of plants which have been admired by every one who has seen them. Many of the plants carry from fifty to sixty blooms each, of large size and great substance, and of the most charming colours."—'THE GARDEN.'

'I have a very fine lot of plants of Perfection Cyclamen raised from the packet of seed I had from you; Mrs. Price is very pleased with them. In my opinion it is the best strain of Cyclamen I have ever grown.'—Mr. J. SIMPSON, *Gardener to Mrs. W. E. PRICE, Hillfield House.*

'Cyclamens.—We have received Cyclamen flowers from the nurseries of Messrs. Webb and Sons, Wordsley, Stourbridge. There is a good rich dark ruby-crimson variety, two strongly flowered whites of different types, a pale rose-mauve variety, and a white with crimson mouth.'—'JOURNAL OF HORTICULTURE.'

WEBBS' PERFECTION CYCLAMEN.

321. 2s. 6d. *per packet.* 322. *Smaller packet, 1s. 6d.* 323. *Extra large packet, 5s.*
See annexed.

WEBBS' NEW MONT BLANC CYCLAMEN.

311. 2s. 6d. *per packet. See above.*

'Wordsley Cyclamens have long been famous for the profusion with which they bloom and the shapeliness of the specimens. The Perfection strain is remarkable for breadth and substance of petal, and for the very graceful form of the flowers. There are both red and white varieties, and both are of great excellence. For a white variety, however, it would be difficult to improve upon Mont Blanc, which under good cultivation becomes a veritable mound of snowy blossoms. Rose Queen is charming in hue, and forms a link between Mont Blanc and Vesuvius. The latter is a vivid crimson-red variety of great beauty, and one that provides a splendid contrast to the pure white forms.'—'THE GARDENERS' MAGAZINE.'

'Cinerarias.—Messrs. Webb and Sons, of Wordsley, are ever making progress in constitution, yield, variety, or beauty, as the case may be. In cinerarias, as in gloxinias and other useful flowering plants, they maintain a very high standard of form, habit, and colour, and in the flowers sent us recently we find that increased size has not been secured with any loss of other good points, but that the colours of the many beautiful selfs are clearer and richer than ever we have previously seen them.'—'GARDENERS' MAGAZINE.'

CLARKIA.

Very useful and easy of cultivation; suitable for sowing in beds, patches, or borders; *C. Purple King* and *C. Salmon Queen* are exceedingly beautiful; *hardy annuals*.

Per packet. s. d.

326. **Webbs' New Double Salmon.** Novelty.

(See ILLUSTRATION annexed.) Very attractive, growing 2 feet in height, and having large spikes of beautiful salmon-coloured flowers which remain a long time in perfection . . . 6

327. **Webbs' New Double Pink.** Novelty.

A charming pink variety of double Clarkia . . . 6

328. **Webbs' New Double White.** Novelty.

As a companion to our Double Salmon Clarkia, this pure white variety will be fully appreciated . . . 6

329. **Webbs' New Double Mixed.** Novelty.

A splendid mixture of Double Clarkia . . . 6

CHRYSANTHEMUM.

Handsome showy flowers for mixed borders; *C. indicum*, *flore pleno*, and *C. pomponne*, *flore pleno*, are the well-known perennial varieties; and the varieties of *C. frutescens* are the "Paris Daisies" of the French.

357. **Webbs' New Decoration.** Novelty. A remarkably free-flowering annual, growing 2 feet high. The flowers have petals of a delicate sulphur colour, and centre of a deeper shade. It is a continuous bloomer, and is valuable for bedding and cutting purposes per packet, 1s. 0d.

358. **Webbs' Annual** (see ILLUSTRATION annexed), for outdoor decoration, or for supplying cut flowers in quantity during the summer; few plants are of more value than this handsome hardy annual; mixed, 2 ft. per packet, 6d.

359. **Webbs' White Pearl**, an exceedingly useful hardy annual, blooming profusely in the open ground during the summer. Although a proportion of the flowers will be single, the majority are double, pure white, and of beautiful shape; white, 1 ft., *hardy annual*, per packet, 1s. 0d.

360. **Webbs' Golden Cloud**, an exceedingly handsome strain of the annual Chrysanthemum, valuable for any purpose where cut flowers are required, or for bed and border decoration. It produces its large and bright golden-coloured blooms freely; yellow, 1½ ft., *hardy annual* per packet, 6d.

Per packet. s. d.

WEBBS' GOLD MEDAL GLOXINIAS.

WEBBS' EXCELSIOR GLOXINIA. From a Photograph of one of our Seed Houses at Wordsley.

541. 2s. 6d. per packet. 542. Smaller packet, 1s. 6d. 543. Extra large packet, 5s. See page 97.

From 'The Gardeners' Magazine.'

'The Temple Show.—Messrs. E. Webb & Sons, Wordsley, Stourbridge, were represented by Gloxinias. The plants were not large, but they were in perfect health. This was proved by the strength and cleanliness of the foliage, and by the clearness of the well-formed flowers. A very fine dark variety named Stanley was somewhat small in the flower, but the colour was especially deep and rich. When the plants gain in strength the flowers will increase in size and numbers.'

From 'Gardeners' Chronicle.'

'Wolverhampton Floral Fête.—Messrs. Webb & Sons, Stourbridge, put up a nicely-arranged group of well-formed Gloxinias, Lilies, Sweet Peas, and hardy flowers (Gold Medal).'

From 'The Journal of Horticulture.'

'Royal Oxfordshire Show.—A collection of very fine Gloxinias in pots from Messrs. E. Webb and Sons, Wordsley, Stourbridge, was awarded the only Gold Medal at the Show.'

From 'The Gardening World.'

'Webb & Sons at Wolverhampton.—At the Wolverhampton Floral Fête, Messrs. Webb and Sons, of Wordsley, Stourbridge, exhibited Gloxinias, Sweet Peas, Lilliums, etc., the display occupying a space 50 ft. by 4 ft. The Gloxinias were very fine examples of this firm's strains, the flowers being perfect in form, of large size, excellent substance, and in a great variety of beautiful colours. Amongst named varieties were Webbs' Stanley (vivid crimson), Webbs' Peerless (white), and Webbs' Purple Queen. The collection of Sweet Peas comprised about one hundred varieties, and included several novelties. A Gold Medal was awarded for this display.'

From 'The Journal of Horticulture.' 'Gloxinias.—Few of us recognise the beautiful Gloxinias under their revived name of *Sinningia*—*S. speciosa*. From this species have evolved the large selection of varieties such as was shown in Messrs. Webb & Sons' group (which we illustrate) at the Show in the Inner Temple Gardens this year. The revived name, however, may be predicted to remain in its present obscurity, and the few botanists who are designated as "purists" in this matter of nomenclature can enjoy their chosen name, while nine-tenths of cultivators and others will never know any other name than the pleasant one under which we write.

'At Wordsley, near Stourbridge, Messrs. Webb & Sons take great pains to maintain their superior strain of these tender exotics in the highest state of perfection. Size, form, substance, colouring, and productiveness in throwing and continuing to throw up blooms, together with sturdiness and good habit, are the objects held in view. Many houses of a suitable nature are devoted to the growing of large batches of Gloxinias, so that from such a numerous selection there is scope for the seed-selector and hybridiser to bring forth new and improved types. The form has been altered within recent years, till now the flowers are almost perfectly bell-like, velvety or smooth in texture, as the case may be, and many magnificent self-coloured and spotted named varieties are now offered. But where the strain is so good and affords so much variation there is little need to choose individual sorts. Still, folks always have special favourites, and the naming is essential if exact selections have to be furnished.'

'I should like to mention that I have never seen your strain of Gloxinias equalled for colour, size, substance of bloom, and habit of growth.'—Mr. JOHN SPRAGGAN, *Gardener to* HENRY H. COCHRANE, Esq., Eshwood Hall.

WEBB'S NEW BRIDEGROOM GODETIA.

554. 1s. per packet. See above.

GODETIA.

A brilliant and profuse-flowering class of annuals, which are extremely hardy and easy of cultivation; should be grown in every garden; *hardy annuals*.

Per packet. s. d.

553. **Webb's New Double Rose.** Novelty. This is a beautiful novelty growing two feet high and producing charming rose-coloured flowers freely. Valuable for borders or cutting. 1 0
554. **Webb's New Bridegroom.** (See ILLUSTRATION annexed). Novelty. An exceedingly pretty novelty, producing light salmon-coloured flowers, blotched with crimson. Very effective for bedding purposes; height, 1½ ft. 1 0
555. **Webb's New Brilliant.** Novelty. Without doubt this novelty produces the deepest-coloured flowers in this class of plants. They are of dazzling crimson, and for bedding purposes have a most striking effect. 1 0
556. **Webb's Carmine Queen,** when in full bloom few hardy annuals are more showy than this variety. It grows about 1 foot in height, and if used in beds or masses its rich carmine-coloured flowers produce a gorgeous effect. 6
557. **Webb's White Pearl,** white, 1 ft. 6
558. **Webb's Fairy,** flowers white, with bright carmine blotch; very beautiful; 1 ft. 6

876. **Webbs' Exquisite**, white, larger packet . . . 2s. 6d.

877. **Webbs' Eclipse** is a handsome variety of a novel shade of colour, producing its large and finely-formed flowers in pyramidal trusses, well above the foliage; purplish crimson, 6 in. . . . per packet, 2s. 6d.

878. **Webbs' Eclipse**, smaller packet . . . 1s. 6d.

879. **Webbs' Eclipse**, larger packet . . . 5s. 0d.

'I have great pleasure to inform you that I took First Prize with 6 plants of your Exquisite Primula at the Hartlepool Chrysanthemum Show last November against 6 competitors in the open class. The strain is splendid.'—Mr. GEO. WATERWORTH, The Lodge, Meadowcroft.

'The Rosy Morn Primula was the admiration of the whole neighbourhood.'—Mr. T. BARKER, The Gardens, Methley Rectory.

880. **Webbs' Modesty**. The flowers on commencing to open are pure white, but when fully expanded they are of a delicate pink, or flesh-colour, which, with the bright green fern-like foliage of the plant, presents a most beautiful and chaste appearance. It has a very strong habit, and is exceedingly floriferous; delicate pink, 6 in. . . . per packet, 2s. 6d.

881. **Webbs' Modesty**, smaller packet . . . 1s. 6d.

882. **Webbs' Modesty**, larger packet . . . 5s. 0d.

883. **Webbs' Stellata**, mixed, clusters of star-like blooms; fine for greenhouse decoration, 1 ft., per packet, 2s. 6d.

884. **Webbs' Stellata**, mixed, smaller packet . . . 1s. 6d.

885. **Webbs' Stellata**, white . . . 2s. 6d.

886. **Webbs' Stellata**, white, smaller packet . . . 1s. 6d.

887. **Webbs' Stellata**, blue . . . 2s. 6d.

892. **Webbs' Stellata**, red, smaller packet . . . 1s. 6d.

893. **Webbs' Stellata**, scarlet . . . 2s. 6d.

894. **Webbs' Stellata**, scarlet, smaller packet . . . 1s. 6d.

PRIMULA—continued.

WEBBS' NEW 'AVALANCHE' PRIMULA. 895. 2s. 6d. per packet. 896. Larger packet, 5s. See below.

895. **Webbs' New 'Avalanche'** (see ILLUSTRATION above). **Novelty.** This is a variety of strong habit, having deeply fimbriated foliage with red stem; it grows to a medium height and is a free bloomer. The flowers, which are pure white, with a greenish yellow eye, are large, deeply fringed, and of good substance,
per packet, 2s. 6d.

896. **Webbs' New 'Avalanche,'** larger packet, 5s. 0d.

'I am charmed with your New Avalanche Primula, and consider it by far the best white primula that has come under my notice.'—Mr. E. BECKETT, The Gardens, Aldenham House.

'Your Purity Primula is unsurpassed. My order again this year is the best proof of the quality of your Seeds.'—Mr. W. ELLIOTT, Blyth Hall Gardens.

897. **Webbs' Blue Belle** will be found a most valuable addition to our other varieties, the colour of its large and finely-shaped blooms being most distinct and pleasing; light blue, 6 in. . . . per packet, 2s. 6d.

898. **Webbs' Blue Belle**, smaller packet, . . . 1s. 6d.

899. **Webbs' Blue Belle**, larger packet, . . . 5s. 0d.

'I exhibited six Primulas (grown from Webbs' Seed) at the Windsor Chrysanthemum Show, and they took First Prize out of ten competitors; they were very much admired, and every one wanted to know where I got the Seed from. The white was particularly fine; some of the individual blooms would cover a crown piece.'—Mr. BEN. CAMPBELL, Gardener to Her Grace the DUCHESS OF SUTHERLAND.

PRIMULA—continued.

WEBBS' NEW SNOW QUEEN PRIMULA.

900. 2s. 6d. per packet. 901. Smaller packet, 1s. 6d.
902. Larger packet, 5s. See below.

900. **Webbs' New Snow Queen** (see ILLUSTRATION above). **Novelty.** This is a magnificent giant white Primula of sturdy growth, which throws up immense flowers of grand substance in abundance, and well above its handsome green foliage . . . per packet, 2s. 6d.

901. **Webbs' New Snow Queen**, smaller packet, 1s. 6d.

902. **Webbs' New Snow Queen**, larger packet, 5s. 0d.

903. **Webbs' New Ruby Queen.** A distinct large-flowered type of primula with rich ruby flowers. **Novelty.** The foliage is a fine dark colour, and the plant is of compact habit. It is a most beautiful variety, and should become a general favourite . . . per packet, 2s. 6d.

904. **Webbs' Scarlet Emperor** is one of the finest Primulas ever offered, of strong habit of growth, and unequalled for continuous blooming. The flowers, produced in dense clusters, and thrown well above its handsome dark foliage, are of the brightest colour, extra large, of great substance, and beautifully fringed; scarlet, 6 in. . . per packet, 2s. 6d.

905. **Webbs' Scarlet Emperor**, smaller packet, 1s. 6d.

906. **Webbs' Scarlet Emperor**, larger packet, 5s. 0d.

907. **Webbs' New Meteor.** **Novelty.** This is a novelty of very distinct merit, and is remarkable for its sturdy growth and beautiful habit. It has palm-leaved foliage with red stems, whilst the flowers are of a deep salmon-rose shade, large and effective . . . per packet, 2s. 6d.

908. **Webbs' New Meteor**, larger packet, . . . 5s. 0d.

WEBBS' PURITY PRIMULA.

909. 2s. 6d. per packet. 910. Smaller packet, 1s. 6d.
911. Larger packet, 5s. See below.

909. **Webbs' Purity** (see ILLUSTRATION above) is a magnificent giant Primula of vigorous habit, and a decided improvement on all the older varieties. The flowers, which are borne in pyramidal form, and well above the foliage, are from 2 to 2½ inches in diameter, pure white, with clear sulphur eye, elegantly fringed, and of great substance; white, 6 in. . . per packet, 2s. 6d.

910. **Webbs' Purity**, smaller packet, . . . 1s. 6d.

911. **Webbs' Purity**, larger packet, . . . 5s. 0d.

912. **Webbs' Rosy Morn** is a splendid variety, of a distinct and pleasing shade of colour, the flowers being of beautiful carmine-rose, large, finely fringed, and produced in great profusion; carmine-rose, 6 in. . . per packet, 2s. 6d.

913. **Webbs' Rosy Morn**, smaller packet . . . 1s. 6d.

914. **Webbs' Rosy Morn**, larger packet . . . 5s. 0d.

915. **Webbs' Fire-fly** is a beautiful Primula of compact habit of growth, and very floriferous. Its dark velvety crimson blooms are large in size, of good form and substance, and finely fringed; rich crimson, 6 in. . . per packet, 2s. 6d.

916. **Webbs' Fire-fly**, smaller packet . . . 1s. 6d.

917. **Webbs' Fire-fly**, larger packet . . . 5s. 0d.

'Not one of your Seeds failed. I took First Prize with Modesty Primula in a strong competition. They were the admiration of all.'—Mr. W. KNIGHT, The Gardens, Rodmersham.

'Primulas.—Mr. George Merry, of the Ashe Gardens, sends us specimen flowers of three varieties of Primula sinensis—Purity, white; Modesty, blush-pink; and Emperor, scarlet—from Messrs. Webb & Sons' strain of this plant. The flowers are meritorious in all respects.'—JOURNAL OF HORTICULTURE.

'The Primula Seed I had from you turned out splendid both for size of blossom and trusses; they are very much admired.'—J. J. H. KING, Esq., Caergwile.

'New Chinese Primula.—The great demand for the useful Chinese Primulas has led many firms to devote a great deal of time and attention to the development of particularly fine forms. Of course, we know quite well each firm does this for its own special benefit, so as to secure additional business, but the efforts thus made, and the competition it engenders, works out to the great advantage of the horticultural public.

'Quite recently I had a number of very fine plants of Webb's New Avalanche Primula in bloom, and I can confidently recommend the variety. It has a very strong habit of growth, and the leaves are prettily fimbriated. The plant is of medium height, and a most profuse bloomer. The flowers are pure white, large, finely fringed, and have a yellow eye. The substance of the blooms is as fine as their size and purity.'—(R. MILNER, Margam Gardens.) 'THE GARDENERS' MAGAZINE.'

'We will not dwell upon the many kinds of Primulas that are comprised in the Stourbridge Collection, except just to mention two exceptionally fine ones, namely, Webb's Purity and Snow Queen, the former a giant Primula of vigorous habit, whose flowers are pure white with a clear sulphur eye, two inches or more in diameter, and elegantly fringed. Snow Queen is also a giant Primula, producing very large trusses of large white flowers, these being thrown well above the foliage.'—'THE GARDEN.'

PRIMULA—continued.

918. **Webbs' Collection of Primulas.**—The Seed offered in these Collections has been saved from the finest show plants of the leading varieties introduced by Webb & Sons, and may be relied upon to produce a display of blooms of great substance and beautiful colours. Six varieties, 1 packet of each, 10s.

		Per packet.	s.	d.

WEBBS' WHITE SWAN DOUBLE POPPY.

954. 6d. per packet. See above.

PRIMROSE.

981. **Webbs' Hybrid.** Too much cannot be said in favour

of this valuable acquisition, the flowers of which are produced in great profusion, and in all shades of colour, varying from white to crimson; they are of large size, fine form, and beautifully marked. The plants are very hardy, robust in growth, and unsurpassed for spring bedding; mixed, 6 in., *hardy perennial* . . . per packet, 2s. 6d.

982. **Webbs' Hybrid, smaller packet** . . . 1s. 0d.

983. **Primrose, mixed,** seeds saved from the best varieties; 6 in.,

hardy perennial . . . per packet, 1s. 0d.

984. „ **yellow,** 6 in., *hardy perennial* . . . per packet, 6d.

985. **Primrose, blue-flowered,** a beautiful strain, the colours of the flowers varying from pale lavender-blue to deep violet . . . per packet, 1s. 6d.

'Webbs' Double Poppy, White Swan.—So fine a white as White Swan is must be of the greatest utility for the garden border, or for corners and nooks in the garden. It forms a companion variety to others of pink and crimson shades. A collection of the species and varieties of Poppies would be of great interest.'—JOURNAL OF HORTICULTURE.

'I am very pleased with Petunias raised from your Seed. They have been much admired.'—MAINPRICE BARTON, Esq., Stour Valley Villa.

PANSY.

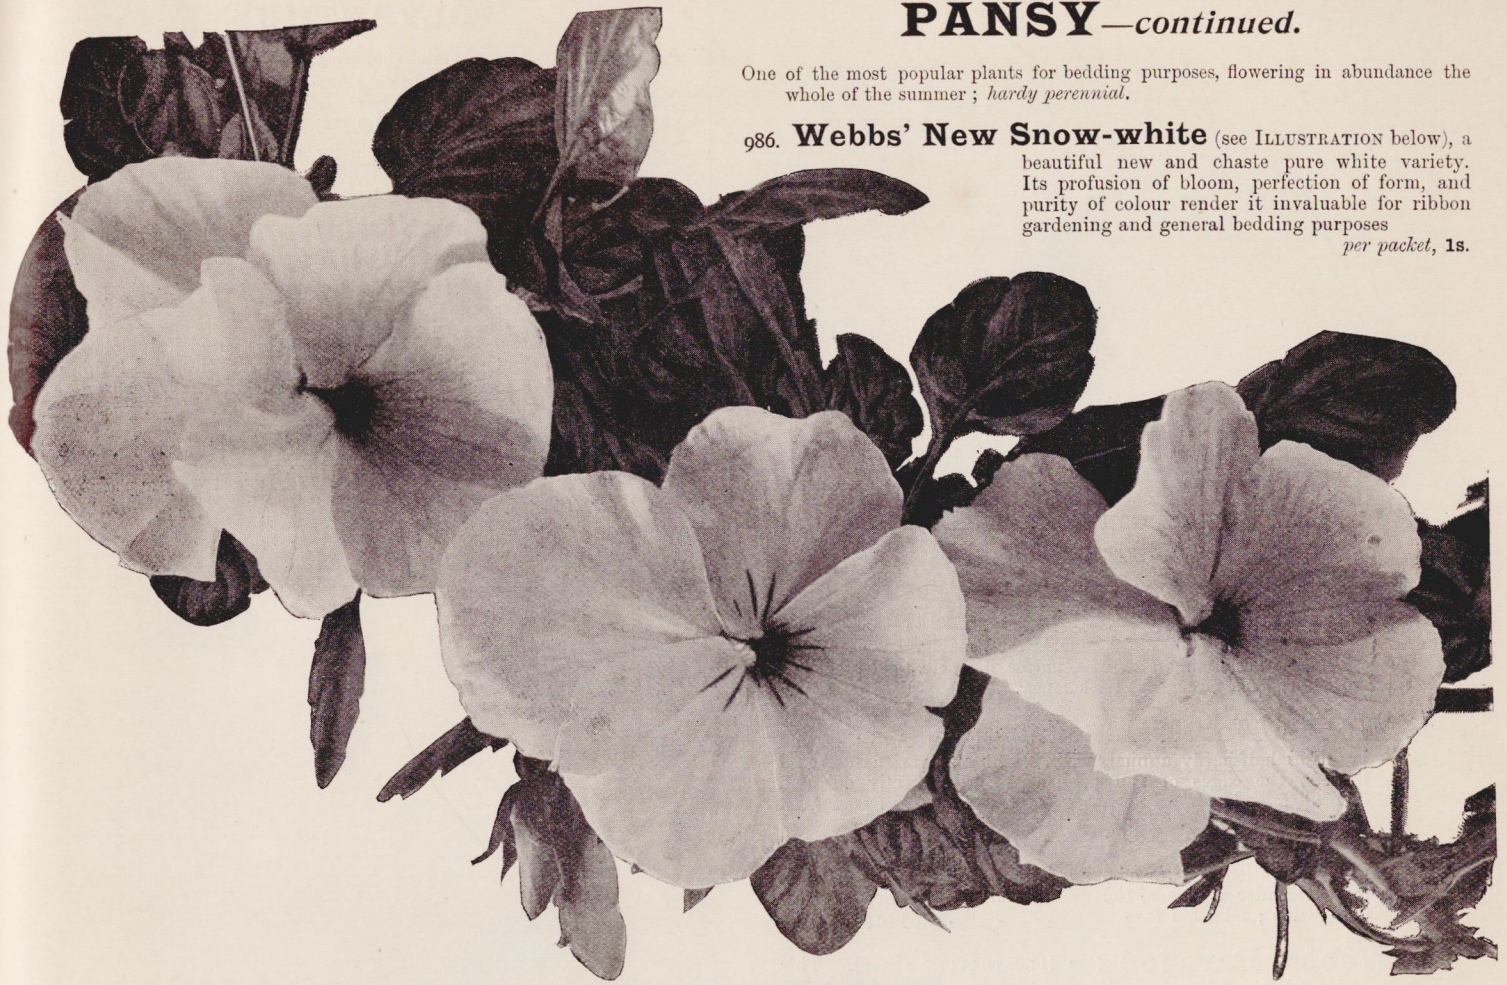

WEBBS' DIAMOND PANSY. 987. 5s. per packet. 988. Smaller packet, 2s. 6d. See page 117.

PANSY—continued.

One of the most popular plants for bedding purposes, flowering in abundance the whole of the summer; *hardy perennial*.

986. **Webbs' New Snow-white** (see ILLUSTRATION below), a beautiful new and chaste pure white variety. Its profusion of bloom, perfection of form, and purity of colour render it invaluable for ribbon gardening and general bedding purposes
per packet, 1s.

WEBBS' NEW SNOW-WHITE PANSY.
986. 1s. *per packet*. See above.

987. **Webbs' Diamond** (see ILLUSTRATION, page 116). Too much can hardly be said in praise of this selection of probably the most popular of all spring and summer bedding plants. The flowers are large and well formed, and, for brilliancy, variety of colour, and form, are unequalled for either show or decorative purposes; mixed, 6 in., *per packet, 5s. 0d.*
988. **Webbs' Diamond, smaller packet,** . . . 2s. 6d.
989. **Webbs' New Bedding.** Novelty. A new strain, which is specially suitable for bedding. It comprises a large and varied assortment of lovely colours, is of robust habit, and very free-flowering . . . *per packet, 2s. 6d.*
990. **Webbs' New Bedding, smaller packet,** . . . 1s.
991. **Webbs' New Bedding, dark blue, fine rich colour,** 1s.

'I must say that Webbs' Diamond Pansy has turned out the best I ever grew from seed. The flowers are perfect in form and very rich in colour. My employer says they are most beautiful.'—Mr. J. PAINTER, *Gardener to R. W. SMITH, Esq., Stoneleigh.*

'My gardener begs me to tell you that the 2s. 6d. packet of Pansy Seed produced the most magnificent bed of flowers he has ever seen, and that many gardeners in the neighbourhood said the same.'—Mrs. WOODWARD, The Hyde.

PRINCE'S FEATHER.

1018. **Prince's Feather**, a very ornamental plant; red, 3 ft., *hardy annual* 3

WEBBS' PARAGON PHLOX DRUMMONDI.

1021. 1s. per packet. See below.

PHLOX DRUMMONDI.

One of the most beautiful half-hardy annuals for bedding, having all the shades of scarlet, crimson, white, rose, purple, lilac, etc., and producing a profusion of bloom throughout the summer.

1019. **Webbs' New Fringed.** *Novelty.* A distinct and beautiful half-hardy annual, with bright and various coloured flowers, the edges of the petals being beautifully cut and fringed, mixed per packet, 1s.

1020. **Webbs' Elegant** (see ILLUSTRATION annexed). The rich and varied colours of our splendid strain of this valuable annual render it one of the most effective bedding plants in cultivation; mixed, 1 ft. per packet, 1s.

1021. **Webbs' Paragon** (see ILLUSTRATION above). This variety differs from the ordinary Phlox Drummondii in being more compact in habit of growth, the plants forming dense bushes about 9 inches in height, which are covered with large and brilliantly-coloured flowers; mixed, 9 in., per packet, 1s.

PHLOX, PERENNIAL.

1039. **Phlox, perennial**, saved from the choicest named varieties; finest mixed, 3 ft., *hardy perennial* 6

PHACELIA.

Exceedingly handsome border plants; useful for bees; *hardy annuals*.

1040. **Campanularia**, blue, 1 ft. 6
1041. **Congesta**, blue, 1 ft. 3

POLYANTHUS.

Pretty and well-known spring-flowering plants; seeds saved from the very best varieties; *hardy perennials*.

1042. **Webbs' New Giant Flowered, Mixed.**

This variety is invaluable for spring display in the open ground; it produces a grand show of flowers in great variety of colour—principally 'selfs,' per packet, 1s. 6d.

1043. **Webbs' Giant Crimson** 1 0

1044. **Webbs' Giant White** 1 0

1045. **Webbs' Giant Yellow** 1 0

1046. **Webbs' Gold-laced**, this beautiful gold-laced strain has been saved from the best varieties, and is highly valuable for spring bedding, as it blooms very early in the year; mixed, 6 ins. per packet, 1s.

1047. **Webbs' Gold-laced**, smaller packet 6d.

1048. **Polyanthus**, mixed border, 6 in. per packet, 6d.

WEBBS' ELEGANT PHLOX DRUMMONDI.

1020. 1s. per packet. See above.

These admirable bedding plants contrast charmingly with Scarlet Geraniums, Calceolarias, and Verbenas; and as pot-plants they are very effective for greenhouse and conservatory decoration; *half-hardy perennials*.

A new and striking variety, producing bright rose flowers veined with lustrous carmine, deepening to a blood-red throat; 1½ ft. . . . *per packet*, 2s. 6d.

1050. **Webbs' Brilliant**
(Single) (see ILLUSTRATION annexed), the flowers produced from this fine strain are remarkable for their brilliancy and variety of colour, also for their large size and beautiful shape. For greenhouse and conservatory decoration it is most effective, whilst its easy cultivation and profusion of bloom render it invaluable for growing out of doors; mixed, 1½ ft.,
per packet, 2s. 6d.

1051. **Webbs' Brilliant,**
smaller packet, 1s. 6d.

1052. **Webbs' Brilliant,**
extra large packet, 5s. 0d.

'I have one of the finest beds of Webb's Brilliant Petunia that I ever saw. Some of the flowers, which measure 5½ inches across, are very rich and of the loveliest colours I have ever seen. The bed is a grand sight.'
—Mr. JAMES PAINTER, *Gardener to W. S. TUNBRIDGE, Esq., Mount Pleasant.*

'I had some of your Pentstemon Seed, and can assure you the flowers have been greatly admired by thousands. They were the finest collection I ever saw, and many gardeners say the same.'—Mr. T. WATKIN, *Alcester.*

WEBB'S PRIZE DOUBLE PETUNIA.

1062. 2s. 6d. per packet. See page 119.

'The Seeds you sent me have been a great success. The Lawns are admired by all who see them.'—Mr. J. HARDING, *Gardener to WM. EVANS, Esq., Knighton Lodge.*

STOCK.

Stocks are universally admired, and have long occupied a prominent position in almost every garden. For beauty, dazzling effect, and long continuance of bloom, they are unsurpassed, whilst their delightful fragrance renders them indispensable for bouquets, vases, etc. The seed we offer was saved from plants grown in *pots only*, and will yield as high a percentage of double flowers as it is possible to obtain.

WEBBS' BEDDING STOCK. See below.

Webbs' Bedding (see ILLUSTRATION above), a splendid selection of Ten-week Stock, specially adapted for creating effect, when planted in separate colours, in beds and masses in the open ground. The plant is of dwarf habit, whilst the spikes of bloom are large, of good shape and colour, and produced in abundance throughout the summer; 1 ft., *half-hardy annual*.

	Per packet.	s.	d.
1095. Scarlet, 1 ft.	1	0	
1096. Canary yellow, 1 ft.	1	0	
1097. Purple, 1 ft.	1	0	
1098. Light Blue, 1 ft.	1	0	
1099. White, 1 ft.	1	0	
1100. Rose, 1 ft.	1	0

1102. 6 distinct Colours, separate	3s.	0d.	

1103. **Webbs' Celestial**, Ten-week, sky blue, 1 ft. 1 0

1104. **Webbs' Sovereign**, Ten-week, primrose, 1 ft. 1 0

Webbs' New Admiration. (See ILLUSTRATION, page 124.) **Novelty.** Treated either as a Ten-week or Winter variety this new class of Stock will be found a great acquisition for bedding or cutting purposes. The main spike grows about 1 foot in length, and with its numerous side shoots forms fine and effective trusses. It produces a large percentage of double flowers.

	Per packet.	s.	d.
1105. White	1	0	
1106. Rosy Lilac	1	0	
1107. Flesh Colour	1	0	
1108. Brilliant Crimson	1	0	

1109. **Webbs' New Vulcan.** **Novelty.** (See ILLUSTRATION, page 123.) A lovely variety of the Ten-week Stock, growing about 15 inches high, producing large spikes of beautiful double bright crimson flowers. When used for massing purposes the intense colour of the blooms has a charming effect, per packet, 1s. 6d.

1110. **Webbs' Snowdrift**, a very early and free-flowering variety of Ten-week Stock, producing pyramidal-shaped spikes of pure white flowers which are serviceable for bouquets. It is equally desirable as a pot-plant; white, 1 ft., *half-hardy annual*, per packet, 1s. 6d.

Stock, Ten-week, Giant, or Tree, a vigorous grower of pyramidal form and branching habit, producing extra fine double flowers; *half-hardy annual*.

1111. Mixed, 1½ ft. Per packet. s. d. 1 0

1112. 8 distinct colours, separate 2s. 0d.

1113. **Webbs' New Crystal White**, one of the most beautiful of the Intermediate section of Stocks, producing an unusually large percentage of double flowers. The spikes of bloom are large and massive, of the purest white, and deliciously scented. It is invaluable for pot-culture, whilst its long continuance of blooming renders it a most desirable novelty for outside gardening. per packet. 1s. 6d.

'The Stocks are beautiful; I never saw better.'—Mr. J. PRATT, Gardener to G. H. ARMSTRONG, Esq., Castle View Gardens.

'The Stocks I had from you last season were the admiration of our neighbourhood.'—Mr. G. GROOME, Chester Green.

'Your Ten-week Stocks are very fine, quite 70 to 80 per cent being double.'—Mr. R. MASON, Gardener to Mrs. W. H. DIXON, Edgbaston.

WEBBS' LARGE-FLOWERING TEN-WEEK STOCK.

See above.

Webbs' Popular Boxes of Floral Gems

contain Collections of Flower Seeds that are highly desirable to every admirer of an abundant succession of exquisite bloom, as they consist of selections from our Kinver Trial Grounds of the choicest and most universal favourites of the garden, liberally arranged for the various prices, and specially

Suitable for the Gardens of Ladies and Amateurs.

2s. 6d., 5s., 7s. 6d., 10s. 6d., 15s., 21s., 31s. 6d., 42s., and 63s. each, delivered free.

Experts inspecting Webb & Sons' Trial Grounds at Kinver.

1610. **Webbs' Box of Floral Gems at 2s. 6d.**

contains the following liberal and choice collection of Flower Seeds—

3 varieties Hardy Annuals.	1 packet German Ten-week Stock, mixed.	1 packet Everlasting Flowers, mixed.
3 „ Half-hardy Annuals.	1 „ Chrysanthemum, Annual, mixed.	1 „ Nasturtium, Dwarf, mixed.
1 packet Comet Aster, mixed.	1 „ Sweet Pea, Large-flowering, mixed.	1 „ Mignonette.

1611. **Webbs' Box of Floral Gems at 5s.**

contains the following liberal and choice collection of Flower Seeds—

6 varieties Half-hardy and Tender Annuals.	6 varieties Showy Hardy Annuals.	1 packet Chrysanthemum, Annual, mixed.
1 packet Double Zinnia Elegans, mixed.	3 „ Popular Hardy Perennials.	1 „ Everlasting Flowers, mixed.
1 „ Comet Aster, mixed.	1 packet Mignonette.	1 „ German Ten-week Stock, mixed.
1 „ Petunia, mixed.	1 „ Sweet Pea, Large-flowering, mixed.	1 „ Balsam, choice mixed.

Webbs' Popular Boxes of Floral Gems—*continued.*

1612. **Webbs' Box of Floral Gems at 7s. 6d.**

contains the following liberal and choice collection of Flower Seeds—

9 varieties Half-hardy and Tender Annuals.	6 varieties Popular Hardy Perennials.	1 packet Ornamental Grasses, mixed.
1 packet Nasturtium, Dwarf, mixed.	1 packet Mignonette.	1 „ Everlasting Flowers, mixed.
1 „ Comet Aster, mixed.	1 „ Sweet Pea, Large-flowering, mixed.	1 „ German Ten-week Stock, mixed.
12 varieties Showy Hardy Annuals.	1 „ Balsam, choice mixed.	1 „ Petunia, mixed.

1613. **Webbs' Box of Floral Gems at 10s. 6d.**

contains the following liberal and choice collection of Flower Seeds—

12 varieties Half-hardy and Tender Annuals.	6 varieties German Ten-week Stock.	3 varieties Ornamental Grasses, for winter bouquets.
6 „ Popular Hardy Perennials.	1 ounce Nasturtium, Dwarf, mixed.	3 „ Everlasting Flowers, for winter bouquets.
8 „ Paony-flowered Aster.	$\frac{1}{2}$ ounce Large-flowering Mignonette.	1 packet Balsam, choice mixed.
12 „ Showy Hardy Annuals.	2 ounces Sweet Pea, Large-flowering, mixed.	
1 packet Petunia, mixed.		

1614. **Webbs' Box of Floral Gems at 15s.**

contains the following liberal and choice collection of Flower Seeds—

12 varieties Half-hardy and Tender Annuals.	12 varieties Showy Hardy Annuals.	3 varieties Ornamental Grasses, for winter bouquets.
6 „ Double Zinnia Elegans.	6 „ Popular Hardy Perennials.	3 „ Everlasting Flowers, for winter bouquets.
12 „ Paony-flowered Aster.	1 ounce Large-flowering Mignonette.	1 packet Balsam, choice mixed.
12 „ German Ten-week Stock.	3 ounces Sweet Pea, Large-flowering, mixed.	
1 packet Petunia, mixed.	1 ounce Nasturtium, Dwarf, mixed.	

1615. **Webbs' Box of Floral Gems at 21s.**

contains the following liberal and choice collection of Flower Seeds—

12 varieties Half-hardy Annuals.	1 packet Petunia, mixed.	3 varieties Ornamental Grasses, for winter bouquets.
6 „ Double Zinnia Elegans.	12 varieties Showy Hardy Annuals.	3 „ Everlasting Flowers, for winter bouquets.
6 „ Phlox Drummondii.	6 „ Popular Hardy Perennials.	6 „ Seeds for greenhouse.
12 „ Paony-flowered Aster.	1 ounce Large-flowering Mignonette.	1 packet Balsam, choice mixed.
6 „ Quilled Aster.	4 ounces Sweet Pea, Large-flowering, mixed.	
12 „ German Ten-week Stock.	1 ounce Nasturtium, Dwarf, mixed.	

1616. **Webbs' Box of Floral Gems at 31s. 6d.**

contains the following liberal and choice collection of Flower Seeds—

12 varieties Half-hardy Annuals.	6 varieties Double Camellia-flowered Balsam.	12 varieties Popular Hardy Perennials.
6 „ Double Zinnia Elegans.	6 ounces Sweet Pea, mixed.	6 „ Phlox Drummondii.
12 „ Paony-flowered Aster.	3 varieties Ornamental Grasses, for winter bouquets.	6 „ Seeds for greenhouse.
12 „ Quilled Aster.	3 „ Everlasting Flowers, for winter bouquets.	6 „ Showy Flowers for rock-work.
12 „ Showy Hardy Annuals.	1 packet Petunia, mixed.	6 „ Ornamental-foliaged Plant Seeds.
12 „ German Ten-week Stock.		2 ounces Large-flowering Mignonette.
2 ounces Nasturtium, Dwarf, mixed.		

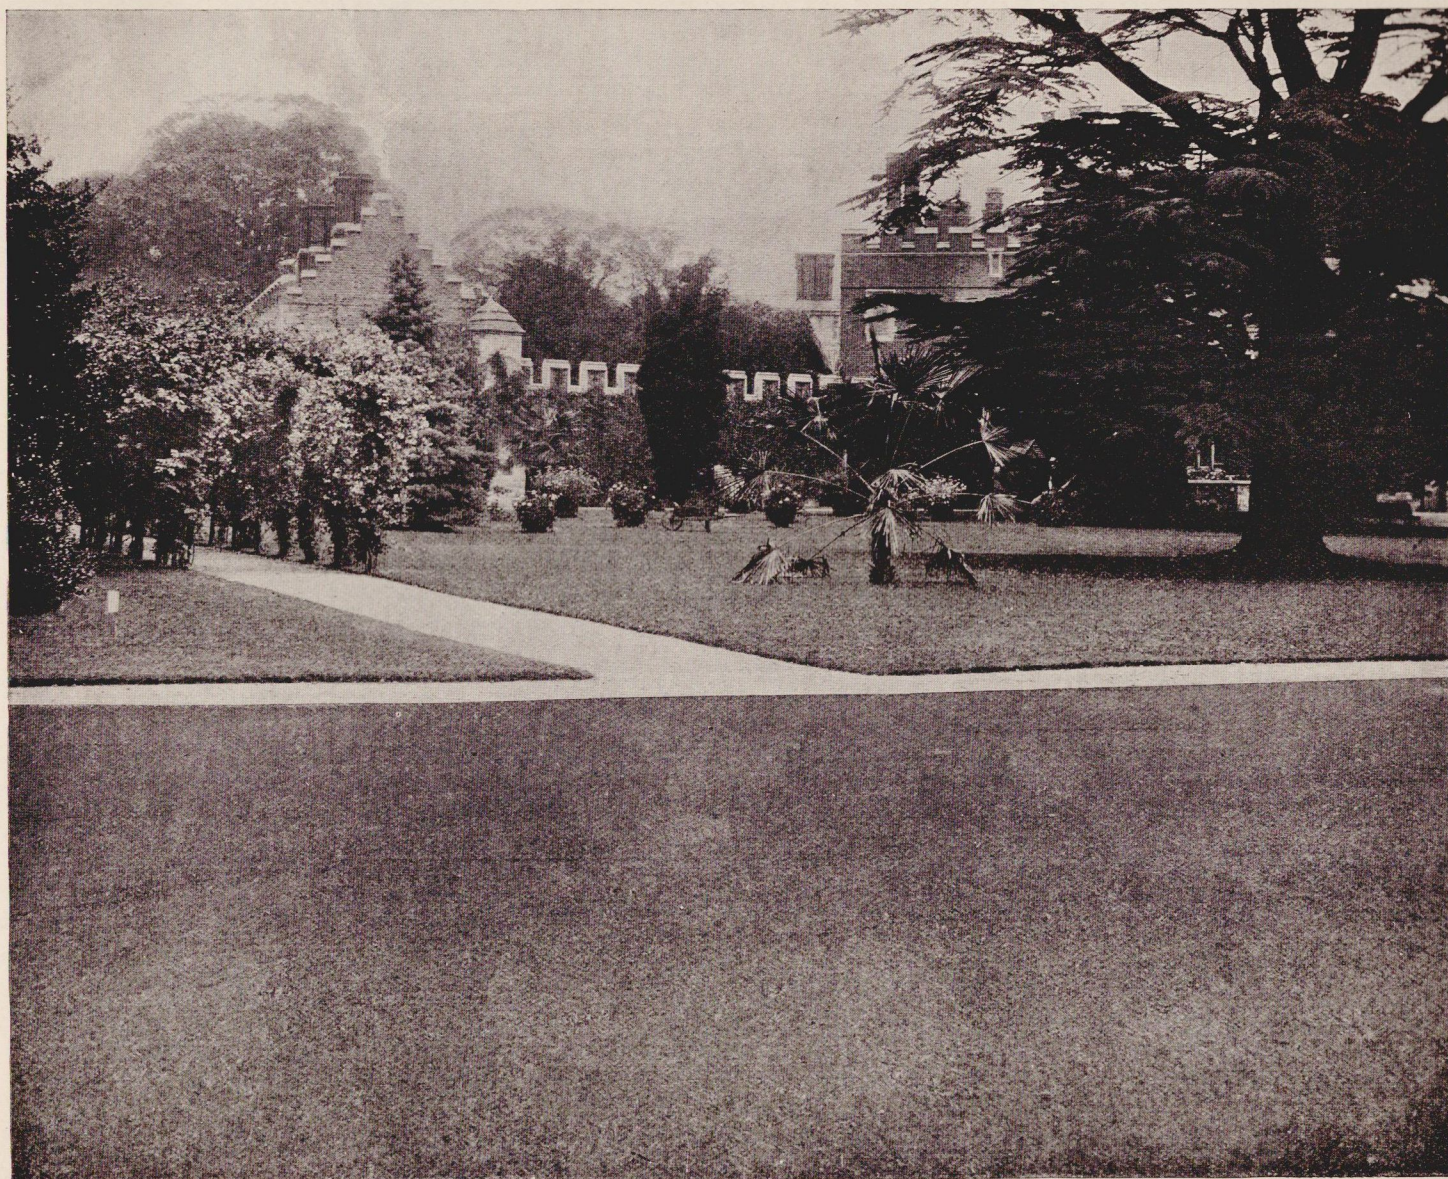

1617. **Webbs' Box of Floral Gems at 42s.**

contains the following liberal and choice collection of Flower Seeds—

18 varieties Half-hardy Annuals.	8 ounces Sweet Pea, Large-flowering, mixed.	6 varieties Double Camellia-flowered Balsam.
6 „ Double Zinnia Elegans.	2 „ Large-flowering Mignonette.	6 „ Double German Wallflower.
12 „ Paony-flowered Aster.	4 „ Nasturtium, Dwarf, 4 varieties.	6 „ Seeds for greenhouse.
12 „ Quilled Aster.	3 varieties Ornamental Grasses, for winter bouquets.	6 „ Showy Flowers for rock-work.
6 „ Chrysanthemum-flowered Aster.	6 „ Everlasting Flowers, for winter bouquets.	6 „ Hardy Climbers.
18 „ Showy Hardy Annuals.	6 „ Phlox Drummondii.	6 „ Ornamental-foliaged Plant Seeds.
12 „ Large-flowering Ten-week Stock.	6 „ Brompton Stock.	1 packet Choice Carnation.
12 „ Popular Hardy Perennials.		1 „ Petunia, mixed.

WEBBS' PRIZE MIXTURES OF LAWN GRASS SEEDS.

Reproduced from a Photograph by kind permission of the Rt. Hon. The Earl of Sandwich.

Webbs' Prize Mixture for Garden Lawns	1s. 6d. per pound ; 4s. per gallon ; 30s. per bushel.
No. 2 Mixture, 1s. 4d. per pound ; 3s. 3d. per gallon ; 25s. per bushel.	
Webbs' Prize Mixture for Tennis and Croquet Lawns	1s. 6d. per pound ; 4s. per gallon ; 30s. per bushel.
No. 2 Mixture, 1s. 4d. per pound ; 3s. 3d. per gallon ; 25s. per bushel.	
Webbs' Prize Mixture for Bowling Greens	1s. 6d. per pound ; 4s. per gallon ; 30s. per bushel.
No. 2 Mixture, 1s. 4d. per pound ; 3s. 3d. per gallon ; 25s. per bushel.	
Webbs' Prize Mixture for Putting Greens	1s. 6d. per pound ; 4s. per gallon ; 30s. per bushel.
Webbs' Prize Mixture for Cricket Grounds	3s. 6d. per gallon ; 25s. per bushel.
Webbs' Mixture for Golf Links, Recreation Grounds, Etc.	17s. 6d. per bushel.

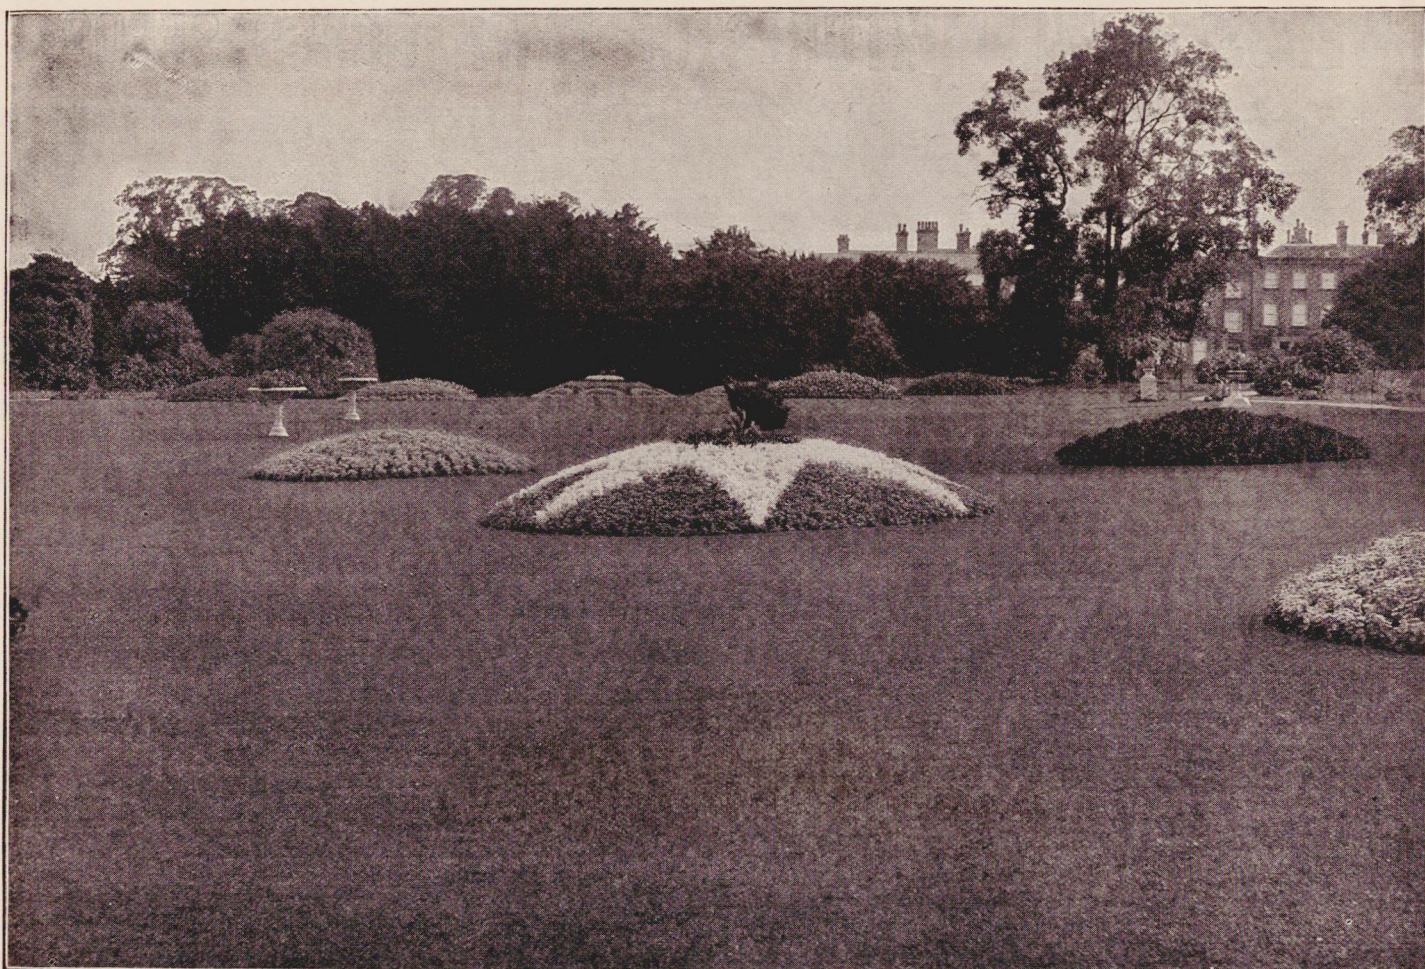

In ordering it is advisable to state if the Mixture is to contain Clovers or not ; and also if for renovating purposes.

The price quoted per pound includes postage.

Webbs' Special Lawn Grass Manure for Lawns, Tennis, Croquet, Cricket, & Recreation Grounds, Bowling Greens, Golf Links, &c.

Bag containing 28 lbs., **6s.** ; 56 lbs., **10s. 6d.** ; 112 lbs., **20s.**

Sow broadcast, during showery weather, at the rate of 4 ounces to the square yard. In preparing ground for new Lawns, dig in 6 to 8 cwt. per acre.

Reproduced from a Photograph by kind permission of the late Countess of Stamford and Warrington.

MAKING AND RENOVATING LAWNS.

PREPARING THE GROUND.—When a site has been chosen for the Lawn, the first point needing attention is the nature of the soil and sub-soil, upon which will depend much of the labour required. If the soil be of a good medium texture, neither very heavy nor excessively light, with sufficient drainage below in the shape of a porous subsoil, the proprietor is fortunate, as he has all the preliminary requirements to ensure success in his undertaking. This is, however, seldom the case, for the soil usually needs special preparation, and in some instances it is even necessary to thoroughly drain it; but before undertaking the latter operation, it should be carefully considered if some more favourable position could be selected. With good natural drainage, all that is essential is well digging the ground a spit or more in depth, thoroughly pulverising it to ensure its subsequent firmness and regular sinking. If it be too heavy, some lighter vegetable soil must be freely incorporated with it; if too light, a little moderately heavy turfy loam will improve it, and if there be any doubt as regards its fertility, **our Special Lawn Grass Manure** should be dug in liberally. The next point of importance is levelling the surface, which must be well and repeatedly raked, all large stones being removed, and any hardened pieces of earth which cannot be readily broken. As portions sink, the hollows should be firmly filled, ample time being allowed for the thorough settling of the soil, which is greatly aided by a few heavy showers of rain, and at the best time for Lawn-making—March or April—these are usually sufficiently abundant. Preparing the ground should never be attempted when it is very dry, as it takes much longer to settle satisfactorily when dug at that time, and if it be urgent to proceed with the work under such conditions, the soil must be well watered and allowed to remain undisturbed for a short time. All being in readiness, the next operation will be—

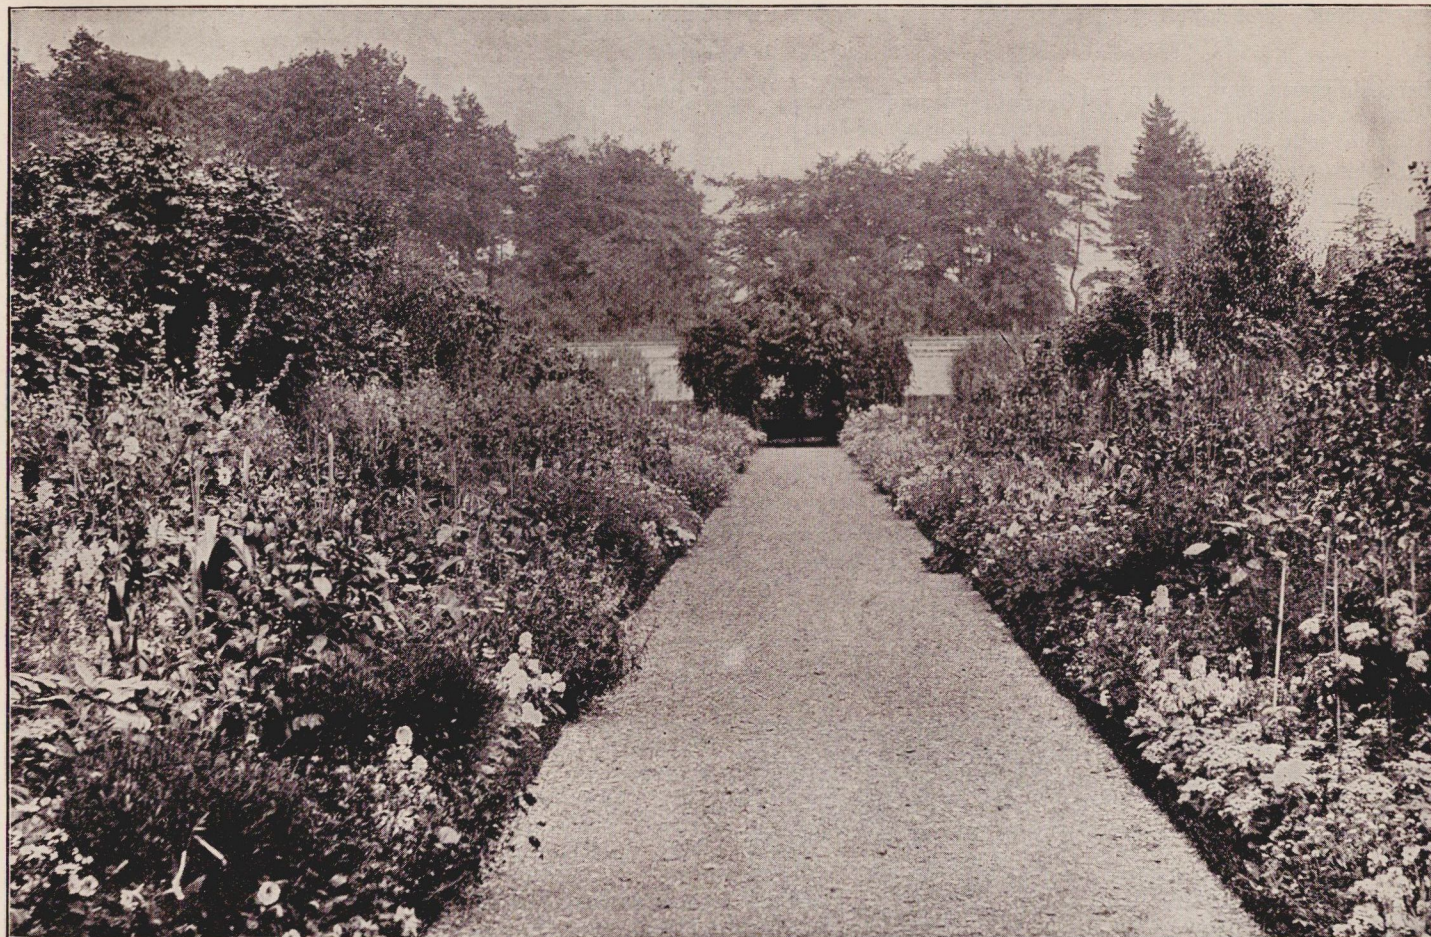

SOWING THE SEEDS.—Having ascertained that the soil is firm, level, and suitably moist, preparation must be made for sowing the seeds. Here, it may be remarked, in the interest of those forming lawns, that it is unwise to be too economical in the quantity of seeds used, if the best results are desired, and the slight additional outlay needed to procure an adequate quantity will yield ample satisfaction in the success achieved. To ensure a thick and even sward, **2 to 3 bushels (or 50 to 75 lbs.) of our best Mixture of Prize Lawn Grass Seeds, per acre**, will be required, —some of the finest lawns we have ever seen having been sown with seeds at the last-mentioned rate. The selection of suitable mixtures is best left to the

seedsman, whose reputation will be the purchaser's safeguard. The seeds should be sown broadcast and as evenly as possible, then lightly rake the soil and roll it, also watering it if necessary, repeating the latter, if the weather be dry, until the seeds germinate. In a fortnight to three weeks or a month, according to the season and locality, the grass will be ready for the first cutting, which should be done with a scythe, care being taken not to cut it too closely. If good progress is made, and it is seen that the grass is strong, the machine may be run over it lightly in a week's time from the first cutting, continuing this treatment until the grass is well established, when it must be frequently rolled and cut as required. It is sometimes advisable to form the verges with turves if a good sample can be obtained, as a firm, neat edge is then secured at once, which adds greatly to the beauty of a lawn.

RENOVATING LAWNS.—To preserve a Lawn in good condition an annual dressing of manure is needed, and if this be regularly and judiciously performed, little will be required in the way of renovation, as if a few seeds be sown each year when the dressing is applied, wherever the turf shows a tendency to become bare, a fresh even verdure will be maintained. Unfortunately, neglect for a few years often renders elaborate measures indispensable to its preservation, or rather renewal. When this is the case, well-decomposed horse or cow manure—the latter being very good—or **our Special Lawn Grass Manure**, may be applied **at the rate of 5 to 6 cwt. per acre**. The first-named should be spread on, about an inch or so in thickness, the bare surface having been first raked and sown with **our mixture of Seeds, at the rate of 1 bushel (or 25 lbs.) per acre**, while, if the Lawn appears to want substance, **10 to 12 lbs. per acre of Trifolium repens** may be sown over the whole. Renovation, however, is only advisable where the Lawn has been thoroughly made, as if it is uneven or insufficiently drained it would be far better to make a new one. **Our specially-prepared Compound Manure** has proved very successful when applied as a dressing for Lawns, either annually to preserve their beauty or to renovate those that have been neglected. This manure should be mixed with about twice its weight of fine soil, and thinly strewn over the surface **at the rate of 3 to 4 cwt. per acre**. As a liquid manure it may be employed, if well mixed with water, in the proportion of 5 to 6 ounces to a gallon of water, and applied by means of a can with a coarse rose.

Webbs' Hardy Perennial Plants.

Hardy perennial flowering plants form an important and rapidly increasing branch of our business. We usually have a supply of the following Plants in stock; any not enumerated can be obtained on the most favourable terms.

A Border in the Grounds of the Rt. Hon. The Earl of Sandwich, Hinchbrook.

	Each.		Doz.	
	s.	d.	s.	d.
Achillea Eupatorium. Showy and effective. Flowers yellow	0	9	8	0
Achillea millefolium roseum. Showy and useful for cutting. Flowers rose	0	6	5	0
Achillea Ptarmica, flore pleno (<i>Sneezewort</i>). Pure white double flowers, very floriferous, and in- valuable for cutting purposes	0	6	5	0
Achillea Ptarmica, The Pearl. An extra fine large flowering variety	0	10	9	0
Aconitum japonicum (<i>Monk's Hood</i>). A beautiful plant, with large, glossy green leaves, pro- ducing stout spikes of deep blue flowers	1	0	10	6
Agapanthus umbellatus , blue	0	9	8	0
Do. do. albus , white	1	6	—	—
Splendid plants, with ornamental foliage producing umbels of large, beautiful flowers, fine for pot culture.				
Agrostemma coronaria hybrida (<i>Rose Champion</i>). A free-blooming plant, with very rich crimson double flowers	1	0	10	6
Agrostemma coronaria alba. Bears double white flowers. Very free blooming	1	0	10	6

	Each.		Doz.	
	s.	d.	s.	d.
Alstroemerias , in variety. A lovely class of plants, the flowers of which are useful for cutting	0	3	2	0
Alyssum saxatile. Rich yellow flowers. One of the most valued plants for rock-work	0	8	7	0

ANEMONE.

Anemone japonica alba , { Handsome autumn- white } flowering plants,	0	10	9	0
Anemone japonica rosea , { hardy and easy of rose } cultivation	0	8	6	6
Anemone nemorosa cærulea , sky-blue, single flowers	0	6	5	0
Anemone nemorosa flore pleno (<i>Wood Anemone</i>). Flowers double white	0	8	7	0
Anthericum liliastrum major (<i>St. Bruno's Lily</i>). Spikes of pure white flowers, deliciously fragrant	1	0	10	6
Aquilegia (<i>Columbine</i>). Elegant early-flowering plants, in named varieties, also mixed hybrids	0	8	7	0

Webbs' Hardy Perennial Flowering Plants—continued.

	Each. s. d.	Doz. s. d.

CHRYSANTHEMUM MAXIMUM.

See page 138.

DELPHINIUM.

	Each. s. d.	Doz. s. d.
Delphinium. Webbs' Hybrids, mixed. Seedlings from the best named varieties in various shades of blue	0 6	5 0
Delphinium formosum. Rich dark blue, very fine	0 6	5 0
Do. nudicaule. Dwarf-growing, and bearing numerous spikes of bright red flowers	0 10	9 0
Deutzia gracilis. A grand plant for forcing in pots for early flowering	1 0	10 6
Dielytra spectabilis. Valuable for forcing, flowers pink, 9d. and 1s. each, 7s. 6d. and 10s. 6d. doz.	0 10	9 0
Doronicum Austriacum (Leopard's Bane). A very effective perennial, flowers large, of bright golden yellow, very early	0 10	9 0
Doronicum plantagineum excelsum. Large bright yellow Marguerite-like flowers. An early and continuous bloomer	0 10	9 0
Echinacea purpurea (Rudbeckia). Large reddish purple flowers with black disc in centre; a fine autumn border plant	0 8	7 0
Echinops Ritro (Globe Thistle). Bears an abundance of globular heads of blue flowers	0 8	7 0
Erigeron aurantiacum. A compact-growing plant, with stems 9 inches high, bearing profusely large orange-coloured flowers	0 9	—
Erigeron speciosum superbum. A fine autumn-blooming plant, with large purple flowers	0 6	5 0
Eryngium amethystinum. Spiny lacinated foliage and amethyst-blue flowers	1 0	10 6
Eryngium alpinum. Stems of deep, steely blue. One of the best varieties	1 0	10 6
Eryngium planum caelestinum. Branching stems, small heads of deep blue colour	0 9	8 0

	Each. s. d.	Doz. s. d.
Francoa appendiculata. White and pink, quite hardy, useful for cutting	1 0	10 6
Funkia lutea variegata. Yellow flowers, green and white variegated foliage	1 0	10 6
Funkia Sieboldi (Plantain Lily). Large glaucous leaves, with pink lily-like flowers, very beautiful	0 9	7 6
Gaillardia. Webbs' Hybrids, mixed. One of the most useful border plants grown, producing their lovely maroon, brown, and golden-yellow flowers the whole of the summer	0 8	7 0
Galega officinalis alba. A handsome border plant, bearing clusters of pea-like white flowers	0 8	7 0
Do. do. compacta. Dwarf and compact with lilac flowers	0 9	7 6
Gentiana acaulis. A pretty rock-plant bearing rich blue flowers	0 8	7 0
Geum coccineum, flore pleno. Dazzling scarlet semi-double flowers	0 8	7 0
Geum miniatum. Large single flowers of bright orange-scarlet	0 8	7 0
Gynerium argenteum (Pampas Grass). Forms magnificent clumps for centre of beds, on lawns, etc. 1s. and	1 6	—
Gypsophila paniculata. An extremely graceful plant, its masses of minute white flowers producing a beautiful gauze-like appearance, invaluable for cutting	0 6	5 0
Harpalum rigidum. Flowers very large, golden yellow with black disc, very attractive	0 8	7 0
Harpalum rigidum, duplex. A semi-double and stronger-growing variety of the above	0 8	7 0

ERIGERON SPECIOSUM SUPERBUM. See annexed.

Webbs' Hardy Perennial Flowering Plants—continued.

	Each. s. d.	Doz. s. d.
Helenium autumnale. A strong-growing autumn-flowering plant, with large yellow flowers	0 10	9 0
Helenium grandicephalum striatum. Crimson and gold flowers borne on stems 4 to 5 feet high	0 10	9 0
Helenium pumilum. A more dwarf plant than autumnale, a grand variety for cutting	0 10	9 0
Helianthus multiflorus maximus (Perennial Sunflower). An enormous-growing plant, 6 to 7 feet in height, bearing immense single golden-yellow flowers	0 10	9 0
Helianthus multiflorus maximus, flore pleno. A double variety of the preceding	0 10	9 0
Helleborus niger (Christmas Rose). Forcing clumps	2 6	25 0
Do. do. do. Selected clumps	1 6	16 6
Do. do. do. Fine clumps	1 0	10 6
Hemerocallis flava (Day Lily). A beautiful summer-flowering plant, producing umbels of finely-scented yellow flowers	0 10	9 0
Hemerocallis fulva. Bronzy-orange flowers, large and handsome	0 10	9 0
Hemerocallis Kwanso, flore pleno. A beautiful variegated-leaved variety	0 10	9 0
Hepatica angulosa. Sky-blue flowers	0 10	9 0
Hepatica. Double and single	0 9	7 6
Charming dwarf-growing plants, flowering very early in the spring; suitable for open border or rock-work.		
Heuchera lucida. Beautiful light flowers, valuable for decorative purposes	0 9	8 0
Heuchera sanguinea. One of the most interesting perennials grown, of compact habit, producing graceful spikes of scarlet flowers	0 9	8 0
Hollyhocks. Mixed. Strong seedlings from our prize strain	0 9	8 0

DORONICUM PLANTAGINEUM EXCELSUM.

See page 139.

POTENTILLA. See page 141.

	Each. s. d.	Doz. s. d.
Hydrangea paniculata grandiflora. A grand plant for cool greenhouse or forcing, bearing immense trusses of beautiful cream-coloured flowers	1s. and 1 6	—
Iberis Gibraltarica (Perennial Candytuft), {Lovely plants pale pink for open beds	0 9	7 6
Do. sempervirens, white or rock-work	0 6	5 0
Inula glandulosa. A fine border plant, with large yellow flowers	0 9	7 6

IRIS.

Iris Germanica. Fine named sorts	6s. to	—	9 0
Do. do. Mixed	—	—	4 6
Do. Kämpferi. Choicest mixed varieties	—	—	10 0
Do. pumila. Dwarf purple, very pretty	—	—	4 6
Do. stylosa. A lovely winter-flowering species, light blue flowers, with yellow blotches	—	—	4 6

Isolepsis gracilis. A pretty drooping grass, suitable for pots or hanging baskets	0 10	9 0
Lilac, Charles X. Deep purple flowers, very fine	3 0	—
Do. Marie Legraye, fine, pure white	3 0	—
Do. Persian. Strong plants	1s. to 2 0	—
Do. Virginalis. Fine pure white variety	1s. 6d. to 2 6	—
Lobelia cardinalis. Dark green foliage, intense scarlet flowers	1 0	10 0
Lupinus polyphyllus. Blue perennial Lupin	0 6	5 0
Do. do. albus. Flowers white	0 6	5 0
Lychnis chalconica, flore pleno. Immense heads of double scarlet flowers	0 10	9 0
Lychnis roseus, flore pleno. Double rose flowers, very showy	0 10	9 0

Webbs' Hardy Perennial Flowering Plants—continued.

Lythrum roseum superbum. Rich bright rose flowers, keeping in bloom a long time	0	8	7	0	
Malva moschata alba. Pure white flowers, very fragrant	0	6	5	0	
Michaelmas Daisies (Perennial Asters). A fine assortment of these useful border plants to name	0	9	7	6	
Oenothera macrocarpa (Evening Primrose). Very compact habit, large deep yellow flowers	0	10	9	0	
Oenothera speciosa. Very showy, large white fragrant flowers	1	0	10	6	
Oenothera Youngii. An excellent border plant, bearing rich yellow flowers	1	0	10	6	
Orobis vernus. A very early spring-flowering plant, flowers purple	0	10	9	0	
Pæonies, Herbaceous. Double and single varieties 1s. 6d. and 2	6	—			
Papaver Cambricum (Welsh Poppy). Flowers yellow	0	9	7	6	
Papaver nudicaule (Iceland Poppy). Flowers yellow, orange, and white	0	6	5	0	
Papaver orientale (Oriental Poppy). Immense deep crimson flowers	0	8	7	0	
Pentstemons. From the finest named varieties	0	6	5	0	
Phlox, Herbaceous. In splendid variety, early and late flowering sorts	0	10	9	0	
Physalis Francheti or "Winter Cherry," very ornamental and effective, bearing pendulous scarlet bladder-like calyces enclosing red fruits	1	6	—		
Picotee. Finest named varieties	1	0	10	6	
Pinks. Choicest sorts	0	6	5	0	
Poa trivialis argentea. Variegated foliage grass	0	6	5	0	
Polyanthus. Gold-laced, splendid strain, mixed	—	4	0		
Polygonum oxyphyllum. Produces panicles of sweet-scented white flowers	1	0	10	6	
Potentilla. Double perennials, the flowers varying in colour from crimson to yellow	0	10	9	0	
Primrose. Webbs' Hybrids. A very superior strain, flowers large, colours bright and clear	0	8	7	0	
Primrose. Double lilac, white, and yellow	0	8	7	0	
Primula Sieboldi. Mixed Seedlings. A superb strain of this lovely plant, suitable for open borders or rockeries, and equally adapted for cool greenhouse	0	10	9	0	
Primula rosea. Beautiful bright rose	0	10	9	0	
Pulmonaria augustifolia. Very pretty. Bears pink flowers changing to blue	0	10	9	0	
Pyrethrum. Choicest Hybrids. Double and single, in distinct colours	0	10	9	0	
Pyrethrum. Single, mixed varieties	0	6	5	0	
Ranunculus aconitifolius plenus (Bachelor's Button). Flowers pure white and very double	0	9	7	6	
Ranunculus, acris, flore pleno. Double golden-yellow flowers	0	6	5	0	
Rudbeckia laciniata plena (Golden Glow). Large double golden flowers, height 6 feet	0	10	9	0	
Rudbeckia Newmanii. A useful border plant, flowers bright yellow with black centre	0	8	7	0	
Rudbeckia subtomentosa. Rich yellow flowers with purple centre	0	10	9	0	
Scabiosa caucasica. A handsome perennial, pale lilac-blue flowers, invaluable for cutting	0	10	9	0	
Senecio pulcher. Immense heads of purple-crimson flowers, very effective	0	9	7	6	
Solidago canadensis. Bright yellow flowers	0	10	9	0	
Do. vigurea nana. A dwarf form of above, bearing masses of yellow flowers	0	8	7	0	
Spiræa aruncus. Bears graceful feathery plumes of pure white flowers	1	0	10	6	
Spiræa astilboides. Dense plumes of white flowers	0	9	7	6	
Spiræa astilboides floribunda. Intermediate in size between S. astilboides and S. japonica	1	0	10	6	
Spiræa filipendula, flore pleno. Handsome fern-like foliage. Double white flowers	0	9	7	6	
Spiræa japonica. An elegant and graceful plant, with large feathery trusses of pure white flowers. 6d. and 9d. each; 5s. and 7s. doz.					
Spiræa japonica compacta multiflora. Dwarf and compact in habit. Bears denser spikes than S. japonica	0	9	7	6	
Spiræa palmata. Bears rosy crimson flowers	0	10	9	0	
Spiræa palmata alba. New white-flowered variety	1	6	—		
Statice latifolia (Sea Lavender). A very decorative plant, forming immense branching panicles composed of small dark blue flowers	0	9	8	0	
Statice tartarica. Pink flowers	0	9	8	0	
Streptocarpus. Mixed Hybrids. Pretty plants for pots or basket-work, bearing large trumpet-shaped flowers in various colours	—	10	0		
Thalictrum aquilegiæfolium. Fine border plant, elegant foliage, cream-coloured flowers	0	9	—		
Thalictrum adiantifolium. A beautiful plant, rivalling the Maidenhair Fern in the delicacy of its foliage, hardy and easily grown	1	3	—		
Tiarella cordifolia (Foam Flower). A plant of great beauty both in leaf and flower. The flower stems are densely crowded with feathery white blossoms. Very effective in pots or open border	0	10	9	0	
Tradescantia Virginica alba. A showy plant with charming white flowers	0	8	7	0	
Tradescantia Virginica rubra. Purplish red flowers	0	8	7	0	
Do. do. blue. A charming plant, bearing blue flowers	0	8	7	0	
Tritoma uvaria grandiflora (Torch Lily or Red-Hot Poker). Splendid spikes of rich crimson and orange flowers	1	0	10	6	
Tritoma Burchelli. Fine spikes of dark red and yellow flowers	1	0	10	6	
Trollius asiaticus (Globe Flower). Large globular-shaped yellow flowers, very effective	0	10	9	0	
Trollius Fortunei pleno. A very fine variety, with large semi-double orange flowers	1	6	—		
Veronica repens. A dense close-growing trailing plant, with white flowers	0	6	5	0	
Veronica rupestris. Flowers bright blue, one of the prettiest of rock-work plants	0	8	7	0	
Vinca (Periwinkle). Blue or white	0	6	5	0	
Violas. Bedding, of sorts, blue, white, or yellow, 4s. to	—	6	0		

VIOLETS.

Double Varieties.

Comte de Brazza. White, very fine	0	8	7	0
Lady Hume Campbell. Large, soft lavender-blue, late bloomer	0	9	7	6
Marie Louise. Extra fine, lavender and white	0	8	7	0
Neapolitan. Pale lavender	0	8	7	0

Single Varieties.

Admiral Avellan. Very rich purple, distinct	0	8	7	0
Princess of Wales. Very large, rich violet	0	8	7	0
Russian. Blue	0	4	3	0
The Czar. Large, deep violet, very fragrant	0	8	7	0
White Czar. White, fine	0	6	5	0

CLIMBING PLANTS.

CLEMATIS.

CLEMATIS.

New Hardy Hybrid (*Coccinea*). A distinct and beautiful race. These may be used as open-air climbers or for the conservatory. Useful for cutting, the flowers keeping fresh in water for several days.

	Each. s. d.	Doz. s. d.
Countess of Onslow. Bright violet-purple, with a broad band of scarlet down the centre of each petal. Bell-shaped form. Free flowering and hardy	2 6	—
Duchess of Albany. Beautiful bright pink, deeper down the centre, softening to lilacy-pink round the margin. Strong grower, hardy and free-flowering	2 6	—
Duchess of York. A delicate blush pink, with a deeper tinge down the centre of each petal	2 6	—
(L) Beauty of Worcester. Rich bluish violet shade, with pure white stamens	2 6	—
(F) Belle of Woking. Silver-grey; double	2 6	—
(F) Duchess of Edinburgh. Double, pure white	2 6	—
(J) Flammula. Small white, sweet-scented	1 0	—
(J) Gipsy Queen. Rich purple	2 0	—
(F) John Gould Veitch. Lavender-blue, large double	2 6	—
(J) Jackmanni alba. Beautiful pure white	2 6	—
(J) Jackmanni. Violet-purple, free-blooming	1 6	—
(L) Lanuginosa. Light blue, large	2 0	—
(L) Lanuginosa nivea. White	2 0	—
(P) Miss Bateman. White chocolate, red anthers	2 6	—
(V) Madame Grange. Crimson-violet, tinted red centre	2 0	—
(M) Montana. Hardy white, sweet-scented	1 6	—
(J) Rubella. Claret-purple	2 0	—
(J) Star of India. Reddish violet-purple, with red bars	2 0	—

The types to which the varieties belong are initialled as follows:—J (*Jackmanni*), L (*Lanuginosa*), M (*Montana*), F (*Florida*), P (*Patens*), V (*Viticella*). We shall be pleased to supply other varieties not mentioned above.

	Each. s. d.	Doz. s. d.
Ampelopsis hederacea. The well-known Virginian Creeper	1 6	—
Ampelopsis Veitchii. The close-growing, small-leaved variety	1 6	—
Bignonia radicans major. A splendid greenhouse climber, with bright scarlet flowers	1 6	—
Calystegia incarnata (<i>Convolvulus</i>). Delicate rose-coloured flowers	0 10	—
Calystegia pubescens, flore pleno. Double rosy purple flowers	0 10	—
Cotoneaster microphylla. A small-leaved hardy climber, with bright scarlet berries	1 6	—
Cotoneaster Simonsii. A larger-growing variety than the above, with light red berries	1 6	—
Cratægus pyracantha (<i>Evergreen Thorn</i>). Evergreen climber, produces bright scarlet berries	1 6	—
Cydonia (<i>Pyrus</i>) japonica. Scarlet, suitable for any aspect	1 6	—
<hr/>		
Hedera (<i>Ivy</i>) Irish	9d. to 2 0	—

Hops. Strong plants for climbing	—	4 0
Jasmine. White, sweet-scented, summer flowering	1 6	—
Do. Yellow, winter flowering	1 6	—
Lathyrus latifolius (<i>Everlasting</i>) { One of the most useful hardy } Pea), rose { climbers for } Do. do, albus, white { cutting }	0 9 1 0	—
Lonicera aurea reticulata. The Japanese variegated honeysuckle	1 0	—
Lonicera brachypoda. Sweet-scented	1 3	—
Do. Dutch. The well-known common sweet-scented honeysuckle	1 0	—
Lonicera flexuosa. Evergreen, except in severe winters	1 3	—
Lonicera (<i>Scarlet Trumpet</i>). Free-growing, deep-coloured flowers	1 6	—
Passiflora cærulea (<i>Passion Flower</i>). Blue	1 6	—
Do. Constance Elliot. Flowers nearly white, sweet-scented	1 6	—
Tacsonia van Volxemi (<i>Scarlet Passion Flower</i>). A lovely cool-house climber	2 6	—
Tropæolum speciosum (<i>Scarlet Canary Creeper</i>). One of the choicest hardy climbers in existence, producing a blaze of scarlet flowers in late summer and autumn	1 0	10 6
Wistaria sinensis. A beautiful climber, with large drooping clusters of lavender-blue flowers	1s. 6d. and 2 6	—

Webbs' Bulbs for Spring Planting.

GLADIOLUS COLVILLEI ALBUS—"The Bride."

GLADIOLI.

WHEN Gladioli are cultivated in beds by themselves it is always best to have the ground prepared for their reception as early as possible in the preceding autumn. If the soil is at all heavy and moist, it should first be drained, and then dug to a good depth, plenty of rotten manure being worked into the underspit. When planting in the mixed border, leaf-mould can be added to the manure; and before inserting the bulbs, well loosen the ground to a good depth with a fork. The roots should be planted about four inches deep.

Webbs' "Magic" Compound Manure

Should be used by every one who wishes to excel in the cultivation of
Vegetables and Flowers for Exhibition, Pleasure, or Profit.

Hundreds of Gold and Silver Medals, Champion Prizes, etc.,

have been awarded to Vegetables and Flowers grown with the aid of Webbs' Compound Manure.

WE have the greatest confidence in recommending our Compound Manure as being the best fertiliser for Horticultural and Floricultural purposes ever offered, the most extraordinary results having been obtained from its use. It contains a high percentage of phosphates, ammonia, and other ingredients calculated to greatly assist the growth of Vegetables, and to increase the bloom and brilliancy of Flowers. It is admirably adapted for Lawns and Vine-borders, and may be used with great advantage for Pot Plants in Conservatories, Frames, Greenhouses, etc.

Tin Case containing 1 lb., 1s. ; 3 lbs., 2s. 6d. ; 7 lbs., 5s. ; and Bag of 28 lbs., 13s. ; or 56 lbs., 24s.

DIRECTIONS FOR USE.

In preparing potting material, mix well together 1 lb. of the Manure with each bushel of soil. When Pot-plants have fairly started into growth, the Manure may be used to advantage by sprinkling a small quantity on the surface of the soil, after which water the plants, care being taken not to wash the Manure out ; the application may be repeated at intervals of 14 days. For Vegetables, Flowers, etc., in the open garden, and also for Vine-borders, sprinkle 4 ozs. of the Manure on every square yard of ground ; after which fork in and give a good watering. For Lawns, mix the Manure with a small portion of soil and spread evenly over the surface, at the rate of 1 oz. of Manure to the square yard. A solution of the Manure may be made by dissolving 5 ozs. in a gallon of water, which should be well stirred ; it may then be applied with advantage as a liquid Manure.  *Directions for use also accompany each package.*

EXTRACTS FROM LETTERS :

The following are taken from hundreds of a similar character.

The Rt. Hon. Earl of Carnarvon's Head Gardener :

'Quick in action and lasting in its effect.'

Mr. J. MARSHALL, Gardener to C. E. Shaw, Esq., M.P. :

'Used on Onions with great success.'

Mr. R. MILNER, The Gardens, Penrice Castle :

'It is without doubt the Manure of the day.'

The Rt. Hon. Lord Aldenham's Head Gardener :

'It is certainly a first-rate stimulant.'

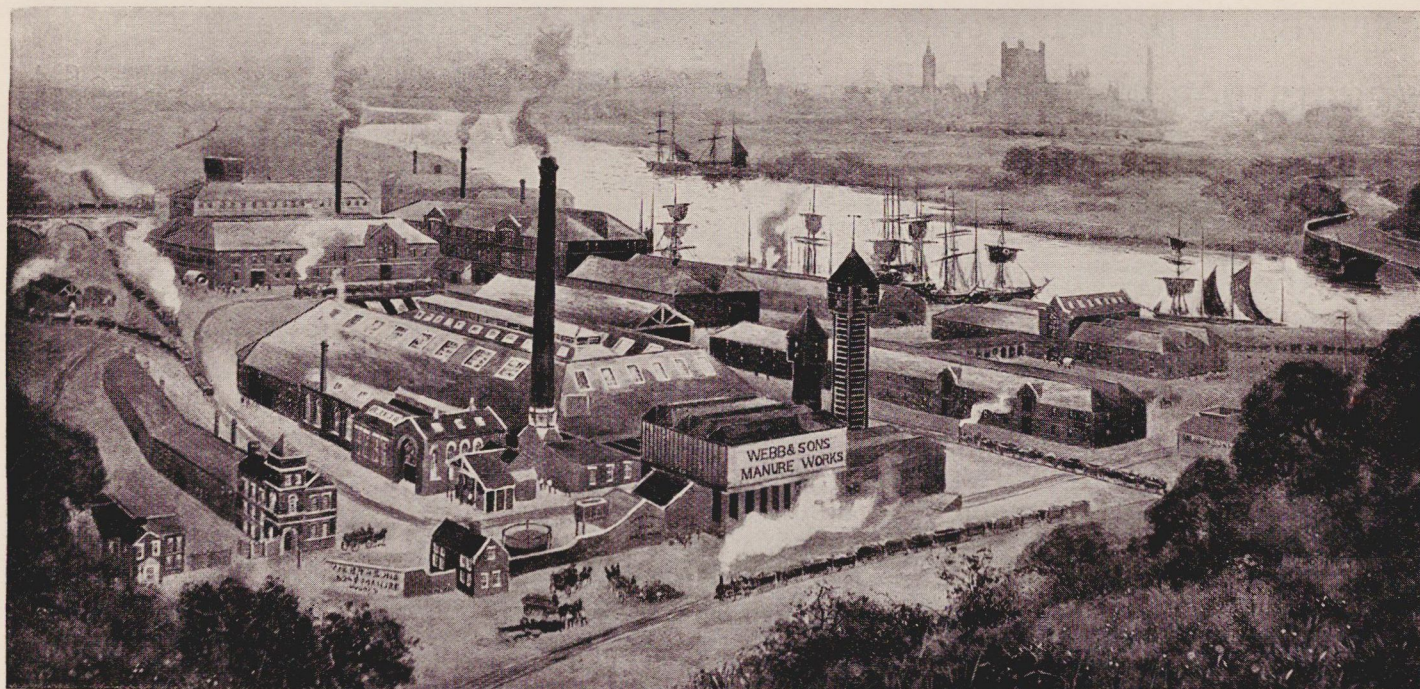

The Rt. Hon. Lord de Ramsey's Head Gardener :

'I shall continue to use it for Exhibition specimens.'

The Rt. Hon. Earl Ferrers' Head Gardener :

'A valuable stimulant for all Stove and Greenhouse plants.'

WEBBS' GARDEN FERTILISERS.

WEBB & SONS' MANURE WORKS, SALTNEY, CHESTER,

where Webbs' Compound Manure and Special Garden Fertilisers are prepared on the most approved scientific principles.

These high-class Fertilisers are specially made for the various plants, etc., for which they are offered, and their composition is based on the results of a series of trials and experiments which we have carried out for a number of years.

WEBBS' SPECIAL MANURE FOR VINES.

Bag containing 28 lbs., **6s.**; 56 lbs., **10s. 6d.**; 112 lbs., **20s.**

Apply, occasionally, at the rate of $\frac{1}{2}$ lb. to the square yard, sprinkled on the surface, and lightly forked or raked in.

WEBBS' SPECIAL CHRYSANTHEMUM MANURE.

Bag containing 28 lbs., **7s. 6d.**; 56 lbs., **12s. 6d.**; 112 lbs., **21s.**

Mix 1 lb. of Manure with a bushel of soil for potting, and top-dress, at intervals of 14 days, at the rate of a table-spoonful to an 8-inch pot.

WEBBS' SPECIAL MANURE FOR POTATOES.

Bag containing 28 lbs., **5s.**; 56 lbs., **7s. 6d.**; 112 lbs., **12s. 6d.**

Sow broadcast when planting, at the rate of 4 ounces to the square yard, or 8 cwt. to the acre.

WEBBS' SPECIAL MANURE FOR TOMATOES.

Bag containing 28 lbs., **6s.**; 56 lbs., **10s. 6d.**; 112 lbs., **20s.**

Mix 1 lb. of Manure to every bushel of soil for pots or beds, and top-dress frequently at the rate of 4 ounces to the square yard.

Used by all the leading exhibitors, and pronounced by them to be the best Fertilisers in the Market for the respective plants for which they are prepared.

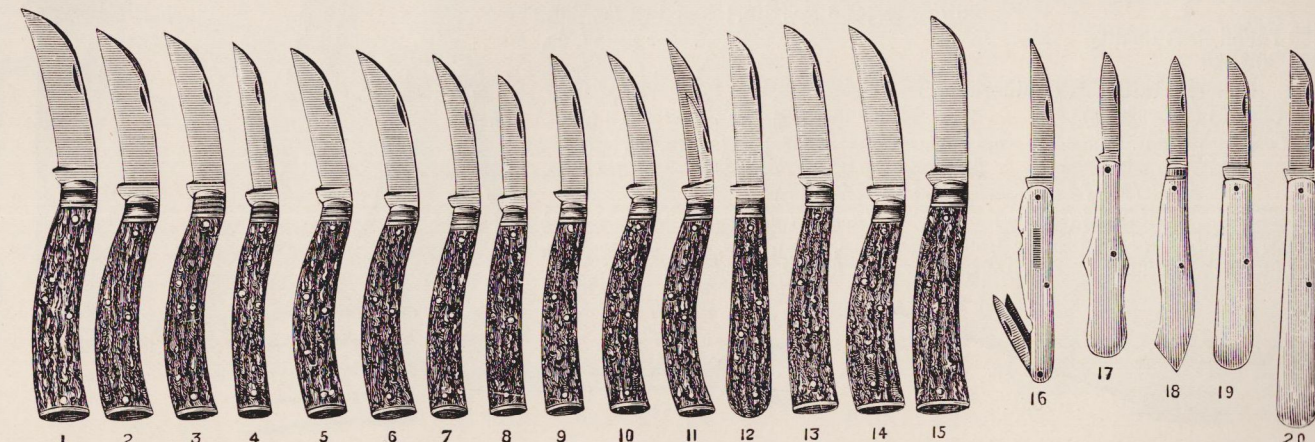

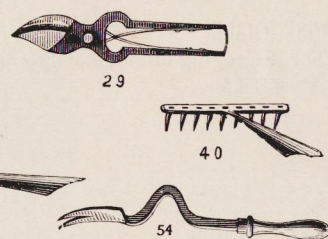

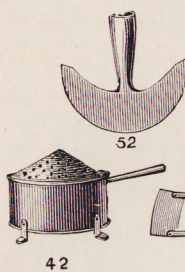

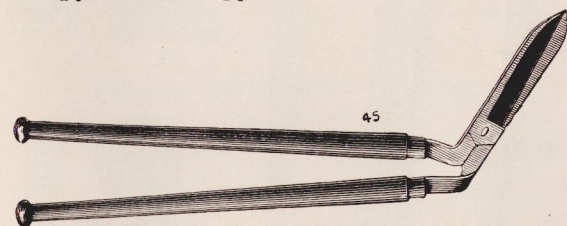

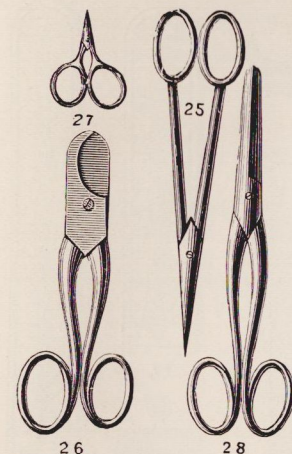

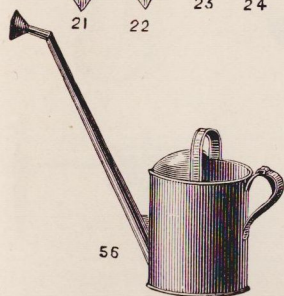

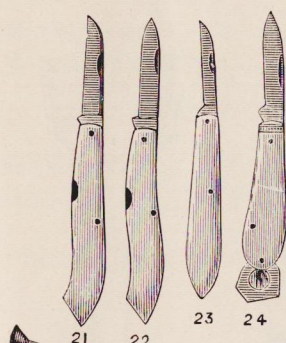

WEBBS' SPECIAL LAWN GRASS MANURE

FOR LAWNS, TENNIS, ARCHERY, CROQUET, CRICKET, & RECREATION GROUNDS, BOWLING GREENS, GOLF LINKS, Etc.

Bag containing 28 lbs., **6s.**; 56 lbs., **10s. 6d.**; 112 lbs., **20s.**

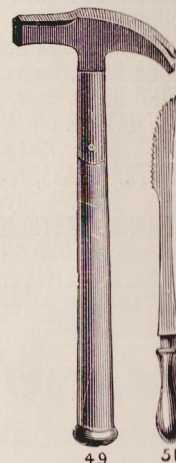

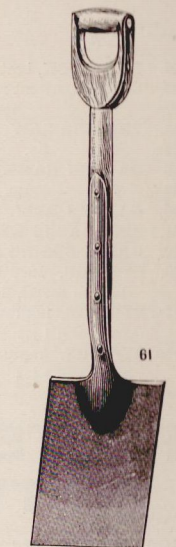

Sow broadcast, during showery weather, at the rate of 4 ounces to the square yard. In preparing ground for new Lawns, dig in 6 to 8 cwt. per acre.

With lip and guard, 7s. 6d. extra.			

Cock and spreader for watering Lawns, extra, £1 9 0

GENERAL PURPOSE BARROW.

The frame is made of hard wood throughout, and is bolted together firmly with $\frac{1}{2}$ -in. bolts and nuts. The body, which is made of 1-in. timber, is $18\frac{1}{2}$ " long, 14" wide at front, and 17" at back; top $29\frac{1}{2}$ " x 23"; depth at front, $14\frac{1}{2}$ "; at back, 11". The wheel, which is bound with iron tyre $1\frac{3}{4}$ " wide x $\frac{1}{4}$ " thick, is 19" high. Each, **15s.** Extra painted, **16s. 6d.**

THOMAS MCKENZIE & SONS Ltd.,

75 Victoria Street, Liverpool, and Great Brunswick Street, Dublin.

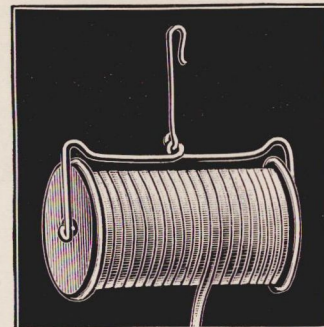

These Barrows are also sold by Messrs. Webb & Sons, at above prices, delivered at Liverpool.

**WEST'S
PATENT
CORRUGATED**

Patent Nos. 21,337 and 18,072.

Being corrugated, it expands with plant's growth, yet will not contract with wet, so plants can be quickly tied up, and it cannot cut them. It can be suspended from the buttonhole, the coils being so made that when in the pocket, and the inner end is pulled, the stuff draws out as desired, without entangling, and with both hands left free.

**250-yard

The Royal Seed Establishment, WORDSLEY, STOURBRIDGE.

BY APPOINTMENT.

General Remarks and Terms.

Early Orders.—To ensure the early despatch of goods, it is requested that orders may be sent to us as soon as possible. The full postal address, with the name of the Station the goods are to be sent to, will be required, and the use of the accompanying Order Sheet will greatly facilitate our work. 许多 Many orders are received without either name or address.

Letters.—All Letters received are opened by one of the principals; and, when necessary, are replied to by return of post.

Delivery.—When any discrepancy arises between the goods invoiced and those delivered by the Railway Company or other carriers, application should be made to us immediately, when prompt attention shall be given to the matter, and a receipt supplied, proving correct delivery at this end; but in no case are we to be held responsible for damage, loss, or delay in transit.

Carriage.—All Vegetable Seeds, Flower Seeds, and Bulbs are sent Free by Post or Rail to any part of the United Kingdom; and Flower Seeds to the value of 10s. are sent Free to any part of the World. We deliver Seed Corn of 40s. value Carriage Free to any Railway Station in the United Kingdom. Grass Seeds, Farm Seeds, Potatoes, Garden Implements, and other Goods of 20s. value are delivered Carriage Free to any Railway Station in England or Wales, and of 40s. value Free to Scotland or Ireland. Export Orders are delivered Free to any Port in the United Kingdom.

Discount and Credit.—We allow a Discount of Five per cent (1s. in the £) for cash in 14 days from date of Invoice, upon all goods of 20s. value and upwards that are enumerated in this Catalogue. All accounts are due, Net, at Midsummer and Christmas.

Remittances.—Remittances may be made by Cheques crossed London City and Midland Bank, Ltd., Stourbridge, or Bank of England, Birmingham, or by Post Office and Postal Orders on Wordsley, or Stourbridge, payable to Edward Webb & Sons.

Invoices.—Invoices will be sent per post, not later than the day after the goods have been despatched.

Bags, Boxes, Hampers, Etc.—Sacks, Bags, Hampers, Boxes, etc., will be charged at the lowest possible prices, and if returned immediately in good condition, *carriage paid*, the full prices will be allowed for them. When same are returned, labels must always be attached, addressed to us, and marked "Returned empties from ——" with sender's name and address: a receipt should be taken for them at the Station they are delivered to, and posted to us with an advice of their having been sent off; this will enable us to obtain delivery much quicker and more accurately.

N.B.—*Consign to Edward Webb and Sons, Wordsley, via Albion Station (London and North-Western Railway Co.), carriage paid.*

Important.—As we are Seed Farmers, we have peculiar facilities for making experiments at our Trial Grounds and Seed Farms with the various Seeds, Bulbs, Seed Corn, Potatoes, Manures, etc., that we from time to time have to offer, and are thus enabled to satisfy ourselves of their genuineness. We can also ensure our Customers the special advantage of buying direct from the growers, *at one profit*, thus avoiding the two or three intermediate advances that are usually made on the price of the article, from the time it leaves the hands of the grower until it reaches the party that uses it. Being in correspondence with the leading Seed Growers, Merchants, etc., both at home and abroad, we shall be happy to supply any article in the trade, not mentioned in this Catalogue, at the lowest remunerative price. We beg to give notice that whilst the greatest personal care is bestowed in the selection of all our Seeds, Seed Corn, Potatoes, etc., we particularly request it to be understood that we give no warranty, express or implied, as to description, quality, productiveness, or any other matter connected with anything we send out, nor will we be in any way responsible for the crops; if the purchaser does not accept the goods on these conditions, they must be returned at once, addressed to Edward Webb & Sons, Wordsley, *via* Albion Station (London and North-Western Railway Co.).

References.—We shall be much obliged if persons who are unknown to us will, when proposing business, give a reference to their Banker or to a respectable firm, or accompany the order with a remittance.

Recommendations.—We respectfully solicit the recommendation of our House to those who require Seeds, Bulbs, Potatoes, Seed Corn, Manures, etc.; and we shall be most happy to forward our Catalogue, post free, to any address.

Catalogues.—Should any Customers not receive our Catalogues at the usual periods of the year, we shall be pleased to send copies of same upon hearing from them; we find that many are lost in transit. We shall also be glad if Customers will kindly inform us of any alterations in their addresses.

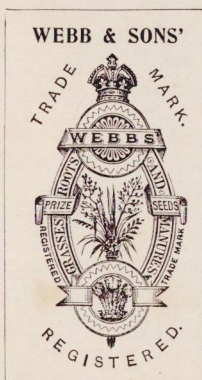

Grass and Farm Seeds.—This branch of our business is a very important one. Our principle of supplying only the best Agricultural Seeds at moderate prices has annually secured for us a large increase of business.

Customers Exhibiting at Shows.—When Customers exhibit Vegetables, Flowers, Roots, Grain, etc., grown from Seeds supplied by us, we shall be glad to furnish them with cards to affix, giving full descriptions; and in cases of Prizes being taken at any Shows with the produce of our Seeds, we shall be greatly obliged if our friends will kindly inform us of same.

Stewards, Bailiffs, and Gardeners.—Experienced Stewards, Bailiffs, and Gardeners in want of Situations are invited to communicate with us, giving full particulars, when their names shall be placed on our Free Register; and the applications of Customers requiring practical men of good character, in either capacity, will receive our best attention.

Important Caution.

Webbs' Seeds can only be obtained direct from Wordsley.

WE wish it to be distinctly understood that Webbs' Seeds can only be obtained direct from Wordsley, and that each package bears Webbs' Registered Trade Mark, without which none are genuine. Orders may be sent either by post, or through our representatives. We make these remarks owing to the fact that inferior Seeds are often sold as "Webbs'," thus causing great disappointment and loss.

Webb & Sons do not supply the Trade.
